The CR Difference

WHEN YOU'RE BUYING a new car, it can feel like everyone you encounter just wants to sell you something and there's nobody out there you can trust.

CR is here to help! You can rely on our recommendations because we have detailed data that nobody else does.

This issue of Consumer Reports New Cars has the latest data from our exclusive annual reliability surveys of our members. We ask them about the problems they had with their vehicles that cost them time and money. We also ask if they're satisfied with their vehicle. Because the only thing better than a reliable car is a car that owners love, too.

This year we gathered data on over 300,000 cars, trucks, SUVs, minivans, and wagons. But that's not all. We buy our own vehicles to test rather than relying on samples provided by automakers, so when we conduct more than 50 detailed evaluations on a car, we're testing the same one you plan to buy—not a hand-picked version that was loaned us in order to get a good review.

CR is a nonprofit, and we don't answer to automakers or dealers. It's why you won't see any ads from automakers in this magazine, but you will see exclusive test data that you can't get anywhere else.

So rest assured: You've started searching for a new car in the right place. We are proud to have earned your trust.

Ask Our Experts

When do I need to change my transmission fluid, is it necessary to put fuel in a PHEV's gas tank, and why aren't some EVs sold nationwide?

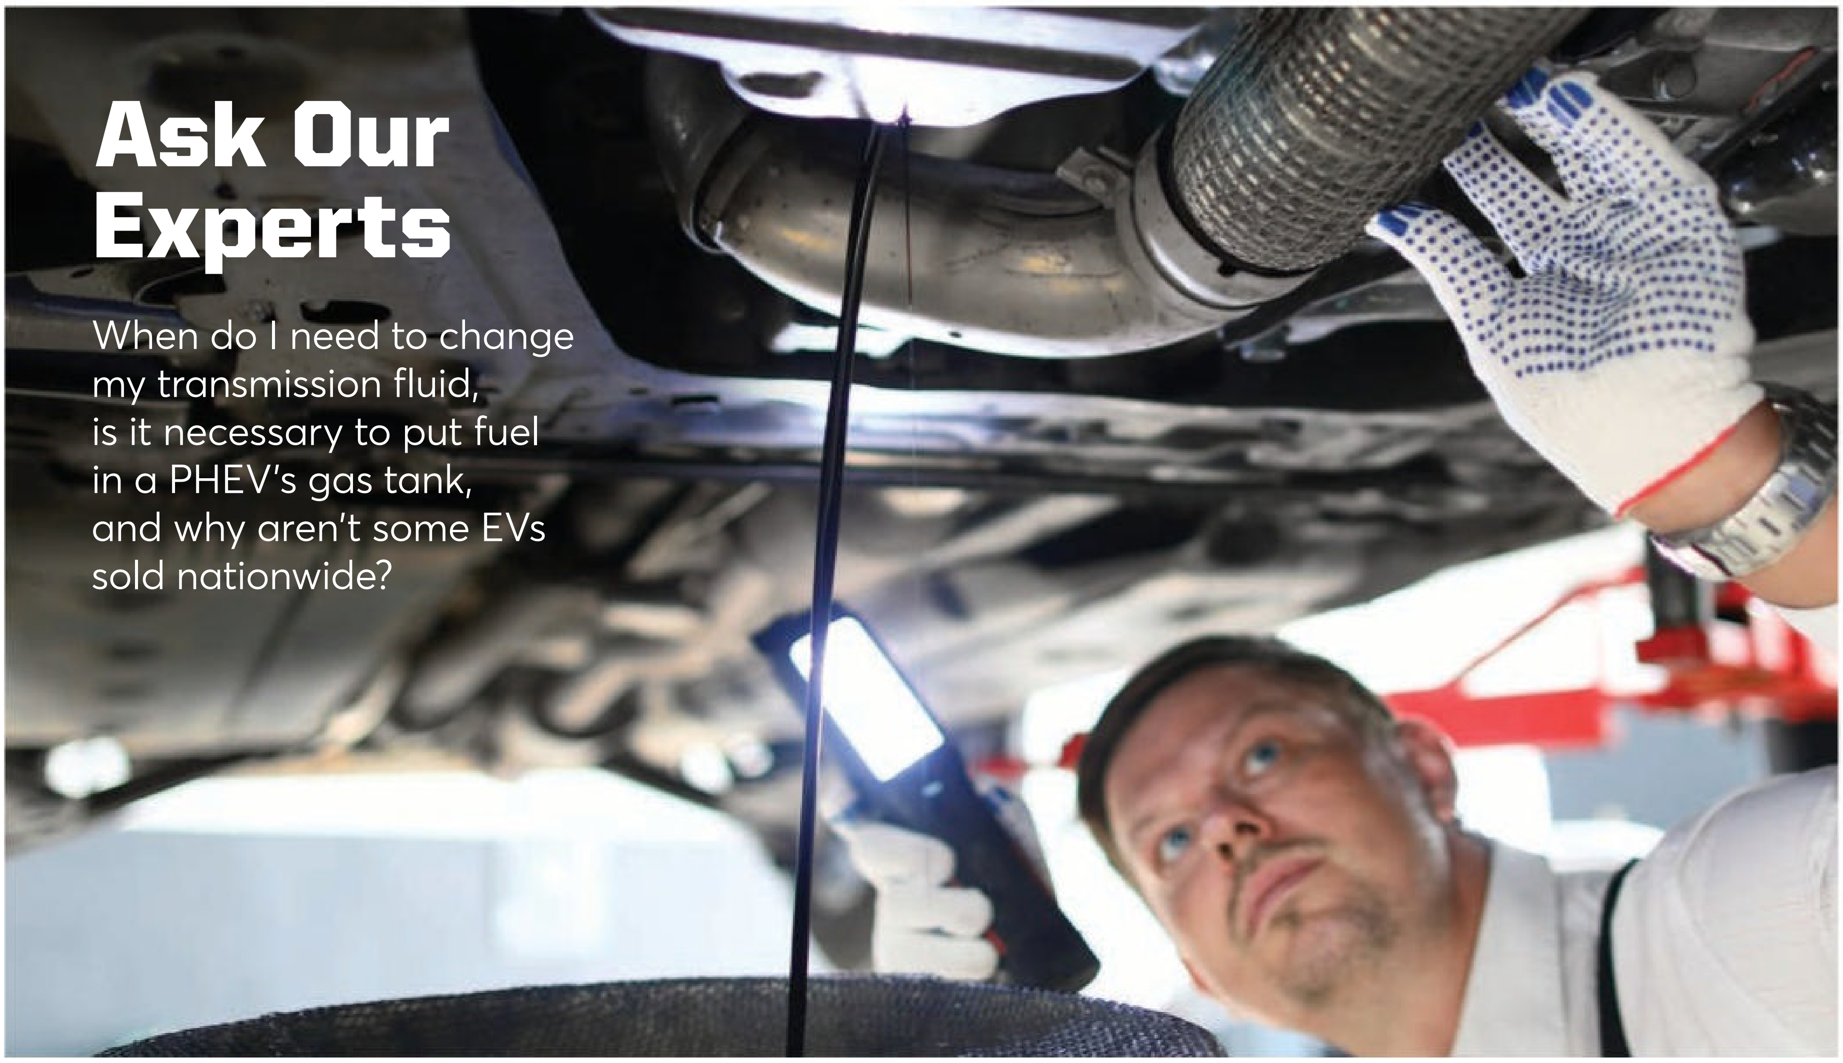

PHOTO: ADOBE STOCK

Q. It is necessary to change my car's transmission fluid at specific intervals?

Most automatic transmissions should have their fluid changed between 60,000 and 100,000 miles, but owners of manual transmission vehicles may want to change it around 30,000 miles. The biggest factor to consider is how the vehicle is driven, such as in mountains at low speeds, for towing, or in stop-and-go traffic, which could raise the transmission fluid's temperature.

According to Michael Crossen, CR's Auto & Tire Technician, "Honda, for example, suggests changing it every 25,000 miles under these conditions." He also says it's a good idea to replace the clutch hydraulic fluid sooner than recommended. "But, if you use the car in a normal duty fashion, I would stick with the Maintenance Minder's schedule," he says.

Q. I am planning to buy a plug-in hybrid (PHEV). If I used it mostly on electric/ battery power would I even need to put gas in the tank?
Yes, you have to keep gas in it. From a practical standpoint, most PHEVs have very short electric-only ranges, so you'll likely need that gas engine at some point. But the main reason is that the hybrid systems aren't designed to operate without gas in the tank.

The internal combustion engine will run from time to time as a maintenance precaution, in order to circulate oil through the engine to lubricate and inhibit unwanted deposits building up on components.

A Toyota spokesperson said that while their system prioritizes electric operation, there are times when the vehicle uses hybrid mode even with a sufficient battery charge. In very cold conditions the system may start the engine to help bring components up to more optimum operating temperatures quickly, which helps the PHEV operate more efficiently.

Q. Why can't I buy an alternative-fuel vehicle at my local dealership?
Some, like the Mazda MX-30 and Toyota Mirai, are available in limited markets, such as some of the 14 states that follow the CARB (California Air Resources Board) emissions standards.

Even if an EV or a fuel-cell vehicle is technically available in your state, some dealers may not choose to take the steps to become authorized to sell them. Other EVs aren't sold in every state because of dealer franchise laws. For example, in Connecticut, home of CR's Auto Test Center, automakers can't sell directly to consumers. This is why you have to order online and drive to a state with a delivery center, in our case, New Jersey or New York, to pick up a Rivian or Lucid.

28

Percent estimate of total reduction in U.S. deaths from 2008–2017 linked to air pollution as a result of higher emissions standards enacted in 2008.

The New Cars That Drivers Love the Most

We asked CR members how they feel about their cars. The survey results offer shoppers important insights.

The models may have changed, but many long-standing trends stayed the same in CR's 2022 owner satisfaction survey. Reliable workaday vehicles still aren't as prized as automotive peacocks that promise luxury, fuel and energy efficiency (gas or electric), or pulse-quickening performance—and actually deliver. Case in point: Our latest survey once again finds that entry-level luxury cars and SUVs are among the least satisfying vehicles to own because they fail to deliver on their luxury promise.

How do we define owner satisfaction? It's measured by the answer to this key question: Given the opportunity, would you buy or lease this vehicle again? (Our detailed methodology is described on page 8.) This year we received responses from owners of more than 300,000 cars, minivans, SUVs, and trucks.

Our findings on the brands and models that offer the highest and lowest owner satisfaction can help you make a successful match with a new car. Read on for trends that surfaced in the survey, along with the brands and models that most satisfy CR members—and the ones that disappoint.

Stand Out—and Deliver

For the second year in a row, the Chevrolet Corvette is the most satisfying vehicle in our survey. It's unabashedly a high-performance sports car that, with its 2020 redesign, could be mistaken for a Ferrari or Lamborghini. Joining it at the top of the list are the iconic Porsche 911 and brawny Dodge Challenger, a modern take on the 1970s muscle car. People buy these cars for their performance and looks, and their high satisfaction scores prove they give their owners just what they want.

But big power isn't a requirement for admittance to the most satisfying car club. The Subaru BRZ and Toyota GR86 sports-car twins and the Mazda MX-5 Miata roadster also make the list of the most satisfying cars, even though they produce one-half to one-third less horsepower than the Corvette, 911, and Challenger. They prove there's more to a fun sports car than just lots of power.

Energy- and fuel-efficient vehicles have always dominated CR's most satisfying lists, and this year three electric vehicles are among the top scorers. The new Rivian R1T pickup truck and Hyundai Ioniq 5 compact SUV tied with another EV, the Polestar 2 hatchback, with 88 percent of owners saying they'd buy them again. All three also stand out with

unique styling, while the Rivian has the distinction of being the first electric pickup truck to come to market.

The Hybrid Edge

Hybrid and plug-in hybrid models in general earn high satisfaction scores. “In this survey nearly every hybrid model outscored its conventional cousin,” says Jake Fisher, senior director of auto testing at CR. “We’ve found that not only do hybrids often save buyers money with fuel economy that’s superior to the conventional versions, they also can deliver an even better driving experience.”

For example, 87 percent of Toyota RAV4 Prime plug-in hybrid owners said they’d buy their car again, placing it on our most satisfying list for the second straight year. Its satisfaction score is 17 points better than the RAV4 Hybrid’s—probably because of the Prime’s generous (for a plug-in hybrid) 42-mile electric-only driving range. And its score is a whopping 27 points ahead of the conventional RAV4’s.

Similarly, 88 percent of Ford Maverick Hybrid owners would buy the fuel-efficient, value-priced compact pickup truck again, compared with 71 percent of owners of the conventional Maverick.

There are two exceptions: The Ford F-150 hybrid and the Lexus ES hybrid are tied with their conventionally powered siblings. In the case of the conventional F-150, owners liked the truck’s power, fuel economy, and towing capacity from the two available turbo six-cylinder engines, while ES owners praised the car’s roominess, reliability, and comfortable ride. Because all versions share these virtues, fuel economy doesn’t tip the scale.

Entry-Level Luxury Still Disappoints

Looking at survey data over the years, we still see that after the honeymoon period with an entry-level luxury vehicle is over, owners quickly come to regret their purchase.

Every luxury automaker, from Audi and Cadillac to Lincoln and Volvo, offers smaller, lower-priced models to appeal to new customers who might not be able to afford or might not need the size of

MOST AND LEAST LOVED BRANDS

These charts represent the brands that most satisfy owners in specific areas: overall comfort, driving enjoyment, cabin storage, ease of use of the infotainment system, and ownership cost. Use them to find out which brands score highly in the qualities you care about the most. Then focus your search on brands that did well—and skip those that did poorly.

We also rank brands by their average “would buy again” score (see “Owner Satisfaction by Brand,” on the next page). The list reflects which automakers have a lineup that pleases owners across the board, those whose models are a mix of satisfaction hits and misses, and the ones with vehicles that consistently disappoint owners. Remember that owner satisfaction reflects whether a car meets a customer’s expectations. The most satisfying cars aren’t necessarily the best on the market, and vice versa.

the brand's midsized and large models.

This year, the Mercedes-Benz GLA and GLB entry-level SUVs are among the lowest-scoring models in the survey. Numerous owners reported that they disliked Mercedes' complex, slow-to-respond, and frustrating-to-use infotainment and navigation systems. They are joined by the Infiniti QX50, the Japanese luxury brand's entry-level SUV.

Despite their luxury badges, these models don't perform any better in our tests than many less expensive, nonluxury SUVs. The entry-level models lack the luxurious ride and agile handling qualities found in the brands' more premium vehicles, and, while their interiors often present well, they don't have the refined details and quality materials to justify their comparatively high prices.

Often, a high-trim version of a nonluxury model performs as well as or better than—and looks as nice as—these entry-level luxury models, and at a lower price.

The only model with a lower score than the unloved GLA, GLB, and QX50 isn't an entry-level luxury car. Only 38 percent of owners said they would buy the Volkswagen Atlas Cross Sport SUV again. But that's not surprising. The Atlas Cross Sport uses the same platform as the three-row Atlas SUV, which also has low owner satisfaction, but the shorter Cross Sport has only two rows of seats, a smaller cargo area, and less headroom in the front and rear.

MOST AND LEAST SATISFYING MODELS IN THEIR CLASS

While a model might not be among the top 10 (or even top 20) most satisfying in our survey, it still may excel in certain ways. We asked owners to rate how well their vehicles satisfy them when considering seat and cabin comfort, driving enjoyment, cabin storage, ease of use of the infotainment system, and ownership cost. Use their feedback and the corresponding scores to identify models that are likely to satisfy in the ways that matter most to you. Visit the model pages at **CR.org/cars** for detailed ratings for all vehicles.

HOW WE RATE SATISFACTION: Results are from the 2022 Annual Auto Surveys, involving more than 300,000 vehicles. Data from the 2020 to 2022 model years (plus a few 2023 models) were used, provided a vehicle wasn't significantly changed over that time. Some ratings might be based on a single model year. The owner satisfaction score is based on the percentage of owners who responded "definitely yes" to the question of whether they would buy the same vehicle if they had it to do all over again (considering price, performance, reliability, comfort, enjoyment, etc.). Ratings and scores for the factors were determined based on the percentage of owners who said they were very satisfied.

COMFORT

Jeep Grand Cherokee owners praised the SUV's great ride, and numerous Genesis GV70 owners noted its comfortable seats. Many Tacoma, GLB, Bolt, and Forte owners criticized their vehicles' seat comfort. Wrangler owners took issue with the noise and harshness of the SUV's ride.

Top Tires at Every Price

From all-season to all-terrain, we tell you which tires are best

IT'S HARD TO overstate how important tires are to safe driving. After all, the contact patch, which is what the part of the tire that touches the road is called, is about the size of an adult's hand. That's all that is connecting the car to the surface you are driving on.

That's why so many consumers in colder climates take the time, make the effort, and spend the money to switch to winter/snow tires to ensure that their vehicles have the best grip possible.

With the inconvenience of swapping tires in mind, some manufacturers have introduced all-weather models designed to perform well in winter conditions and year-round. Some cost more than the average price of the all-season tires they typically replace, but buyers come out ahead by avoiding the cost and hassle of seasonal tire changes.

"The best all-weather tires provide year-round traction that truly combines all-season and winter/snow performance," says Ryan Pszczolkowski, Consumer Reports' tire-program manager. "Despite the added cost, they typically represent a good value."

These do-it-all tires offer unique tread designs and enhanced rubber compounds that increase traction in a broad range of temperatures.

They're different from typical all-season tires mainly because they provide better traction in the snow, as denoted by the same mountain/snowflake symbol on the sidewall that appears on dedicated winter/snow tires.

PHOTOS: JOHN POWERS/CONSUMER REPORTS

4.

1. ALL-SEASON

A general-purpose tire and the most common type for cars and SUVs.

PROS Good all-around performance, low cost, long tread life.

CONS They may lack the traction of more specialized tire types.

2. ULTRA-HIGH-PERFORMANCE ALL-SEASON

Convenient for year-round use on sporty cars and SUVs

PROS Excellent braking and handling.

CONS Pricey, limited treadwear, compromised winter grip.

3. ALL-TERRAIN

Built for on- and off-pavement adventures.

PROS Designed to look and be tough; good at clawing through dirt, rocks, and snow.

CONS Can be noisy.

4. WINTER/SNOW

These provide optimum grip in winter weather.

PROS Great braking and traction on ice and snow.

CONS Need to change seasonally, rapid wear, relatively long wet and dry braking distances.

MONEY-SAVING TIPS

Buying replacement tires can be an expensive, confusing experience. You could easily spend $800 or more by the time you add up the cost of four tires plus additional charges for mounting and balancing. And the numerous brands, various categories, and wide range of prices can lead some consumers to rely on a salesperson's recommendation, which isn't always the best way to get a great tire for a great price.

"There are many performance and price factors to consider when shopping for a replacement tire," says Pszczolkowski.

The cost for the replacement tires depends heavily on what type of vehicle they're for. Our most recent member survey found that respondents paid an estimated price of $167 per tire. At $36, car dealerships charged the most for installation per tire, and at $14, Sam's Club charged the least.

- **Buy a full set.** In the survey, 85 percent of the more than 15,000 respondents bought a full set of tires rather than just one or two. Replacing all of the tires at the same time ensures an even grip on all four corners of the car and may also entitle you to a manufacturer's rebate. Discounts are often about $100 off per set, and they can be found by going to a tire company's website.
- **Look for perks.** This is how many tire retailers distinguish themselves. About 80 percent of CR members reported that they received at least one perk when buying tires or having them installed. The most common ones reported were tire balancing, lifetime tire rotation, and tire mounting at no charge. Tire rotation may be among the best one, because it needs to be done about every 5,000 to 7,500 miles and costs about $50 each time.
- **Haggling can work.** Among those who tried negotiating tire prices, 70 percent said they were successful at getting a deal, with a median savings of $96 per set of four tires.
- **Don't wait.** Plan your tire purchase at least a month out, when the tread depth is still 4⁄32 of an inch. This will give you time to find and buy the right tires for your needs and wait for a sale or rebate.

SLIPPERY WHEN WET
CR's expert drivers evaluate tires for wet handling at our Auto Test Center.

KEEP YOUR TIRES IN TIP-TOP SHAPE

Longer-lasting tires make safety checks more critical than ever. Many tires can last 50,000 miles or more before they wear out, although heat, potholes, and underinflation can weaken them.

- **Check the air pressure each month when the tires are cold.** If they need air, inflate them to the air pressure listed on the placard on the doorjamb or in the owner's manual. Don't use the pressure indicated on the sidewall; that's the maximum amount the tire can hold.
- **Look for cracks, cuts, or bulges in the sidewall or tread.** If found, replace those tires as soon as possible.
- **Check for uneven treadwear,** which typically denotes poor wheel alignment, over or underinflation, and/or worn suspension components. If found, have the tires and suspension checked by a repair shop.
- **Stay within the vehicle's weight capacity** listed on the doorjamb placard. Overloading will overheat the tires, increasing the chance of a failure.
- **Measure tread depth with a quarter.** If the top of George Washington's head is just visible when the coin is placed upside down in a tread groove, the tread has about a 4/32-inch depth. You'll still have some all-weather grip, but plan to replace the tires soon.

BEST TIRE-BUYING STRATEGIES

When you're buying a new or used car, it's important to consider what type of tires come with it—and their expected performance.

- **Make sure your car comes with the right type of tire for your needs.** For example, some vehicles sold in the snow belt may come with summer tires, though they may have a more practical all-season tire option. Such tires will be marked with "M+S," which indicates they have a tread designed to handle mud and snow. For harsh winter weather, consider tires that have a mountain and snowflake symbol on the sidewall, which means they meet an industry standard for snow traction.
- **Tires that are part of a luxury or sports package may be higher-performance ones.** These are usually more expensive to replace and can wear out faster. Tires on large wheels with short sidewalls can also be expensive to replace and give a firm ride. Plus, they can be more prone to damage.
- **Research the full cost of buying replacing tires.** It can take nothing more than a few clicks to research, order, and pay for new tires. But a low online price may not include shipping, and you'll still have to pay to mount and balance the new tires, and dispose of your old ones. Make sure to factor that in when comparing online prices with a local tire retailer—who may include those services.

For more help with choosing the best tire for your needs, use our exclusive Tire Selector at **CR.org/tires.**

› Digital and All Access members can find the latest, complete ratings at CR.org/tires. Find the right tires for your car, SUV, or truck.

HOW WE TEST: Overall Score is based on about a dozen tests, with braking, handling, and hydroplaning resistance more heavily weighted for many tires. **Price** is what we paid for the tire in the specific tested size. **Braking** tests on ice are from 10 mph; on dry and wet pavement, from 60 mph. **Handling** combines how well a tire performed in the wet-handling test, steering feel, and an emergency handling maneuver. **Hydroplaning resistance** denotes a tire's ability to resist skimming along the surface of standing water. **Snow traction** tests denote how far a vehicle has to travel to accelerate from 5 to 20 mph on flat, packed snow. **Ride** and **noise** are evaluated subjectively on rough and smooth roads. **Rolling resistance**, as measured by a dynamometer, is a factor in fuel economy. **Tested tread life** indicates wear potential based on our 16,000-mile vehicle driving test.

---

[1] All-weather tires, which provide increased snow traction compared to all-season tires.

How To Get Money Back On an EV Purchase

The rules have changed, but CR can help you make the right decision.

To find out if a car is made in North America, you can simply look at its window sticker. Even some vehicles that come from European and Asian brands have their final assembly in the U.S., and may qualify for a tax credit. For instance, Volvo Cars is a Swedish brand owned by Chinese automaker Geely Holding, but the Volvo S60 Recharge PHEV qualifies because it is assembled in South Carolina.

Buyers can tell if a vehicle qualifies as a station wagon or an SUV based on the EPA classification that's already printed on its window sticker. These classifications may differ from how a vehicle is marketed. For example, Hyundai calls the Ioniq 5 "an electric SUV," but the EPA classifies it as a large car.

PHEVs with a battery of at least 7 kWh may also qualify for a tax credit as long as they meet all of the other requirements.

Regardless of whether a car qualifies for federal tax credits, many EVs and some PHEVs are eligible for state and local incentives that range from hundreds to thousands of dollars. For example, buyers in Massachusetts might be able to get $3,500 toward certain EVs, while a utility company in Pasadena, Calif., will give EV buyers or lessors a $500 credit as long as it was purchased or leased at a local dealership. Credits and rebates may also be able to help you defray the cost of installing a home EV charger. You can find out more at CR's EV incentive finder, at consumerreports.org/evsavings.

Whatever you do, don't buy an unreliable electric car just because it is available and qualifies for a tax credit. A CR Recommended EV is likely to be more reliable than other models. These include the BMW i4, Genesis GV60, Hyundai Ioniq 5, Kia EV6, Nissan Leaf, and Tesla Model 3. Of these, only the Tennessee-built Leaf and California-built Model 3 currently qualify for tax credits, and even then only if their MSRP is below $55,000.

GET A CHARGER FOR LESS

With input from EV owners, CR evaluated popular home chargers priced from $300 to $700. Our favorites performed similarly, but features set them apart. Remember that:

- Higher amperage means a faster charge. A 40 amp charger can add about 30 miles of range per hour; a 32 amp one can add 20.
- Some "smart" chargers cost more up front but are eligible for rebates from utility companies.
- Installation ranges from $518 to $1,273, on average, according to HomeAdvisor, but may cost a lot more.

BEST CHARGERS TO BUY

JuiceBox 40
PRICE $679
CORD LENGTH 25 feet
CHARGING Up to 40 amps
FEATURES Smart connectivity

ChargePoint Home Flex
PRICE $749
CORD LENGTH 23 feet
CHARGING Up to 50 amps
FEATURES Smart connectivity, compact design

Blink HQ 150
PRICE $400
CORD LENGTH 25 feet
CHARGING Up to 32 amps
FEATURES Low price, simplicity

Grizzl-E Classic
PRICE $395
CORD LENGTH 24 feet
CHARGING Up to 40 amps
FEATURES Rugged design, low price.

Look Into Leasing

If the car you're interested in isn't eligible, or if you're over the income limit, you have another option available to you: leasing. A Treasury Department spokesperson told CR that most traditional leases would qualify for a $7,500 commercial credit that isn't subject to the restrictions on purchased vehicles. In the case of a lease, the dealer receives the commercial credit, not the lessor, and it would be up to the dealer to pass those savings on to the consumer. One form the discount could take is what's called a "capitalized cost reduction"—a discount on the price of the car that would then lower your monthly payment, down payment, or both.

That way, drivers could indirectly benefit from a tax credit on a car made outside North America, such as the popular Hyundai Ioniq 5. High-income consumers and those who lease a high-cost EV such as a Lucid Air or Tesla Model S or X, would also be able to enjoy the $7,500 credit, as long as the dealer passed those savings along.

Before you make any payments or sign any paperwork, make sure to ask for an itemized bill of sale that shows where the dealership has applied the tax credit, and how those savings will be passed on to you, says Gabe Shenhar, associate director of CR's auto test center. "Make sure the dealership doesn't mark up the price of the car accordingly," he warns consumers.

Credits for More Models

Automakers, EV advocates, and car shoppers alike have told Consumer Reports they're concerned that uncertainty around leasing, battery, and critical mineral requirements may make it difficult for consumers to find a vehicle that qualifies for the credits or understand how much they'll be eligible to claim.

Chris Harto, CR's senior policy analyst for transportation and energy, says that the provisions in the bill will create a lot of confusion for consumers over the short term—especially in the first part of 2023, as regulations are still being finalized. However, he says the credit is a "massively positive" benefit for EV adoption as a whole.

"Over the longer term automakers will adjust, bring their EV and battery manufacturing supply chains to North America, and ensure that American tax dollars are going to support American jobs," he says. For example, Volkswagen already moved production of the ID.4 from Europe to the U.S., and Hyundai is building an EV and battery factory in the U.S. This means that more new vehicles may be eligible for tax credits in the future, even if they aren't today.

Tax credits may also take some of the sting out of the cost of EVs, which can cost more than their gas-powered counterparts up front. A 2022 CR nationally representative survey of 8,027 U.S. adults found that more than half of Americans would be more likely to purchase an EV if tax rebates and/or discounts at the time of purchase brought down the price. Already, tax credits make some trim levels of the Tesla Model 3 cheaper to purchase than a comparable BMW 3 Series.

PHOTOS: JOHN POWERS/CONSUMER REPORTS

WHICH VEHICLES QUALIFY?

The IRS has compiled a list of EVs and PHEVs.

The IRS says the manufacturers of the following EVs and PHEVs indicated that, as of February 2023, they are eligible for a tax credit up to $7,500 depending on battery size, provided other requirements are met, such as buyer income and MSRP. This list changes frequently, so be sure to check **CR.org/evcredits** and irs.gov to see if the car you're looking for has been added or removed. The total amount of the tax credit will depend on where an individual vehicle's battery and electronic components were sourced from.

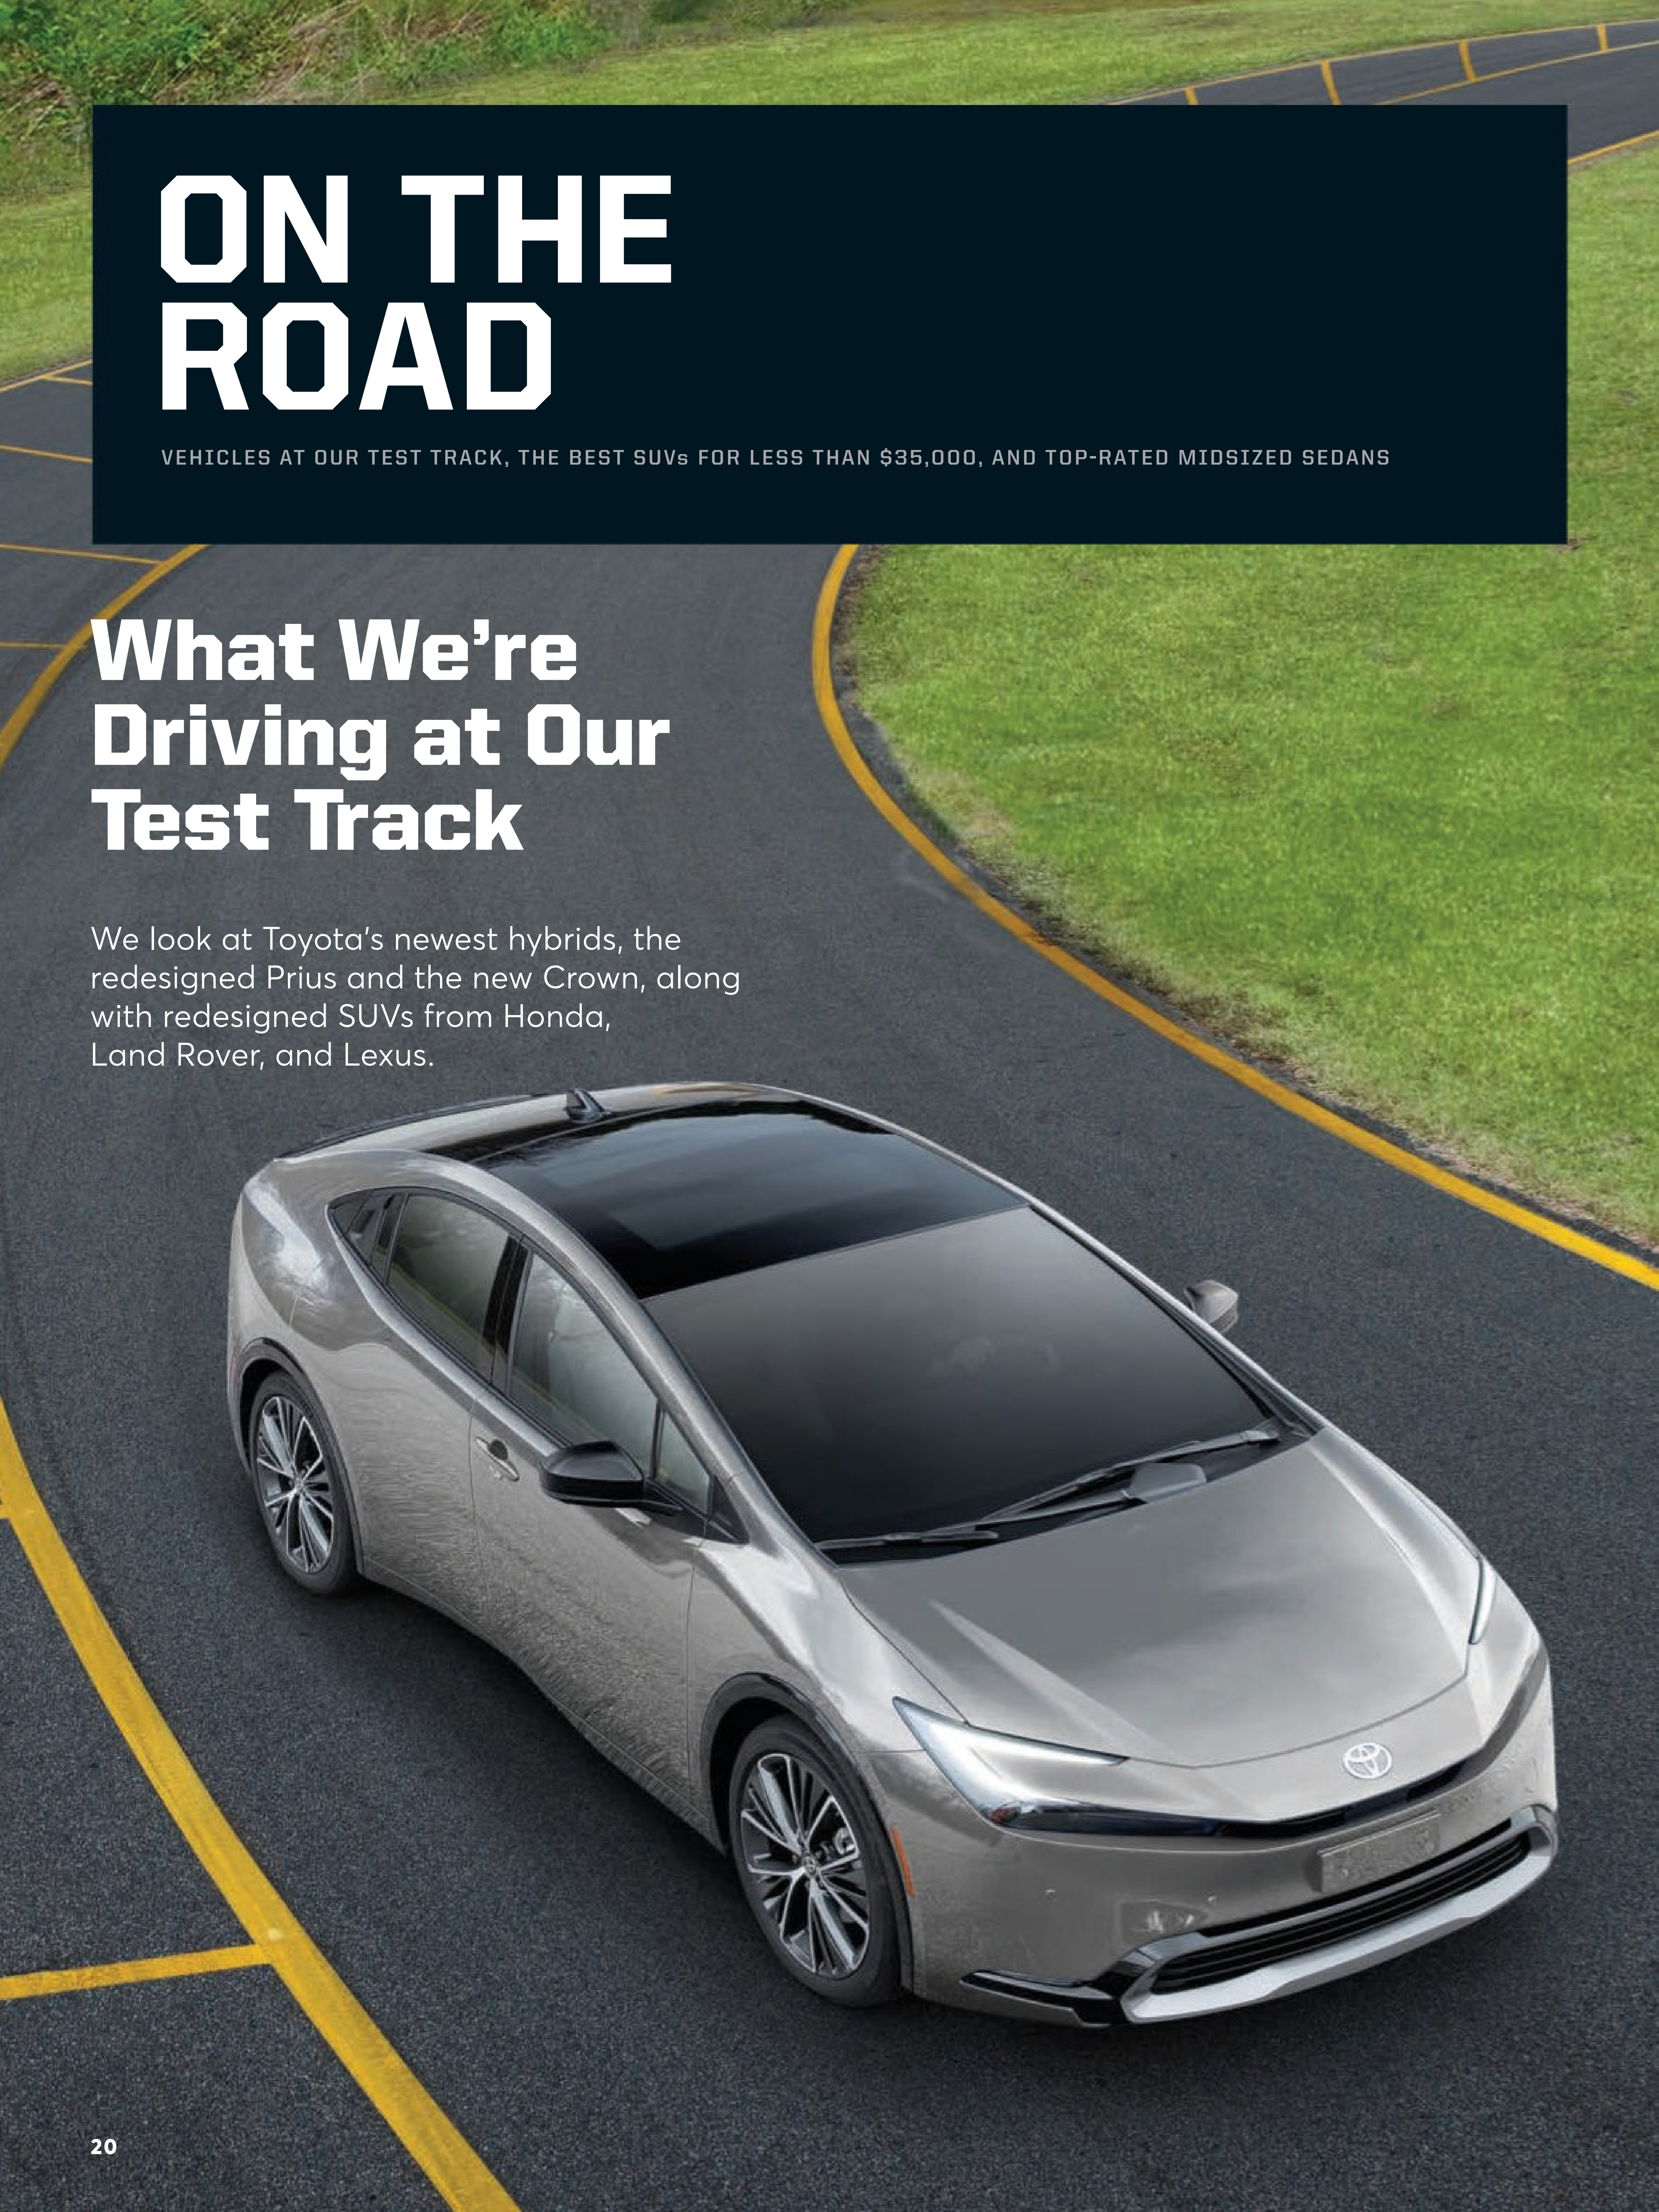
ON THE ROAD

VEHICLES AT OUR TEST TRACK, THE BEST SUVs FOR LESS THAN $35,000, AND TOP-RATED MIDSIZED SEDANS

What We're Driving at Our Test Track

We look at Toyota's newest hybrids, the redesigned Prius and the new Crown, along with redesigned SUVs from Honda, Land Rover, and Lexus.



Toyota

PRIUS

Toyota made a better car, but a worse Prius

What We Rented

MODEL Limited

PRICE $38,595

ENGINE 196-hp, 2.0-liter four-cylinder + electric drive

TRANSMISSION electronic continuously variable transmission

DRIVE WHEELS All

FOR MULTIPLE GENERATIONS THE Prius made two promises—practical transportation and impressive fuel efficiency—and solidly delivered on both.

That seems to have shifted for 2023. Toyota gave the Prius a smaller and lighter lithium-ion battery, an upgraded electric motor, and up to 75 more horsepower overall—updates that chip away at criticisms that the Prius was slow and dowdy. But after our time spent in a well-equipped Limited all-wheel-drive model we rented from Toyota, we fear this focus on performance, coupled with a design-led loss of cabin space, took away from some of the Prius' best attributes.

We'll get a better sense of what long-held Prius charms remain when we buy our own XLE trim. Until then, these insights from our test team are based on the one we rented.

What We Like

We're glad the Prius bucks the trend of using flat, touch-sensitive controls. Almost all important functions have dedicated buttons, and they're differentiable by touch. After just a few hours in the car, our test drivers found it easy to operate them without taking their eyes off the road.

The exceptions include the monostable gear selector and the controls for the Prius' advanced driver assistance systems. Although it's easy to set adaptive cruise control with steering wheel controls, adjusting other systems requires a trip into the tiny screen where the speedometer is located.

Our test drivers came away genuinely impressed with how well the new Prius handles. Steering response is decent and a low center of gravity gives it a planted feeling in corners. It outperforms a lot of less-efficient vehicles, and is definitely the best-handling Prius yet.

The suspension absorbs bumps well, smoothing out rough roads nicely. That's notable for a relatively lightweight vehicle shod with large 19-inch wheels and tires.

You wouldn't necessarily know that this car combines a gas engine and an electric motor. It's free of nearly every hybrid-related quirk and transitions seamlessly between gas and electric power.

What We Don't Like

Put your foot down on the throttle a little to pass, merge, or climb a hill and the otherwise quiet Prius will suddenly respond with a raspy groan as

the gas engine revs up. Keep your foot on the gas and the noise remains even after the car is up to speed—an artifact of how the Prius' e-CVT is tuned.

When compared with the last Prius, the new styling has trimmed nearly two cubic feet of passenger volume and between 4.3 and 7.1 cubic feet of cargo space behind the seats, depending on how you equip it. It's enough of a difference that Prius buyers should check out the cheaper Corolla Hybrid or larger RAV4 Hybrid.

Even with the split rear window gone, visibility hasn't been improved, and the lack of a rear wiper means snow and muck can accumulate on the rear glass. The windshield pillars are too far forward and can block the driver's field of view. The surround-view camera may be a must-have option.

Some drivers noted that the brakes feel too quick to grab at parking lot speeds.

CR's Take

While it's quicker, sleeker, and more engaging to drive, the new Prius has less interior space and headroom, reducing practicality. On top of that, the engine noise is so jarring that it cancels out much of the car's newfound refinement.

Honda

PILOT

The three-row SUV makes big strides with its redesign

What We Bought

MODEL Touring

PRICE $50,240

ENGINE 285-hp, 3.5-liter V6

TRANSMISSION 10-speed automatic

DRIVE WHEELS All

HONDA HAS BEEN working hard to keep its lineup competitive, with the 2023 Pilot serving as the brand's fifth redesigned model in the past two years.

This Pilot is the largest, most powerful SUV in Honda's history, with an all-new dual-overhead-cam V6 engine paired with a 10-speed automatic. It's available in seven- or eight-passenger seating configurations.

Much of what made past Pilots a good choice for families remains. The interior is roomy, third-row access is still easy, and there's generous passenger and cargo room.

We purchased a Touring for our test program, and have gotten a first-look at how it matches up against other midsized three-row SUVs.

What We Like

Honda's V6 is more powerful than its predecessor, and it's very smooth and refined. There's plenty of power down low for quick starts, and it generates ample thrust throughout its powerband. The automatic's upshifts are seamless and without any impact or delay. Downshifts are equally prompt, although the driver may occasionally feel a bump during a gear change.

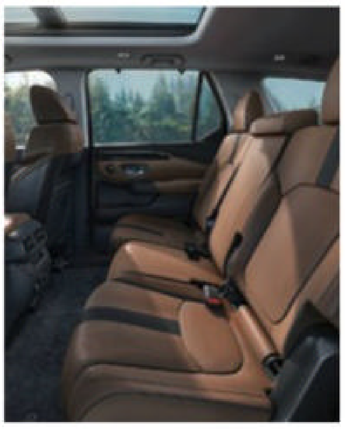
Despite its slicker, more stylish look, the Pilot has a lot more usable space than the previous generation. The driving position offers plenty of leg, knee, and foot room along with generous headroom. In the second row there is ample capacity for adult passengers, and the doors open wide, making it a snap to climb inside. Folding down the second- and third-row seats results in a big, boxy area to carry long, wide items.

In the eight-passenger Touring and Elite trims the middle position in the second row bench seat can be removed and stored beneath the rear cargo floor. This means you can have a two-seat space, but quickly add another seating position if the need arises.

We're impressed with the Pilot's composed ride and—in everyday driving—responsive handling. The suspension easily smoothed out and absorbed most bumps at city and highway speeds, and around town there's little body roll when making turns or navigating roundabouts, for example.

We like that physical buttons and knobs are used for the climate controls, with the knobs having a very precise feel and engaging with a satisfying click.

Honda's one-button system to move the second-row seat forward for third-row access is slick, smoothly tilting the seatback and sliding the assembly forward. The button is backlit at night, making it easy to find.



What We Don't Like

While the Pilot is well-behaved around town, we found that on winding roads the vague, overly light steering and noticeable body roll make the driver and passengers aware of the SUV's bulk, and it feels like it's lumbering through turns.

Honda was one of the first automakers to switch to using buttons and levers to electronically shift between Park, Reverse, Neutral, and Drive. It still takes some attention and eyes-down time to quickly choose between Drive and Reverse, such as when making a K-turn or backing in or out of a parking space

CR's Take

Thanks to its smooth and powerful V6, well-tuned 10-speed automatic, improved everyday handling, and updates that addressed the woefully slow-responding infotainment system, the Pilot has leapfrogged the Toyota Highlander and is now on a par with the Hyundai Palisade and Kia Telluride in the midsized SUV class.

Land Rover

RANGE ROVER SPORT

The performance-oriented SUV settles into its niche

What We Bought

MODEL SE P360

PRICE $92,170

ENGINE 355-hp, 3.0-liter turbo & supercharged mild-hybrid 6-cyl.

TRANSMISSION 8-speed automatic

DRIVE WHEELS All

THE REDESIGNED SPORT mid-sized SUV follows the trail blazed by the larger, also-redesigned Range Rover. The new Sport offers a variety of powertrains, along with premium amenities and a new infotainment system.

We're happy to report that Land Rover addressed a number of the last-generation's flaws, and significantly upgraded the interior.

The P360 version we bought to test has a 355-hp, 3.0-liter engine that includes a mild-hybrid setup. There's a 395-hp P400 available, as well as a plug-in hybrid version.

Here are our initial findings as the Range Rover Sport enters our test program.

What We Like

The inline-six engine is smooth, sounds great, and has good grunt for two-lane passing zones, in spite of the fact that the Range Rover Sport is a hefty vehicle to move on down the road. Upshifts from the eight-speed automatic come with a buttery precision and downshifts are seamless.

Land Rover improved the ride, giving the Sport a firm yet absorbent quality that allows it to gobble up most bumps with ease, even with our test model's huge 22-inch tires. The standard air suspension with adaptive shocks certainly helps.

This big, heavy SUV "drives smaller" than it is, thanks in part to well-controlled body roll through corners. It displays an eagerness to dive into turns, and the air suspension helps to keep the body composed, even over crests and undulations in the road. Grip is also impressive—it takes quite a bit of cornering force before the tires start to squeal in protest. The only negative is the lack of steering feedback about road texture and tire grip.

So far, most of our drivers have been quite happy with the front-seat comfort. We appreciate that the seatback side bolsters are large enough to hold you in place when driving through corners, yet the cushions are plush. There's good rear-seat headroom and plenty of foot space.

Range Rover's traditional elevated and upright driving position delivers great visibility out over the hood. There's tons of headroom, a clear view of the driver's instrument panel, and zero right-knee intrusion from the center console.

What We Don't Like

As with some other Land Rovers, the Sport is saddled with mostly unintuitive controls that require some initial deciphering to understand how to accomplish even simple tasks. For instance, it's beyond silly that you're forced to wade into the infotainment touchscreen to adjust the lumbar support in the front seats. The climate-control knobs are used to adjust temperature, fan speed, and seat-heating and cooling. This forces the driver to pay extra attention before making any adjustments.

The infotainment screen isn't very well-organized, with a labyrinthine-like menu structure. At least the touchscreen quickly responds to inputs and has clear text. The steering wheel controls and driver's instrument cluster are clunky to navigate in and around the various menus.

The wireless device charger resembles a mail slot, hidden beneath the center touchscreen. While a neat idea, it's difficult to get your hand in the space to remove your phone.

CR's Take

This Sport is a major upgrade, with a more appropriate performance-to-luxury quotient. Unfortunately the controls remain frustrating to use.

PHOTOS, OPPOSITE PAGE: HONDA. PHOTOS THIS PAGE: JOHN POWERS/CONSUMER REPORTS; LAND ROVER

Lexus

RX350

More luxurious than before, but the powertrains lack refinement

What We Bought

MODEL 350/350h

PRICE $55,595/$59,955

ENGINE 275-hp, 2.4-liter turbo 4-cyl./246-hp, 2.5-liter 4-cyl. hybrid

TRANSMISSION 8-speed automatic/eCVT

DRIVE WHEELS All

WITH ITS REDESIGNED RX, Lexus has made the SUV lighter than the outgoing model, given it sleeker styling, and offers a variety of four-cylinder engines, all of which are either turbocharged and/or hybridized. Yes, the V6 engine is no longer available.

It's a big redesign because this SUV has been known for refined luxury motoring and a stout reliability record, not driving engagement.

To see how the changes have affected the RX, we bought two versions to test. These are our initial findings as we put them through the early stages of our test program.

What We Like

Drivers were quick to praise the front seats, which combine firm, comfortable cushions with large side bolsters for both the seatback and bottom. They form a snug "pocket" to hold you in place.

The elevated seats, along with the low dashboard and instrument-cluster shroud, give a good view out over the hood.

Whether you get the standard 19-inch tires or the optional 21-inch ones, the ride is comfortable and ensures smooth sailing.

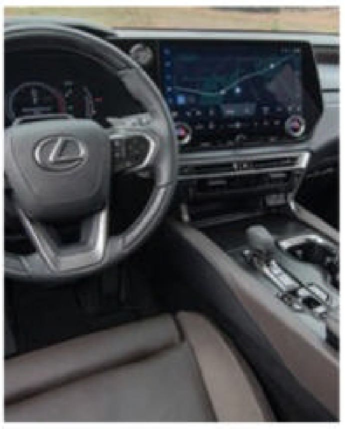
Rear-seat leg support is benefited by the slightly elevated seat and the bottom cushion's rearward rake, and there's good foot space under the front seats. The seatback can recline pretty far, which aids passenger comfort on longer drives.

Both RXs have Lexus' typical high level of materials and strong build quality. We appreciate the soft leather throughout the cabin, the exposed stitching, the fully padded upper- and mid-dash areas, and that the bin underneath the center armrest is fully lined.

Neither the turbo nor the hybrid engine is a standout, and both lack the smoothness of the old V6. Still, the hybrid's electric motors work with the gas engine at low speeds to provide power without making the engine work harder—and use fuel. The electric drive does a good job keeping engine revs low around town, though any quick acceleration unleashes a raspy roar. The turbo engine delivers decent power for cruising, though it also sounds gritty at times.

What We Don't Like

Both of our RXs come with the larger 14-inch touchscreen, which is the hub for almost every audio, climate, phone, and navigation feature. But some relatively simple tasks require multiple steps to complete. At least there are hard controls for some functions.



It's the unlabeled steering wheel controls—part of the optional head-up display—that are most frustrating. Drivers can customize the buttons' task, such as configuring one to control the climate system temperature. But it isn't readily obvious what each button does, as their functionality only appears in the HUD or the instrument cluster. Plus they are touch-capacitive and require an initial touch to activate them. So advancing a single station preset, for example, requires two presses.

The Lexus E-Latch electronic door system has a momentary pause between hitting the button on the backside of the exterior handle and the door opening. While the inside electronic button is easy to use if you know to look for it, you'll have to coach every new passenger on how to get out.

CR's Take

While one of the most comfortable luxury midsized SUVs, the RX's engines aren't as refined as the previous V6, and some controls are still annoying.

Toyota

CROWN

While the powertrain delights, some details don't impress

What We Rented

MODEL Platinum

PRICE $53,445

ENGINE 340-hp, 2.4-liter turbo four-cylinder w/dual electric motors

TRANSMISSION Six-speed automatic

DRIVE WHEELS All

TOYOTA REPLACED ITS Avalon large sedan with the Crown, an extroverted model that aims to bridge the gap between traditional sedans and SUVs. Its ground clearance is similar to a sedan, but the seats are slightly elevated in comparison.

The Crown is offered strictly as an all-wheel-drive hybrid. The XLE and Limited trims come with a thrifty 236-hp, 2.5-liter four-cylinder hybrid that is EPA-rated for up to 41 mpg combined, while the Platinum's 340-hp, 2.4-liter turbo four-cylinder hybrid powertrain is rated at 30 mpg combined.

This preview is based on a Platinum trim we rented from Toyota, ahead of our purchasing a 2.5-liter model to test.

What We Like

The turbo powertrain boasts 104 more horsepower than the non-turbo in the XLE and Limited, helping the car zip from 0-60 mph in a claimed 5.7 seconds. The engine works well with the smooth-shifting six-speed automatic.

Of the six selectable drive modes, we didn't see a significant difference between Comfort and Normal. However, going to Sport S put urgency into the car's performance, making it more responsive and entertaining. Sport S+ firms up the steering response and reduces body roll via the adaptive suspension on the Platinum.

The front seats are among the Crown's virtues. Our drivers found them to be quite comfortable, with significant side bolsters to hug the driver and front passenger, yet the seats are large enough to accommodate wider occupants. The thick foam feels soft and welcoming and they look stylish and upscale, with perforated leather and tasteful piping.

It's refreshing to see the straightforward climate controls within easy reach under the infotainment screen. These include heated and ventilated seats, which in many cars can be tucked away to some place that is harder to see.

There's decent in-cabin storage, starting with the Qi charger phone bin and the little storage pod next to it, plus two regular cup holders. The roomy center armrest console is easily accessed by the driver or passenger.

The Crown's brakes are well-sorted and easy to use, without the grabby feeling associated with many hybrids. The pedal feels just like you would expect in any non-hybrid sedan.

What We Don't Like

Given the car's "tweener" mission and shape, it would be natural to expect a hatchback. But instead the Crown has a short decklid that opens to a large, deep trunk. Releasing the lid just unlocks it; the trunk doesn't pop open. Again, from a versatility standpoint, it would be helpful if it sprang fully open and even powered shut. The lack of a hatch detracts from its position as an SUV alternative. The dimensions may prove a bit challenging for some cargo, as the opening isn't tall, and the space is so deep that groceries, for example, could slide away.

The interior doesn't live up to the $53,000 price tag on our rented Platinum. There are few padded surfaces, and the shroud over the instrument panel is very hard plastic. Plus, the shiny black plastic surround for the center screen reflects light and looks cheap.

CR's Take

There is much to like about the Crown, especially its turbo/hybrid powertrain. But the trunk's shape makes it a challenge to use that big cargo area, and the curved roof compromises rear-seat access and passenger space.

Subaru

FORESTER ✓

VITAL STATS

87 OVERALL SCORE

90 ROAD TEST

$29,431 PRICE AS TESTED

TRIM LINE
Premium

28 MPG

DRIVETRAIN
182-hp, 2.5-liter 4-cyl.; continuously variable transmission; all-wheel drive

REASONS TO BUY

- Fuel economy
- Great visibility all around
- Roomy interior and cargo area
- Easy-to-use controls
- Comfortable ride

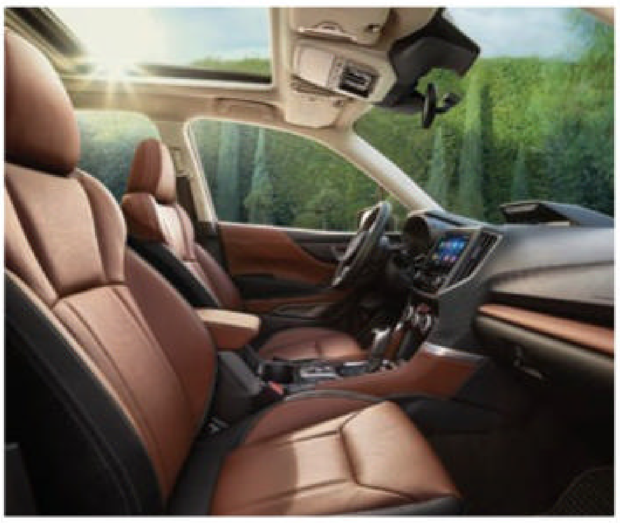
REASONS TO SKIP

- Engine can get noisy
- Have to pay extra for BSW and RCTW

BEST VERSION TO GET

The Premium trim is a good place to start because it comes with a power driver's seat, a sunroof, and the All-Weather package, which brings heated front seats. We'd also get the optional BSW and RCTW.

PHOTOS, THIS SPREAD: SUBARU.



THE FORESTER IS a smart, well-executed SUV with a roomy interior, great fuel economy, and a comfortable ride, and easy-to-use controls.

While the 2.5-liter engine can only jog the SUV from 0 to 60 mph in 9.2 seconds, the Forester's power delivery is prompt, linear, and free of the lag that plagues some competitors. The continuously variable transmission (CVT) is more refined and less obtrusive than many competitors, but drivers still hear a pronounced engine buzz under acceleration.

Fuel economy is impressive at 28 mpg overall, which is among the best for a non-hybrid compact SUV.

We found the Forester adept at absorbing road imperfections, and it's one of the more comfortable-riding SUVs in the category. And yet it benefits from responsive handling with limited body roll and quick steering when rounding corners.

The spacious interior has plenty of headroom and the best visibility of any SUV, giving drivers a commanding view of the road ahead. Most versions come with a power driver's seat that's comfortable and supportive.

The controls are simple to reach and use. The infotainment system is intuitive to use and responds quickly to inputs.

On the utility front, the split rear seats fold nearly flat. Opening the power liftgate exposes a wide, square-shaped space that can swallow a fair amount of bulky items. There's even enough room with the rear seat folded down to fit a bicycle with both wheels on.

The Subaru falters only when it comes to interior refinement. Despite the addition of soft-touch surfaces and nicer buttons and switches, some plastic trim still looks and feels cheap.

AEB with pedestrian detection, AEB highway, LDW, and LKA are standard, but BSW and RCTW aren't available on the base trim and are just optional on the Premium, and standard on Sport and above.

Safety Term Glossary: AEB automatic emergency braking; **BSW** blind spot warning; **LDW** lane departure warning; **LKA** lane keeping assistance; **RCTW** rear cross traffic warning.

Honda

CR-V ✓

VITAL STATS

84	88	$34,250
OVERALL SCORE	**ROAD TEST**	**PRICE AS TESTED**

TRIM LINE		**DRIVETRAIN**
EX AWD	26 MPG	190-hp, 1.5-liter turbo 4-cyl.; continuously variable transmission; all-wheel drive

REASONS TO BUY	**REASONS TO SKIP**
■ Generous interior room	■ The SUV feels underpowered
■ Short braking distances	
■ Clear, straightforward controls	
■ Easy to get in and out of	

BEST VERSION TO GET

The EX is very well equipped for the price, with a full complement of safety gear, a power driver's seat, and a moonroof. The EX-L, which is $2,600 more, includes leather seats, a power tailgate, and a larger infotainment screen.

HONDA'S EVOLUTIONARY REDESIGN of the CR-V retains this popular compact SUV's focus on functionality. We like that ride comfort has been improved and the controls are easier to use, but fuel economy and acceleration have gotten worse, in part because the CR-V is now larger and heavier.

The turbo four-cylinder delivers unobtrusive propulsion when cruising around town, and the CVT does a nice job keeping the engine revs low in those situations. However, if you need extra acceleration for climbing a hill or merging onto the highway, the transmission tends to allow the revs to soar quite high, and the engine takes on a gritty character above 4,500 rpm. We got 26 mpg overall, 2 mpg worse than the last CR-V we tested. There is also a hybrid version that combines a 2.0-liter engine with an electric drive.

The ride is on the firm side, although the taut suspension keeps things composed when the road gets rough. We liked the SUV's responsive steering and well-controlled body roll, which make it feel capable and secure through curves.

Most of our drivers appreciated the front seats' ample contouring and good support, although some found the seat to be too narrow. All agreed that the rear seat is roomy and comfortable, a hallmark of the CR-V. The Honda's boxy shape and large windows make for airy outward views and a generously sized cargo area.

Like in the Honda Civic, the honeycomb-pattern dash vents spruce up what is otherwise a rather plain cabin, though the materials feel sturdy and well made. We found that most controls in the EX trim we tested are easy to use, thanks to physical dials, buttons, and knobs for the 7-inch infotainment system. The 9-inch infotainment screen in the EX-L and Sport Touring trims lacks a tuning knob.

AEB with pedestrian detection, BSW, RCTW, LDW, LKA, and lane centering assistance all come standard.

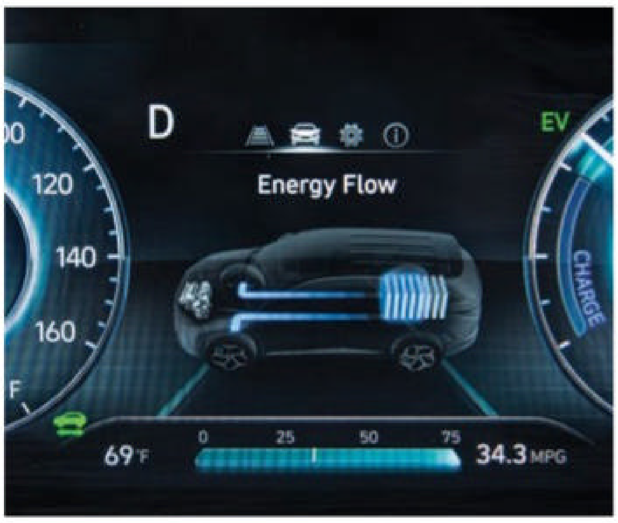
- Easy-to-use controls
- Fuel economy

REASONS TO SKIP
- Unintuitive push-button gear selector

BEST VERSION TO GET

We suggest going with the SEL Convenience trim, which has a power liftgate, dual-zone automatic climate control, and a sunroof. The Hybrid Blue trim is less expensive, but it has a smaller center screen and lacks built-in navigation.

PHOTOS: HYUNDAI



P
R
N
D
AUTO HOLD

THIS TUCSON IS one of the best small SUVs due to its comfortable ride, sharp handling, relatively quiet cabin, and roomy interior.

While the Tucson is available with both conventional and hybrid powertrains, the hybrid is the best version—and there's no argument. Not only is it quicker and quieter than the gas-only version, the hybrid got 35 mpg overall. It can also be driven solely on electric power at low speeds, typically up to 35 mph on light throttle.

Out on the road, we appreciated the Tucson's accurate, well-weighted steering and responsive, nimble handling. It's one of the better-riding compact SUVs, thanks to its firm, composed ride, and the suspension does a good job absorbing most bumps.

The interior is particularly well done, with quality materials, mostly simple controls, plenty of padded areas, and a slick, upscale appearance for the class. The 8-inch infotainment touchscreen has large, simple-to-decipher icons.

While most of the gasoline-only versions come with a conventional, easy-to-operate gear selector, all hybrids get a less intuitive push-button setup.

The driving position provides a commanding view out along with plenty of headroom and well-placed armrests, but the plastic center console intrudes on the driver's right knee space.

The front seats are flat and firm but the ability to tilt the front edge of the bottom cushion improves under-leg support. Heated seats are standard on all hybrids. The rear seat is one of the roomiest in the class, with lots of head- and kneeroom, and plenty of foot space under the front seats. The cargo area is generous despite swoopy exterior styling.

Standard active safety and driver assistance features include AEB with pedestrian detection, AEB highway, BSW, RCTW, LDW, LKA, and adaptive cruise control.

Safety Term Glossary: AEB automatic emergency braking; **BSW** blind spot warning; **LDW** lane departure warning; **LKA** lane keeping assistance; **RCTW** rear cross traffic warning.

Nissan

ROGUE ✓

VITAL STATS

81	81	$34,905
OVERALL SCORE	**ROAD TEST**	**PRICE AS TESTED**
TRIM LINE SV	25 MPG	**DRIVETRAIN** 201-hp, 1.5-liter turbo 3-cyl.; continuously variable transmission; all-wheel drive

REASONS TO BUY

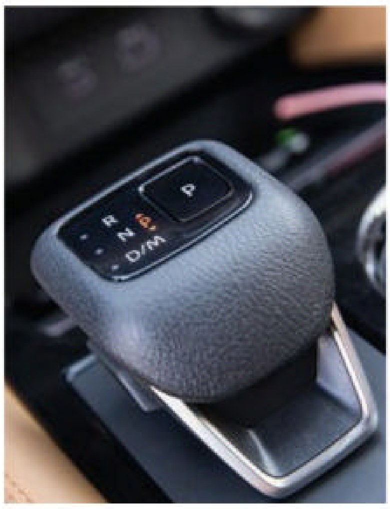
- Agile handling
- Composed and comfortable ride
- Easy to get in and out of
- Clear, straightforward controls

REASONS TO SKIP

- Annoying engine vibration when idling
- Low-mounted dash air vents

BEST VERSION TO GET

The SV is available with AWD and includes the ProPilot Assist system. The $2,660 SV Premium package adds faux leather seats, heated front seats and heated steering wheel, and a panoramic sunroof.



THE ROGUE IS a compelling small SUV with agile handling, a relatively quiet interior, and user-friendly controls.

In 2022, Nissan swapped in a new engine, a 1.5-liter turbo three-cylinder that's teamed with a CVT. This combo has hardly any turbo lag and supplies a healthy midrange punch. We noticed some idle vibration, though, which takes away from refinement.

The CVT does an excellent job mimicking the shifts of a traditional automatic when accelerating, but it also exhibits a "rubber-banding" sensation of the engine revs rising and falling too often. We measured 25 mpg overall on regular fuel, which is 2 to 3 mpg behind the class leaders.

The Rogue performs well when the road gets curvy, with quick turn-in response and minimal body lean. The suspension has an underlying firmness, which lends to the SUV's more substantial feel, but passengers will be quite aware of broken pavement. The cabin is one of the quietest in the class, though, with muted road and wind noise.

Front headroom is generous and the armrests are well-padded, but the center console intrudes on the driver's right knee space. The low center dash vents end up cooling the driver's elbows and knees more than their upper body. The rear seat is also roomy but is short on thigh support. By virtue of rear doors that open 90 degrees, getting into the back seat is a cinch.

Our SV trim's interior is appealing, with plenty of padded surfaces, attractive metal-look trim, and a leather steering wheel.

We like the physical buttons and knobs for most infotainment and climate-control functions, and the screen's simple-to-read text. It's also easy to get used to operating the electronic gear selector.

AEB with pedestrian detection, AEB highway, BSW, and RCTW are standard. The ProPilot Assist active driving assistance system adds adaptive cruise control and lane centering.

PHOTOS: NISSAN

Mazda

CX-5 ✓

VITAL STATS

77	77	$31,190
OVERALL SCORE	**ROAD TEST**	**PRICE AS TESTED**

TRIM LINE		**DRIVETRAIN**
Preferred	24 MPG	187-hp, 2.5-liter 4-cyl.; six-speed automatic; all-wheel drive

REASONS TO BUY

- Rides comfortably
- Cabin is quiet
- Responsive handling
- Nicer interior than most competitors

REASONS TO SKIP

- Compromised rear and side visibility
- Controls are challenging to master
- So-so fuel economy

THE MAZDA CX-5 stands out in this crowded field for its upscale refinement, with sporty handling, notable ride comfort, decent noise isolation, and interior quality.

The base 187-hp four-cylinder and six-speed automatic make for a docile, responsive, and easy-to-drive combination. The weight of the cabin-quieting materials took a toll on fuel economy, dropping it to an unimpressive 24 mpg overall. All-wheel drive is standard, and top trims get a more powerful turbocharged engine.

Mazda worked wonders smoothing out the ride so that the CX-5 is now one of the most comfortable in the segment. It's supple and controlled, shrugging off bumps easily. Yet point the CX-5 into a turn and it willingly follows the chosen path. Handling is athletic, with responsive steering and an eagerness to tackle corners. The 19-inch tires on higher trims slightly degrade the ride.

Noise isolation is another asset; the CX-5 has one of the quietest cabins in the compact SUV segment.

Step inside and it's immediately apparent that Mazda crafted a fine interior. There are lots of soft-touch bits, detailed stitching, chrome trim, and high-quality plastics that lend class. The comfortable, supportive seats are covered with soft leather. Most controls and knobs operate with a slick fluidity, but Mazda's infotainment system is frustrating to use.

The rear seat is roomy enough, though not as generous as those in the CR-V, Forester, and Tucson. Wide-opening doors make it easy for kids and adults to climb inside. The second row is a comfortable space, with backrests that can recline slightly.

Outward visibility is good to the front, though the sloping roofline and chunky rear pillars hamper the rear three-quarter view.

Finally, AEB with pedestrian detection, AEB highway, BSW, RCTW, and LKA are standard equipment.

BEST VERSION TO GET

We like the 2.5 S Preferred, which includes a sunroof and 8-way power leather seats. Note that versions above the Preferred include 19-inch wheels and tires, which will compromise ride comfort somewhat.

PHOTOS: MAZDA

Safety Term Glossary: AEB automatic emergency braking; **BSW** blind spot warning; **LDW** lane departure warning; **LKA** lane keeping assistance; **RCTW** rear cross traffic warning.

Hybrid LE/LE	47/ 32 MPG	208-hp, 2.5-liter 4-cyl. hybrid; CVT; FWD/ 203-hp, 2.5-liter 4-cyl.; 8-spd. auto; FWD

REASONS TO BUY
- Fuel economy
- Long cruising range (hybrid)
- Comfortable ride
- Easy-to-use controls
- Hybrid battery doesn't steal trunk space
- Braking performance (non-hybrid)

REASONS TO SKIP
- Low stance makes it hard to get in and out
- Engine sound in non-hybrid can be unpleasant
- 8-speed automatic transmission can be clunky
- Have to pay extra for BSW and RCTW

BEST VERSION TO GET

The LE hybrid is the best version with its 47 mpg and quieter engine. It has standard power front seats and dual-zone automatic climate controls. The non-hybrid LE with the Convenience package is an efficient and affordable choice.

PHOTOS, THIS SPREAD: TOYOTA

THE CAMRY HAS long held the distinction of being a midsized sedan that is competent, well-rounded, pleasant... and unexciting. To address that last perception, Toyota improved the handling and gave the Camry snazzier styling as part of a 2021 redesign.

The car has a newfound agility, which makes the Camry feel light on its feet in the corners. It's paired with a pleasant ride, thanks to a suspension that easily soaks up bumps.

One of the real bright spots in the Camry lineup is the hybrid model. We tested an LE trim, which returned an astounding 47 mpg overall and had very quick acceleration.

The gas-only Camry that we tested returned a very good 32 mpg overall. But its eight-speed automatic suffers from some rough shifts, and the engine sounds unpleasant at high revs. The hybrid's continuously variable transmission (CVT) is smoother. In addition, the hybrid is also quieter and can propel itself on electric power alone at low speeds.

Outward visibility is decent because of slim pillars and lots of side glass. Drivers get a wide, nicely padded front seat that delivers plenty of support.

The Camry's low stance compromises cabin access. Slipping into the seats requires ducking, and headroom is tight, especially with the optional sunroof. While the rear seat isn't the roomiest in the class, headroom and legroom are reasonable.

A 7-inch touchscreen is standard, and a 9-inch version is available on higher trims. Controls are clear and straightforward, and we like the knobs for audio volume and tuning.

Interior ambience was also improved, with more soft-touch surfaces, although some hard plastic bits remain scattered throughout.

AEB with pedestrian detection, AEB highway, and LDW are standard, but BSW and RCTW are optional.

Safety Term Glossary: AEB automatic emergency braking; **BSW** blind spot warning; **LDW** lane departure warning; **LKA** lane keeping assistance; **RCTW** rear cross traffic warning.

TRIM LINE
2.5 SV

31 MPG

DRIVETRAIN
188-hp, 2.5-liter four-cylinder engine; CVT; front-wheel drive

REASONS TO BUY
- Easy-to-use controls
- Fuel economy
- Roomy rear seat
- Standard BSW and RCTW

REASONS TO SKIP
- Lacks agility
- Low roof and low stance make access challenging

BEST VERSION TO GET

The SV trim level offers a lot for the money, and is the least-expensive version that can be equipped with the ProPilot Assist system, coming in just under $30,000 with front-wheel drive.

THE ALTIMA'S FINER points include a quiet cabin, easy controls, a big trunk, and a roomy and comfortable rear seat. And it is available with all-wheel drive.

Like many recent competitors, the Altima is no longer available with a V6 engine. Instead, the top engine is now a turbo four-cylinder.

Both acceleration and fuel economy have been improved with the base 2.5-liter engine. The Altima is quick for its class, and its engine has a more refined sound than many competitors. We measured 31 mpg overall, a 2-mpg improvement over the previous model.

It also has one of the better continuously variable transmissions we've tested, with artificial shifts that mimic a traditional automatic.

But the Altima falls behind its rivals in several areas. Its vague steering feels disconnected through corners and it exhibits body roll early in turns. These combine to give the feeling that the Altima isn't hugging the road as confidently as its peers, such as the Camry.

The ride initially feels smooth, but bumps on rough roads poke through that superficial veneer. Most road and wind noises are nicely squelched, though.

The Altima's low stance makes getting in and out a chore. Once inside, the driver's seat feels basic, with a bottom cushion that's short on thigh support. The rear seat is spacious.

The hard plastic surfaces throughout the cabin make the interior look and feel bland, although we appreciate the leather-wrapped steering wheel.

The infotainment screen and controls are refreshingly simple to use.

AEB with pedestrian detection, AEB highway, BSW, and RCTW are standard. The SV trim we tested adds the ProPilot Assist system, which includes lane keeping assistance and adaptive cruise control. This system can be helpful to relieve some driver stress in slow, congested traffic conditions.

Kia

K5 ✓

VITAL STATS

OVERALL SCORE	ROAD TEST	PRICE AS TESTED
81	84	$25,610

TRIM LINE	MPG	DRIVETRAIN
LXS	32	180-hp, 1.6-liter turbo four-cylinder; 8-spd. automatic; front-wheel drive

REASONS TO BUY

- Fuel economy
- Easy-to-use controls
- Braking performance
- Roomy interior
- Standard BSW and RCTW

REASONS TO SKIP

- Hesitation when starting from a rolling stop
- Low stance hurts cabin access
- Power driver's seat isn't available on mainstream LXS trim

BEST VERSION TO GET

The LXS comes pretty well equipped. Buyers who seek a more comfortable and supportive driver's seat should opt for the GT-Line (not the GT), even though it also comes with low-profile 18-inch tires that compromise ride comfort.

THE ROOMY AND fuel-efficient K5 is a user-friendly sedan that flies under the radar in the midsized class.

We tested a K5 with the standard 1.6-liter turbo four-cylinder, which delivers impressively robust power for such a small displacement powerplant. It also returned a commendable 32 mpg overall.

The mostly smooth-shifting eight-speed automatic is responsive but we noted a slight hesitation from a rolling stop—such as when a driver accelerates after slowing down for a red light that turns green before the car is stopped—which can be annoying.

The K5's ride is steady and compliant and a notch better than its platform mate, the Hyundai Sonata. Unlike the Sonata, AWD is available.

We found that the K5 did a good job quelling most road and wind noise. However, the engine exhibited a louder-than-expected clamor during acceleration, even when the driver wasn't pushing the car very hard.

The K5's handling is capable and controlled even when pushed to its limits.

Refreshingly, the cabin has a conventional layout, replete with a traditional gear selector. The base LXS gets an 8-inch infotainment display screen, while higher trims like the EX have a 10.25-inch touchscreen. We found that both screens respond quickly to inputs, and it's easy to figure out various menus.

Even with its snazzy styling, the K5 has a good amount of room inside the cabin, and decent outward visibility. The car is rather low slung, however, which makes getting in and out a bit of a chore.

The LXS' basic driver's seat has manual adjustments, loses support during long drives, and lacks any lumbar adjustment. The pricier GT-Line has a more supportive, power-adjustable seat.

AEB with pedestrian detection, AEB highway, BSW, RCTW, LDW, and LKA are standard.

Safety Term Glossary: AEB automatic emergency braking; **BSW** blind spot warning; **LDW** lane departure warning; **LKA** lane keeping assistance; **RCTW** rear cross traffic warning.

Hyundai

SONATA ✓

VITAL STATS

OVERALL SCORE	ROAD TEST	PRICE AS TESTED
80/79	83/81	$26,670/ $31,515

TRIM LINE	MPG	DRIVETRAIN
SEL/ Hybrid SEL	31/ 44	191-hp, 2.5-liter 4-cyl.; 8-spd. auto.; FWD/ 192-hp, 2.0-liter hybrid 4-cyl.; 6-spd. auto.; FWD

REASONS TO BUY

- Fuel economy, particularly the hybrid
- Secure handling
- Braking performance (non-hybrid)
- Availability of tech features on lower trims
- Standard BSW and RCTW

REASONS TO SKIP

- Stiff ride
- Gear selector is awkward to use
- Hybrid's transmission has rough shifts

BEST VERSION TO GET

The well-equipped SEL is a smart trim choice no matter the powertrain, because it opens up the path for various other comfort and convenience options. We don't see a reason to choose the optional 1.6-liter turbo engine.

ALTHOUGH THE SONATA'S sleek styling helps it stand out among midsized sedans, it trails the category's perennial leader, the Toyota Camry, as well as the similar Kia K5 in our ratings.

The standard 191-hp, 2.5-liter four-cylinder is coupled with an eight-speed automatic, providing unobtrusive, predictable power and very good fuel economy at 31 mpg overall. We really don't see any reason to upgrade to the optional 1.6-liter turbo engine. The hybrid gets an excellent 44 mpg overall but the transmission has rough shifts.

The Sonata is quite capable when driven briskly, and it negotiated our accident avoidance course with impressive speed and well-contained body roll. But the stiff ride transmits road impacts in a more pronounced way than in rival sedans, and there's some unpleasant engine noise at high revs.

We found the cabin fairly roomy, with good driver visibility in spite of the car's rakish lines. The driving position isn't quite as upright as in most sedans, but the power-seat adjustments let drivers of all sizes get comfortable behind the wheel. Seat support is fine on shorter jaunts but fades on longer trips, contributing to fatigue. And the hard center console can rub uncomfortably against the driver's right knee.

While the interior has a stylish, modern look, with sleek piano-black surfaces, the controls are a mixed bag. The infotainment system is well-designed, although higher-end versions get a larger screen that eliminates the radio's handy tuning knob. The push-button gear selector is tricky to use and can't be operated without looking down at its controls.

The options list is quite comprehensive. It's easy to add heated seats, a power driver's seat, and automatic climate control to lower trim versions.

AEB with pedestrian detection, AEB highway, BSW, RCTW, LDW, and LKA are standard.

Subaru

LEGACY ✓

VITAL STATS

80 OVERALL SCORE

89 ROAD TEST

$27,609 PRICE AS TESTED

TRIM LINE
Premium

29 MPG

DRIVETRAIN
182-hp, 2.5-liter 4-cyl. engine; continuously variable transmission; all-wheel drive

REASONS TO BUY

- Comfortable and composed ride
- Smooth-shifting transmission
- Large trunk
- Standard AWD

REASONS TO SKIP

- Some controls require multiple steps to complete common tasks
- Have to pay extra for BSW and RCTW

BEST VERSION TO GET

Go with the Limited trim for its more supportive leather seats and power front passenger seat. Shoppers choosing the less expensive Premium trim should make sure to add the optional package with BSW and RCTW.

AFTER MANY REDESIGNS over the years, the Legacy remains a sensible, comfortable, and quiet sedan that's easy to live with.

One of the first things you'll notice is that the suspension soaks up bumps and potholes better than some luxury sedans. The cabin is hushed, too, though the 2.5-liter four-cylinder engine can get loud when pushed. The optional 260-hp, 2.4-liter turbo engine feels less stressed.

The base engine needs to be revved pretty high to make significant power, and it can feel strained when climbing hills or merging onto highways. We got 28 mpg overall in our tests, which is good for an all-wheel-drive sedan.

The turbo engine provides effortless punch, but it returned only 24 mpg overall in the Outback we tested (a wagon version of the Legacy). The CVT mimics the shift pattern of a conventional automatic, which helps prevent the engine revs from rising discordantly from the actual speed of the car.

The Legacy feels sporty, responsive, and secure, tackling corners with restrained body lean. The steering is short on feedback and could do a better job communicating the road texture and cornering loads to the driver.

The driving position accommodates all kinds of body types, with plenty of head, leg, and knee-room. Slim roof pillars and generously sized side windows allow excellent outward views. Other high points include a roomy rear seat and large trunk.

But the infotainment system's large screen, fitted to all versions except the base model, requires multiple steps to perform common tasks, including those related to the climate-control system. It also crams Android Auto and Apple CarPlay into a small window.

AEB with pedestrian detection, AEB highway, LDW, and adaptive cruise control are standard, but BSW and RCTW cost extra.

Vehicle Ratings

Find your next car, minivan, SUV, or pickup truck using our exclusive test results and survey data.

THESE CHARTS PROVIDE a quick reference guide to all the vehicles we have recently tested so that you can see how each matches up with its competitors.

■ **Recommended** vehicles are those that meet CR's stringent testing, reliability, and safety standards. To earn our recommendation, noted with a ✓, vehicles must have a high Overall Score in their category.

■ **The Green Choice** designation, developed in collaboration with the EPA, indicates which cars, SUVs, and minivans are in the top 20 percent of the cleanest-emitting vehicles from their model year. These are identified with a 🍃.

■ **Overall Score** includes the vehicle's performance in our road tests; the latest results from the reliability and owner satisfaction sections of CR's Auto Surveys; the availability of frontal crash prevention systems with pedestrian detection, along with blind spot warning; and, if available, results from crash tests performed by the National Highway Traffic Safety Administration and the Insurance Institute for Highway Safety. For information on safety and crash tests, see page 190.

■ **Price as tested** is the sticker price at the time we bought the tested vehicle.

■ **Survey results** reflect findings from CR's latest Auto Surveys, which are compiled from data reported by CR members. **Predicted reliability** is our forecast of how well a new model is likely to hold up. **Owner satisfaction** is based on the percentage of surveyed CR members who say they would definitely buy or lease their vehicle again.

We use a model's latest three years of data to determine the predictions, provided it hasn't been redesigned or significantly updated. If we have insufficient survey responses, or if a model is all new or redesigned, we use our judgment based on the brand's track record along with similar models to predict reliability and owner-satisfaction ratings.

■ **Road-test score** is based on results from more than 50 objective and subjective tests and evaluations performed at our 327-acre Auto Test Center in central Connecticut.

■ **Overall mpg** is the overall miles per gallon a vehicle achieved in CR's fuel-economy tests, reflecting a mix of city and highway driving. Energy consumption of electric vehicles is shown as a miles-per-gallon equivalent (MPGe) as rated by the EPA.

■ **High and lows** give a summary of a model's notable strengths and weaknesses.

WHY SOME MODELS DON'T APPEAR IN OUR RATINGS

These new or redesigned models will be in road tests in future issues of CR New Cars: the Chevrolet Colorado; Dodge Hornet; Honda Accord, CR-V Hybrid, and Pilot; Land Rover Range Rover Sport; Lexus RX; Lucid Air; Maserati Grecale; Mercedes-Benz EQE and EQS SUV; Nissan Ariya and Z; Rivian R1S; Subaru Solterra; and Toyota bZ4X, Crown, and Prius.

User's Guide to Vehicle Reviews

On the following pages, you'll find reviews, key ratings, and information for the 252 models featured in this book, covering all 2023 and a few early 2024 models. Use these reviews, along with the vehicle ratings (on page 44) and our data charts (on page 184), to narrow your choices.

How to Read the Reliability Charts

These charts are based on owner data from our Annual Auto Surveys. The **Overall Reliability** rating indicates how many problems a model has had compared with the average problem rate for vehicles of the same model year.

We derive this from CR members, who reported on any problems they had with their vehicles during the 12 months prior to the survey that were considered serious because of cost, failure, safety, or downtime. Our calculations give extra weight to the areas of engine, major; engine cooling; transmission, major; and drive system because they can be serious and expensive to repair.

The reliability of a 2023 model is taken from the average of a model's **Overall Reliability** for the newest three years, provided the vehicle did not change significantly in that time and hasn't been redesigned for 2023. Several model years' data are a better predictor than the most recent model year.

One or two years' data may be used if the model was redesigned in 2022 or 2021, or if there were insufficient data for more years. We include a prediction for a new or redesigned model based on its reliability history or the manufacturer's track record.

To see a model's individual strengths and weaknesses, look at the scores in the **Trouble Spots,** which are based on the percentage of respondents who reported problems in each trouble spot compared with the average model for that year.

Models that score a ⏬ are not necessarily unreliable but have a higher rate of problems than the average model. Similarly, models that score a ⏫ are not necessarily problem-free but had relatively few problems compared with other models.

In the charts, a model year in **bold** identifies the year of a major redesign or the first year of introduction. Years with insufficient data are noted with a column of asterisks (*).

What the Trouble Spots Include

- **Engine, Major** Engine or electric drive motor rebuild or replacement, cylinder head, head gasket, turbo or supercharger, timing chain or timing belt.
- **Engine, Minor** Oil or fuel leaks, accessory belts and pulleys, engine computer, engine mounts, engine knock or ping, electric drive motor malfunction.
- **Engine Cooling** Radiator, cooling fan, antifreeze leaks, water pump, thermostat, overheating.
- **Transmission, Major** Transmission rebuild or replacement, torque converter, premature clutch replacement.
- **Transmission, Minor** Gear selector or linkage, coolers and lines, rough shifting, slipping transmission, leaks, transmission computer, transmission sensor or solenoid, clutch adjustment, hydraulics (clutch master or slave cylinder).
- **Drive System** Driveshaft or axle, CV joint, differential, transfer case, 4WD/AWD components, driveline vibration, traction control, electronic stability control (ESC), electrical failure.
- **Fuel System** Sensors (includes O_2 or oxygen sensor), emission control devices (includes EGR), fuel gauge/sender, fuel injection system, fuel pump, problems filling the tank.

BEHIND THE DATA

1. RECOMMENDED MODELS

These vehicles must have performed well in our testing, have average or better reliability, and perform adequately if included in safety tests conducted by the Insurance Institute for Highway Safety or the National Highway Traffic Safety Administration.

2. MODEL-LINE OVERVIEW

Base Price is the range of the manufacturer's base suggested retail price without options or destination charge for all versions. An "E" indicates that the price is estimated. Models often come in various **Body Styles** and **Trim Lines,** which are versions that differ in standard equipment, available options, and price. Pickup trucks are listed by available cab configurations. **Drive Wheels** tells you whether the model is available with front-, rear-, all- (AWD), or four-wheel drive (4WD). **Seating** is the maximum number of passenger positions available for a model. **Engines** and **Transmissions** show the different powertrain choices.

3. FACTS & FIGURES

Length is measured from bumper to bumper. **Width** is from the outermost side of one fender to the opposite fender. **Height** is from the top of the inside door frame to the ground. **Wheelbase** is the distance from the center of the front wheel to the center of the rear. **Weight** and **% Weight Front/Rear** are measured on our scales. Data for untested models

- **Electrical** Alternator, starter, hybrid/electric battery replacement, hybrid/electric battery and related systems, regular battery, battery cables, engine harness, coil, ignition switch, electronic ignition, distributor or rotor failure, spark plug and wire failure, auto stop/start, electric vehicle charging.
- **Climate System** Blower (fan) motor, A/C compressor, condenser, evaporator, heater system, automatic climate control, refrigerant leakage, electrical failure.
- **Suspension** Shocks or struts, ball joints, tie rods, wheel bearings, alignment, steering linkage (includes rack and pinion), power steering (pumps and hoses, leaks), wheel balance, springs or torsion bars, bushings, electronic or air suspension.
- **Brakes** Premature wear, pulsation or vibration, squeaking, master cylinder, calipers, rotors, antilock brake system (ABS), parking brake, brake failure, regenerative braking.
- **Exhaust** Muffler, pipes, catalytic converter, exhaust manifold, leaks.
- **Paint/Trim** Paint (fading, chalking, cracking, peeling), loose trim or moldings, rust.
- **Noises/Leaks** Squeaks or rattles, seals or weather stripping, air or water leaks, wind noise.
- **Body Hardware** Windows, locks and latches, tailgate, hatch or trunk, doors or sliding doors, mirrors, seat controls, heated or cooled seats, heated steering wheel, safety belts, sunroof, convertible top, glass defect.
- **Power Equipment** Cruise control, clock, warning lights, body control module, keyless entry, wiper motor or washer, tire pressure monitor, interior or exterior light, horn, gauges, 12V power plug, remote engine start, alarm or security system, headlights, automatic headlights, automatic wipers, wireless charging pad.
- **In-Car Electronics** Audio systems, backup/parking camera, entertainment systems, navigation system, communication system, hardware replacement, over-the-air updates, head-up display.

BEHIND THE RELIABILITY RATINGS

This chart shows the average rates of problems in each trouble spot by model year for the vehicles in CR's Annual Auto Surveys.

For example, less than 1 percent of 2021 vehicles had engine major problems, on average. The Acura TLX on the facing page scores a ⇊ (much worse than average) because 2 percent of them had a problem in this area.

For 2021 models the average rate of power equipment problems was about 1 percent. Because no Acura RDX owners reported a problem in this category, it scores ⇈ (much better than average).

Because high-mileage cars tend to encounter more problems than low-mileage cars, problem rates are standardized to minimize differences due to mileage. We also adjust for member age since older drivers tend to report fewer problems. 2022 models were generally less than 6 months old at the time of the survey. Redesigned or newly introduced model years are in **bold.**

AVERAGE PERCENTAGE OF CARS WITH A REPORTED ISSUE

come from manufacturers. **Max. Load** includes occupants and luggage, and is specified by the manufacturer or calculated from the difference between the manufacturer's specified gross vehicle weight and our tested vehicle weight. **Cargo Volume** for minivans, SUVs, and wagons is the maximum usable volume, measured using an expandable pipe-frame box that's adjusted to fit the cargo area with rear seats folded down or removed. Data for models with a trunk come from government figures. **Towing Capacity** is the maximum weight our tested vehicle can pull on a trailer or a typical weight. The manufacturer's max rating is used if the vehicle isn't tested. **Fuel** gives the recommended types for all the models' engines. Some engines may have different power ratings depending on fuel type. **CR Overall mpg** is from our tested engines for a mix of city and highway driving, given in a range if multiple versions were tested. If CR has not tested the model, then we use **EPA Combined mpg.** This is the mix of city and highway mileage figures issued by the Environmental Protection Agency for a typical engine.

4. OVERALL SCORE

This accounts for a vehicle's performance in our road tests; the latest reliability and owner satisfaction results from CR's Annual Auto Surveys; the availability of frontal crash-prevention systems with pedestrian detection, along with blind spot warning; and, if available, results from NHTSA and IIHS crash tests. We deduct points if a vehicle's transmission gear selector lacks fail-safes. Untested vehicles will have an "NA." **Reliability** is our forecast of how well a new model is likely to hold up, based on the problems that CR members reported in our 2022 Annual Auto Surveys, with data on more than 300,000 vehicles. **Satisfaction** comes from CR's Auto Surveys, in which we asked owners whether they would definitely buy or lease their particular vehicle again. Some brand new models without previous history are given "NA" in Reliability and Satisfaction. **Road Test** is the final score from our more than 50 tests. Some tests, such as those for braking and fuel economy, are empirical and measured with instruments; those for categories such as seat comfort and noise are graded by our experts. **ADAS** identifies whether a vehicle has advanced driver assistance systems: automatic emergency braking that operates at highway speeds (AEB highway), a pedestrian detection system (Pedestrian), blind spot warning (BSW), and rear cross traffic warning (RCTW). We use Opt. to indicate the system is available on some versions; "NA" means no system is offered. Models with all four systems standard are assigned a ⇈; those with standard AEB and pedestrian detection receive a ↑; those with only AEB standard receive a !. We include a range of scores for Overall Score, Reliability, and Owner Satisfaction to indicate we have test or survey data on several versions.

Acura Integra ✓

77
OVERALL SCORE

Acura resurrected the Integra name for its entry-level four-door hatchback. It's essentially an upscale version of the Honda Civic and is powered by a 200-hp, 1.5-liter turbo four-cylinder shared with the sporty Civic Si. Most versions come with a continuously variable transmission, which dilutes the Integra's sporting pretense—we much prefer the slick-shifting six-speed manual. Handling is responsive, but the ride is choppy and the car suffers from excessive road noise. The controls are simple but are barely differentiated from the Civic's, and the same goes for much of the interior design and layout. As such, the Integra lacks the premium ambience of its entry-level luxury competitors. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Acura MDX ✓

74
OVERALL SCORE

The MDX is a functional three-row luxury SUV that's priced lower than German competitors. The standard 290-hp V6 engine is slick and is paired with a 10-speed automatic, a powertrain that works well. Fuel economy is 20 mpg overall. The top-of-the-line Type S has a smooth, powerful 355-hp, 3.0-liter turbo V6. The ride is comfortable, and handling is secure but mundane. The front seats are wide and supportive, and the interior is well-made. The rear seat's midsection is removable, which creates an aisle to the third row. The MDX's biggest knock is the infotainment system's reliance on a finicky touchpad to interact with the screen; we found it very distracting to use, forcing the driver to look too long at the screen and away from the road. AEB with pedestrian detection, BSW, and RCTW are standard.

WORSE ⟷ BETTER

✓ RECOMMENDED

Acura RDX ✓

77 OVERALL SCORE

The RDX drives nicely, but it has very confusing and distracting controls that diminish its daily drivability. The 2.0-liter turbo four-cylinder is paired with a 10-speed automatic. It's an energetic powertrain once it gets past some initial hesitation. We got 22 mpg overall, which is a bit below average for the class. The RDX feels lively and engaging, thanks to its nimble handling. The fussy touchpad, which is the only way to interact with the infotainment screen, is frustrating to use. It forces drivers to divert their attention from the road too often and for too long. The push-button gear selector also takes some practice to master. The seats are comfortable, and the interior room is on a par with the class. AEB with pedestrian detection, BSW, and RCTW are standard.

Acura TLX

61 OVERALL SCORE

The sleek TLX is larger than competing sports sedans, yet it isn't any roomier. The standard 272-hp, 2.0-liter turbo four-cylinder and 10-speed automatic make for an energetic pairing but return an unimpressive 23 mpg overall. Front-wheel drive is standard, with all-wheel drive optional. A sporty Type S version with AWD uses a stronger 355-hp, 3.0-liter turbo V6, and is quite capable when the road gets twisty. While the TLX's ride is comfortable and handling is nimble, there's too much road and engine noise, undermining its premium pretense. The front seats are supportive, but the rear seat is tight, and the car's low stance hurts access. The touchpad based infotainment system is very distracting to use. AEB with pedestrian detection is standard, and BSW and RCTW are optional.

Alfa Romeo Giulia

52
OVERALL SCORE

Alfa's compact luxury sedan corners and steers like a sports car. The standard 280-hp, 2.0-liter turbo four-cylinder is mated to an eight-speed automatic and provides punchy acceleration in both rear- and all-wheel-drive versions. The firm ride absorbs most bumps, but it's less plush than that of many competitors. Fuel economy is commendable at 27 mpg overall. The attractive interior has matte wood and nicely textured surfaces. Seat comfort is compromised by a short bottom cushion and a limited range of adjustments, and the cabin isn't as quiet as that of its peers. Alfa recently made the infotainment system more user-friendly. The high-performance Quadrifoglio version is even sportier, but at the expense of comfort. AEB with pedestrian detection, BSW, and RCTW are standard.

Alfa Romeo Stelvio

54
OVERALL SCORE

The Stelvio delivers fantastic handling that makes it fun to drive on a twisty road. But it forces owners to contend with a few annoying quirks on a daily basis. The standard engine is a punchy 280-hp, 2.0-liter turbo four-cylinder that emits a satisfying sound and gets 24 mpg overall on premium gasoline. While the ride is somewhat jittery, the suspension absorbs bumps rather well. The high-performance Quadrifoglio version is even sportier, but at the expense of ride comfort. Among the constant annoyances are a driving position with a limited range of seat adjustments and obstructed rear and side visibility. Alfa recently made the infotainment system more user-friendly. AEB with pedestrian detection, BSW, and RCTW are standard.

Alfa Romeo Tonale

NA
OVERALL SCORE

The Tonale SUV is the latest addition to the Alfa Romeo line. About the size of an Audi Q3, the Jeep Compass-based Tonale slots under the Stelvio in price and size. It comes as a standard plug-in hybrid electric vehicle, which Alfa Romeo says will have over 30 miles of electric before transitioning to regular hybrid operation. A 1.3-liter turbocharged four-cylinder engine drives the front wheels, while an electric motor powers the rear, giving the Tonale a combined 285 hp and standard all-wheel drive. As a member of the Stellantis conglomerate, the Tonale gets the Uconnect 5 infotainment system. It comes with a full suite of active safety features, including AEB with pedestrian detection, BSW, and RCTW.

Audi A3 ✓

75
OVERALL SCORE

The A3 packs a solid and upscale feel into a small package. A recent redesign included infotainment and connectivity upgrades trickled down from larger Audis. The front seats are comfortable, and the cabin is nicely finished. The rear seat is cramped, as is the norm in this class. A 201-hp, turbocharged four-cylinder and a seven-speed dual-clutch automatic with a mild hybrid setup come standard. The transmission can be clunky and hesitant at low speeds, but once underway the A3 delivers responsive acceleration and outstanding fuel economy of 31 mpg overall on regular fuel. The ride is firm yet steady and comfortable. Handling is nimble, but it's the S3 and RS 3 versions that are the true high-performance models. AEB with pedestrian detection comes standard.

Audi A4 ✔

78 OVERALL SCORE

One of the reasons the A4 is among the best luxury compact sports sedans is its enjoyable driving experience. The punchy 2.0-liter turbo four-cylinder is paired with a seven-speed dual-clutch automatic, driving all four wheels. We got a commendable 27 mpg overall. Handling is nimble and precise, the ride is firm yet supple, and the A4 feels tight-as-a-drum solid, with a very quiet cabin. The instrument panel shows pertinent information in a clear, comprehensive way. Interior fit and finish is excellent, and the front seats are comfortable, though the rear seat is tight. While AEB with pedestrian detection is standard, BSW and RCTW are optional. The Allroad wagon adds versatility, and the sportier S4 uses a turbo V6. The A5 coupe, convertible, and hatchback are based on the A4.

Audi A6 ✔

82 OVERALL SCORE

Most versions of the A6 come with a 2.0-liter turbo four-cylinder engine, while a 3.0-liter turbo V6 is optional. The seven-speed dual-clutch automatic can be short on refinement at low speeds, and the car hesitates a bit from a rolling stop. Ultimately, the 2.0-liter proved to be powerful and returned a commendable 26 mpg overall in our tests. Good agility through corners makes the A6 feel sporty. The ride is taut and firm but still comfortable. The quiet cabin is a delight in terms of fit and finish, and the supportive front seats are extremely comfortable. The infotainment system is daunting to use at first but ultimately is logical. The high-performance RS6 wagon uses a 4.0-liter turbo V8. AEB with pedestrian detection is standard, but BSW and RCTW are optional. The A7 is a stylish four-door hatchback.

Audi A8 ✓

80 OVERALL SCORE

Audi's flagship features a smooth, powerful turbo V6 and a slick eight-speed automatic. Together, they returned 21 mpg overall in our tests, which is impressive for a large all-wheel-drive sedan. A high-performance S8 comes with a turbo V8 engine. The infotainment system looks complex at first, but we found it to be logical to use. The lack of physical controls is not ideal, but we like how the touchscreen vibrates to confirm each selection for any audio or climate task. The A8's ride is very comfortable, and handling is responsive but not agile. The cabin is quiet and impeccably furnished. The front seats are comfortable and supportive, and they have a multitude of available adjustments, while the rear seat has limolike room. AEB with pedestrian detection is standard. BSW and RCTW are optional.

Audi E-Tron

63 OVERALL SCORE

This all-electric luxury midsized SUV is a treat to drive. It has standard all-wheel drive, a luxurious cabin, and a healthy list of active safety features. It's quick and super-quiet, which makes the E-Tron glide along smoothly and effortlessly. The standard air suspension gives the Audi a supremely comfortable ride. Although handling is responsive, the E-Tron is no match for the BMW iX or Jaguar I-Pace. A freshened 2024 model arrives this year, and gets the Q8 moniker added to its name and a bigger battery that will give the EV a 300-mile range, up from the original's 220 miles. A hatchback version called the Sportback and a high-performance 496-hp S are available. The E-Tron GT is a coupelike sedan that's based on the Porsche Taycan.

Audi Q3 ✓

75
OVERALL SCORE

The Q3 is a pleasant-driving SUV that packs luxury and practicality into a small package. A 228-hp, 2.0-liter turbo four-cylinder paired with an eight-speed automatic makes for lively, predictable acceleration and smooth shifts, but the engine can sound raspy. Handling is sharp and predictable, and the ride skews firm. All-wheel drive is standard. The 23 mpg overall fuel economy isn't stellar, but at least the Q3 takes regular-grade gasoline. An uncluttered dashboard features well-labeled buttons and an easy-to-use touchscreen. Fit and finish is very good, the front seats are supportive, and the roomy rear seat can slide forward to make more space for cargo. Oddly, a heated steering wheel is not available. AEB with pedestrian detection, BSW, and RCTW are standard.

Audi Q4 E-Tron

67
OVERALL SCORE

The Q4 E-Tron EV shares its platform with Volkswagen's ID.4. The 50 E-Tron Quattro has an 82-kWh battery pack; a 295-hp, dual-motor all-wheel-drive configuration; and an EPA-estimated range of 236 miles. It can accept a charging output of 150 kW when using a DC fast charger in public places. Level 2 home charging from empty takes 9 hours, according to Audi. The Q4 is very quiet. Power delivery is smooth, quiet, and effortless. Handling is responsive, and the firm ride is composed. The impeccable interior is uncluttered, and the seats are comfortable and supportive. Most of the controls are straightforward, and the door handles are conventional. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW. The Sportback is a coupelike version of the Q4.

Audi Q5 ✓

71 OVERALL SCORE

The Q5 is among the best compact luxury SUVs. It has nimble and secure handling, a compliant and controlled ride, and a quiet cabin. The smooth 2.0-liter turbo four-cylinder engine is coupled to a seven-speed dual-clutch automatic. It has plenty of power, yet this combination also returned a good 24 mpg overall in our tests. Fit and finish is impressive, and the seats are comfortable and supportive. The 55 TFSI e plug-in hybrid version has a claimed electric-only range of 20 miles. All Q5 trims have standard AEB with pedestrian detection, BSW, and RCTW. Highway-speed AEB and adaptive cruise control with stop-and-go capability are standard on the 2023 model. A coupelike Sportback version and a high-performance SQ5 are also available.

Audi Q7 ✓

81 OVERALL SCORE

The Q7 is one of the most impressive three-row luxury SUVs. With its optional turbocharged V6 it is quick, quiet, and effortless. Agile handling and a beautiful interior complete the package. A 2.0-liter turbo engine is standard. The Q7 is very quiet, instilling a sense of tranquility. The ride is steady and controlled but has an underlying firmness. The optional air suspension gives the big SUV a plush ride. Handling is responsive and confidence-inspiring. The excellent first- and second-row seats are comfortable, but the third row is tight. A sleek dual-screen infotainment system looks initially daunting but turns out to be manageable after some practice. AEB with pedestrian detection, BSW, and RCTW are standard. The SQ7 uses a 500-hp, 4.0-liter turbo V8. The Q8 is a sportier five-seat version of the Q7.

Audi TT ✓

74
OVERALL SCORE

This sculpted coupe is more about style and technology than outright performance. Even so, it's still pretty entertaining to drive, with nimble handling and a dash of steering feedback to the driver. The 2.0-liter turbocharged engine is punchy, the ride is quite firm but not punishing, and noise is kept at bay. Inside the snug interior are comfortable front seats, high-quality fit and finish, and Audi's digital instrument panel. It incorporates all gauges and displays, and eliminates the center-dash screen. The climate and seat-heating controls are incorporated into the dash vents. The TT lacks most active safety features, a serious oversight for a car in this price range.

BMW 2 Series ✓

77
OVERALL SCORE

The 2 Series Coupe is a thoroughbred BMW, and does not use the 2 Series Gran Coupe's platform. In 230i guise it has a 255-hp, turbo four-cylinder, while the M240i gets a 382-hp, turbo inline-six. Both come with rear- or all-wheel drive. The eight-speed automatic is smooth and quick. The 453-hp M2 can be had with a six-speed manual. Even with the base engine the car pulls strongly and the engine sounds lovely, and it manages a commendable 31 mpg overall. Handling is agile, and the ride is taut yet refined. The cabin is nicely finished, and the front seats are comfortable, though the rear seat is tight. For 2023, the infotainment system gets a large, curved screen that serves as the climate and media interface. AEB with pedestrian detection, BSW, and RCTW are standard.

BMW 2 Series Gran Coupe ✓

70 OVERALL SCORE

Don't be misled into thinking the 2 Series Gran Coupe is simply a four-door version of the 2 Series. The Gran Coupe rides on a completely different, less performance-oriented platform that it shares with the X1 small SUV. Nonetheless, it packs a healthy level of BMW DNA and will put a grin on a driver's face when the road gets twisty. The Gran Coupe's front-wheel-drive-based design shows its limitations only when the car is pushed to its limits. The standard 228-hp, 2.0-liter turbo four-cylinder delivers eager power through a responsive eight-speed automatic. Ride comfort is on the stiff side. The rear seat is cramped, and access is awkward. AEB with pedestrian detection, BSW, and RCTW are standard.

BMW 3 Series ✓

85 OVERALL SCORE

The 3 Series blends driving enjoyment, creature comforts, high-tech features, and good fuel economy. The 330i is fitted with a punchy 2.0-liter turbo four-cylinder paired with a smooth and responsive eight-speed automatic. Rear-wheel drive is standard, with all-wheel drive available. Handling is nimble, but the ride is firm. Seat comfort and fit and finish are first-rate. The latest iDrive infotainment system is not as logical as previous versions, and most climate control buttons have been moved into the touchscreen. The M340i uses a 3.0-liter turbo six-cylinder, and a track-ready M3 and a 330e plug-in hybrid are also available. AEB with pedestrian and cyclist detection is standard, while highway-speed AEB and BSW are optional. The 4 Series is a sleeker coupe or convertible version.

BMW 5 Series ✓

83

OVERALL SCORE

The 5 Series is a remarkably satisfying midsized luxury sedan, but one that is no longer the sporty choice of this class. Instead, it's very plush, is super-quiet, has a finely crafted cabin, and is frugal with fuel. The all-wheel-drive 530i we tested rides comfortably and handles responsively. Its turbo four-cylinder engine is paired with a smooth eight-speed automatic and returns an impressive 26 mpg overall, yet it delivers some nice zip. The 540i uses a punchy 3.0-liter turbo six-cylinder that delivers power effortlessly. All-wheel drive is available, and standard on the V8-powered M550i. The 530e plug-in hybrid can go about 20 miles on electric power alone and takes 3 hours to charge on a 240-volt connector. AEB with pedestrian detection, BSW, and RCTW are standard.

BMW 7 Series

NA

OVERALL SCORE

In redesigning the 7 Series BMW also introduced an EV version called the i7. The flagship will be available with twin-turbo inline six-cylinder and V8 engines. The V8-powered 760i xDrive has all-wheel drive. Gas models have an eight-speed automatic and a 48-volt mild hybrid system to optimize fuel economy and support accessories. The AWD i7 is rated for a maximum 318 miles of range. The interior features a curved glass display that contains the 12.3-inch instrument cluster screen and the 14.9-inch infotainment screen, as well as an optional 31-inch screen for the rear seat theater system. The full suite of active safety features, including AEB with pedestrian detection, BSW, and RCTW, is standard. A hands-free highway driving assistance feature that works at speeds up to 85 mph is available.

BMW i4 ✓

84 OVERALL SCORE

The i4 uses a modified platform of the 3 Series. It's a quick, agile and impeccably finished electric sports sedan. The 335-hp rear-wheel-drive eDrive40 has the longest EPA-estimated range of 301 miles. The all-wheel-drive M50, with 536 hp, delivers quick, smooth, quiet and effortless acceleration and impressive handling agility but has a lower range of 270 miles. The ride is taut yet compliant, and the interior is beautifully finished. The i4 is a low-slung four-door, but the hatchback adds versatility. With an acceptance rate of 195 kilowatts at public DC fast-charging venues, the i4 can gain up to 90 miles of range in just 10 minutes. Standard active safety systems include AEB with pedestrian and cyclist detection, BSW, RCTW, and LDW. Adaptive cruise control and lane centering assistance are optional.

BMW iX ✓

85 OVERALL SCORE

BMW's iX SUV showcases the automaker's latest EV technology. The iX xDrive50 has 516 hp and employs two motors to give it all-wheel-drive capability. The EPA-estimated driving range is 324 miles with the 20-inch tires, less with larger tires. The iX glides silently, with very quick acceleration and a comfortable ride. Handling is agile. The airy interior is luxurious and uncluttered, but the controls are not the most intuitive. A 610-hp M60 version with an estimated driving range of 288 miles is also available. BMW says the iX can take a maximum charging rate of 195 kilowatts in public DC fast-charging locations. Charging from empty on 240 volts takes 11 hours, which is not surprising, given the large 111-kWh battery. AEB with pedestrian detection, BSW, and RCTW are standard.

BMW X1 ✓

77 OVERALL SCORE

The BMW X1 is redesigned for 2023, gaining power and features, but the controls are less intuitive. The 2.0-liter turbo is very responsive. The seven-speed dual clutch automatic shifts smoothly but makes the initial take off too jumpy. Unlike most BMW's, the all-wheel-drive X1 is based on a front-wheel-drive platform. The ride is stiff, and handling is fairly agile but not sporty. The new control layout forgoes a central knob and relies on the touchscreen alone. Climate adjustments are done through the screen, which is distracting. The seats are very comfortable, and the cabin has stylish details, such as the floating center console. AEB with pedestrian and cyclist detection is standard, as are BSW and RCTW, which weren't available with the last generation.

BMW X3 ✓

84 OVERALL SCORE

BMW's third-generation X3 has upscale cabin amenities, advanced interior technology, and active safety features. Most X3s are the 30i version, which is powered by a 248-hp, 2.0-liter turbo four-cylinder engine that delivers quick acceleration and returns 24 mpg overall in our tests. The uplevel M40i gets a 382-hp turbo six-cylinder. Both use an eight-speed automatic that is smooth and responsive. The X3 is super-quiet inside, with impeccable fit and finish. Handling is responsive, and the ride is firm yet absorbent. Controls and infotainment tasks take some getting used to but prove to be logical once mastered. The X3 has standard AEB with pedestrian detection, BSW, and RCTW. The X4 is a coupelike version.

BMW X5 ✓

87 OVERALL SCORE

The X5 is one of the best vehicles we've ever tested. The xDrive40i's smooth 335-hp, 3.0-liter turbo six-cylinder engine makes the X5 quick and easy to drive smoothly, yet it gets a decent 23 mpg overall. We don't think there is any need to opt for the V8-powered xDrive50i. The ride is comfortable and impressively steady and composed. The impeccably finished, luxurious cabin is whisper-quiet, and the seats are all-day comfortable. Handling isn't sporty but is very competent. Controls have an initial learning curve but prove to be logical once mastered, and the infotainment system works seamlessly. Standard active safety features include AEB with pedestrian and cyclist detection, BSW, and RCTW. The X6 is a sportier, coupelike version of the X5.

BMW X7 ✓

82 OVERALL SCORE

BMW's luxurious three-row SUV got a fresh new look for 2023, including a new front end with LED headlights and a wide, curved screen that houses the gauges and the climate and infotainment functions, with the same complicated iDrive 8 operating system in the BMW iX. The base xDrive40i gets a turbo inline-six engine with 40 more hp. The eight-speed automatic shifts smoothly. This gem of a powertrain provides punchy acceleration and respectable fuel economy. The comfortable ride is helped by the X7's air suspension, which keeps the body composed, and the handling is remarkably responsive for such a large SUV. The interior is incredibly quiet and richly furnished. The M60i xDrive's V8 gets a mild hybrid system. AEB with pedestrian and cyclist detection, BSW, and RCTW are standard.

BMW Z4 ✓

76 OVERALL SCORE

The Z4 is a sporty two-seat roadster that comes with a 2.0-liter turbo four-cylinder that delivers punchy acceleration, an invigorating exhaust sound, and good fuel economy. A 3.0-liter turbo six-cylinder is also available. The eight-speed automatic shifts with authority, but a manual transmission is not available. The Z4's handling is super-nimble, but it has an incessantly stiff and choppy ride. The powered soft top can open and close in just 11 seconds, and can be done on the move, up to 31 mph. It can also be opened or closed remotely using the key fob. There is minimal wind buffeting inside with the windows up. The iDrive infotainment system takes some time to master, but it proves to be intuitive with experience. AEB with pedestrian detection is standard. BSW and RCTW are optional.

Buick Enclave ✓

76 OVERALL SCORE

Recently freshened, the large Enclave has a revised exterior, and most of the active safety features that were previously optional have become standard. It is a quiet, comfortable, and responsive three-row SUV. Power comes from a lively 3.6-liter V6 teamed with a smooth nine-speed automatic. We got only 18 mpg overall in our tests, however, which is unimpressive. Towing capacity is 5,000 pounds. The roomy cabin is very quiet, and the ride is comfortable, befitting Buick's flagship. The third-row seat is relatively spacious for the class. The infotainment system is easy to use, and connectivity features abound. The new electronic gear selector is improved but still requires looking down at it to select the right gear. AEB with pedestrian detection, BSW, and RCTW are standard.

Buick Encore GX ✓

65 OVERALL SCORE

The Encore GX subcompact SUV is available with a 1.2-liter turbo 3-cylinder hooked up to a CVT on front-wheel-drive versions, or a slightly more powerful 1.3-liter turbo 3-cylinder mated to a nine-speed automatic on all-wheel-drive ones. In our tests we found that the AWD GX pulls strongly, but the engine sounds gravelly and produces some vibrations, especially at low speeds. Handling is responsive and secure, but the ride skews firm. A 2024 freshening brings a new infotainment system, an upscale Avenir version, and a new logo. Many of our testers said the front seats are short on support, the center console cuts into knee space, and the rear seat is tight. Upscale options include a large sunroof and a head-up display. Standard active safety and driver assistance features includes AEB with pedestrian detection. BSW and RCTW are optional.

Buick Envision ✓

73 OVERALL SCORE

The Envision is a pleasant if unexciting compact SUV that is typically priced in the low $40,000s. It uses a responsive powertrain combination of a 2.0-liter turbocharged four-cylinder engine paired to a nine-speed automatic, but fuel economy isn't stellar at 23 mpg overall. Front- and all-wheel drive are available. The Envision rides smoothly and is quiet, although the larger 20-inch tires that come on the top Avenir trim compromise ride comfort. Handling isn't particularly nimble, but it's very secure. The infotainment screen is easy to use, but the push-pull electronic gear selector setup takes getting used to because it's hard to operate without looking down. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Cadillac CT4

64 OVERALL SCORE

The Cadillac CT4 is the only gas-powered compact luxury sedan from an American brand. Its handling, braking, and steering befit a vehicle of its class. The standard engine is a 237-hp, 2.0-liter turbo four-cylinder with an eight-speed automatic. The sportier CT4-V gets a 325-hp, 2.7-liter turbo four-cylinder. The Blackwing version, with a 3.6-liter turbo V6, is a true track-ready rocket ship. Rear- and all-wheel-drive are available. The 2.0-liter engine is responsive, but it doesn't sound particularly refined. Handling is agile, and the ride is taut yet mutes harsh impacts. The front seats are comfortable, but the rear is very cramped. Fit and finish is top-notch. AEB with pedestrian detection, BSW, and RCTW are standard. GM's Super Cruise active driving assistance system is available.

Cadillac CT5

63 OVERALL SCORE

The CT5 midsized luxury sedan drives well, thanks to its agile handling and taut ride. The standard 2.0-liter turbo four-cylinder engine is responsive but noisy. The uplevel choice is a 3.0-liter turbo V6. Both are paired with a 10-speed automatic that tends to delay upshifting, in turn making the engine rev more than it needs to. The supercharged V8-powered Blackwing can be had with a six-speed manual transmission. Rear- and all-wheel drive are available. Controls are easy to use, but it may take time for the electronic gear selector to become second nature. The front seats are very comfortable, but the rear seat is tight on headroom. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW. Cadillac's Super Cruise partially automated driving system is also available.

Cadillac Escalade

57
OVERALL SCORE

The super-roomy, three-row Escalade is much more luxurious and high-tech than its Chevrolet Tahoe and Suburban siblings. The standard 420-hp, 6.2-liter V8 supplies effortless power, and the 10-speed automatic shifts smoothly, though its 16 mpg overall is dismal. A six-cylinder diesel, which gets better fuel mileage, is available. The Escalade's high step-in compromises access, and the tall hood hampers visibility. Handling is ungainly but secure, and the SUV rides comfortably. The plush, quiet, and high-tech interior includes a large infotainment display that's relatively easy to use. AEB with pedestrian detection is standard, but BSW and RCTW aren't. The Super Cruise active driving assistance system is optional. The high-performance V version has a 682-hp, 6.2-liter supercharged V8 and all-wheel drive.

Cadillac Lyriq

NA
OVERALL SCORE

Cadillac's first EV has a sleek profile that looks more like a raised wagon than a typical SUV. While the Lyriq's overall dimensions are similar to those of the XT6 SUV, the EV is lower and wider. Rear-and all-wheel-drive versions are available making 340-hp and 500-hp, respectively, with an EPA estimated range of 312 miles for the RWD version. Both are powered by a 102-kilowatt-hour battery. Home charging can be relatively quick if using an 80-ampere circuit, thanks to the Lyriq's optional 19.2-kW onboard charger, which is more powerful than the ones on most EVs. A maximum acceptance rate of 190 kW at public DC fast-charging locations is also competitive. The Lyriq offers the latest version of the Super Cruise active driving assistance system. Standard active safety and driving assistance features include AEB with pedestrian detection, BSW, and RCTW.

Cadillac XT4

58 OVERALL SCORE

The XT4 is Cadillac's entry-level luxury SUV, and it delivers a classy cabin in a small package. The 235-hp, 2.0-liter turbocharged four-cylinder engine and nine-speed automatic make for a responsive powertrain. But the engine sounds too buzzy when revved. We got 23 mpg overall with premium gasoline, which is unimpressive for the class. The XT4's handling is quite nimble, and even though its ride is on the stiff side, it's on a par with most of its peers. The interior has comfortable seats, and ritzy-looking leather and chrome touches throughout. A 2024 refresh introduces a new infotainment system with curved displays that is borrowed from the Escalade. AEB with pedestrian and cyclist detection, BSW, and RCTW are standard.

Cadillac XT5 ✓

67 OVERALL SCORE

Cadillac's XT5 luxury SUV is neither as sporty to drive as its German competitors nor as pampering as a Lexus RX. It's powered by either a 2.0-liter turbo four-cylinder or a 3.6-liter V6. Both are linked to a nine-speed automatic. With the V6, the XT5 feels lethargic in everyday driving, despite posting decent outright acceleration in our tests; the four-cylinder turbo feels more energetic, in spite of its lower horsepower rating. The XT5 handles soundly, and the ride is firm yet absorbent. Comfortable front seats, excellent fit and finish, and a quiet cabin lend the XT5 a luxurious aura. The controls are easy to use, and the current electronic gear selector is better than the old L-shaped one. AEB with pedestrian detection comes standard; BSW and RCTW are standard on all but the base trim.

Cadillac XT6

61
OVERALL SCORE

Cadillac's three-row midsized SUV has responsive handling and drives like a smaller vehicle than it is. The ride is comfortable but doesn't stand out against competitors. A 2.0-liter turbo engine is standard. Front- and all-wheel drive are available. We tested it with the 3.6-liter V6 and smooth nine-speed automatic, a combination that packs a lot of power for merging and passing. The cabin is quiet and nicely finished, and the seats are comfortable. But the XT6 is short on some luxury niceties, such as four-way adjustable lumbar support for the driver's seat and auto-up rear windows. The infotainment system and other controls are relatively easy to use. AEB with pedestrian detection, BSW, and RCTW are standard. Cadillac's Super Cruise partially automated driving system is also available.

Chevrolet Blazer ✓

75
OVERALL SCORE

The Blazer midsized SUV seats five passengers but is focused more on styling and comfort and less on utility. Most versions get a 2.0-liter turbocharged four-cylinder that supplies ample power. A V6 comes on the sportier RS, but fuel economy is just 19 mpg overall. The Blazer rides and handles well, and is quiet. Controls are easy to use, but the low dash vents direct air to front occupants' knees and elbows instead of their upper body. Rearward visibility is restricted because of the sloping roofline and thick rear roof pillars. AEB with pedestrian detection is standard. BSW and RCTW are available on all but the base trim. For 2023 a 10-inch center screen is standard, and adaptive cruise control is more widely available. An electric version is coming soon.

Chevrolet Bolt

49 OVERALL SCORE

The Bolt is one of the most affordable electric vehicle options. It can travel 259 miles on a fully charged battery, as estimated by the EPA, which is competitive even among more expensive options. DC fast-charging capability is standard, but the Bolt's maximum acceptance rate of 55 kilowatts is slow by current standards. Recent updates to the interior gave it more comfortable front seats and added soft-touch materials for a more upscale feel. The infotainment system and gear selector are also now easier to use. While AEB with pedestrian detection is standard, BSW, RCTW, and adaptive cruise control are optional.

Chevrolet Bolt EUV

45 OVERALL SCORE

The Bolt EUV (electric utility vehicle) is a taller, roomier version of the Bolt EV. The regular Bolt and the EUV have the same 200-hp electric motor that drives the front wheels, making for zippy acceleration. But the EUV lacks available all-wheel drive and extra cargo space, both of which are desirable SUV-like attributes. Compared with the original Bolt, the EUV has a noticeably more comfortable ride but also slightly diminished handling agility. The EUV's 247-mile EPA-rated driving range is robust. It took us more than 8 hours to charge it from near-empty on a 240-volt connection, which is pretty typical for EVs. AEB with pedestrian detection is standard, but BSW and RCTW are optional on the base model. GM's Super Cruise active driving assistance system is available.

Chevrolet Camaro

60 OVERALL SCORE

The Camaro possesses impressive handling agility and sharp steering. The optional magnetic ride suspension does an impressive job of keeping the Camaro composed on rough roads. The manual shifter has light, precise throws. Base models use a 275-hp, turbo four-cylinder engine, and the 3.6-liter V6 makes 335 hp. For the SS, Chevrolet transplanted the ferocious 6.2-liter V8 from the previous-generation Corvette. Transmission choices are a six-speed manual, and eight-speed and 10-speed automatics. Outward visibility is downright atrocious, and the rear-seat room is extremely tight. A mighty ZL1 version, powered by a 650-hp, 6.2-liter supercharged V8 engine, is also available. The Camaro has no standard active safety features. BSW and RCTW are optional.

Chevrolet Colorado

NA OVERALL SCORE

Looking much like the full-sized Silverado, the redesigned midsized Colorado pickup truck comes only in a crew-cab, short-bed configuration with a turbocharged four-cylinder engine producing 237 or 310 hp, and an eight-speed automatic. There is a choice of rear- or four-wheel drive. Competing directly with the Ford Ranger, the line has three trims (out of five) that are offered strictly in 4WD, each with a rising level of capability. Every Colorado features an 11-inch infotainment screen, with related apps for off-roading and trailering. All versions are equipped with Chevy Safety Assist, which includes AEB with pedestrian detection, LKA, LDW, and automatic high beams. BSW and RCTW are optional.

Chevrolet Corvette ✓

87
OVERALL SCORE

The eighth-generation Corvette uses a mid-engine design, with its 495-hp, 6.2-liter V8 visible under the rear glass hatchback. It's coupled to a rapid-shifting eight-speed, dual-clutch automatic that contributed to its 3.4-second sprint from 0 to 60 mph. Handling agility is superlative, with immediate turn-in response and almost zero body roll, which will make drivers constantly grin from ear-to-ear. Yet the ride isn't punishing, thanks in part to the optional adaptive suspension. Rear and side visibility, as well as cabin access, is severely hampered. The front trunk is small, but the cargo area aft of the engine can hold the removable targa top and a soft-sided bag or two. BSW and RCTW are optional, but AEB isn't available. The high-performance Z06 model returns with a new 670-hp, 5.5-liter V8.

Chevrolet Equinox ✓

67
OVERALL SCORE

The Equinox is one of the roomiest compact SUVs available, and offers the latest infotainment and safety technology. The sole engine is a lackluster 1.5-liter turbo four-cylinder with a six-speed automatic. We found that the ride absorbed bumps and pavement imperfections very well. Handling is responsive and secure. The cabin is quiet, and the controls are straightforward to use, including Chevrolet's latest infotainment system. Even though the interior has some cheap touches, the seats are quite comfortable. AEB with pedestrian detection is standard, but BSW and RCTW are optional. An electric Equinox is coming soon.

Chevrolet Malibu

62 OVERALL SCORE

Chevrolet's Malibu stands out among midsized sedans for its comfortable ride and quiet, spacious cabin. Handling is respectable, too. But it soldiers on mostly unchanged while many rivals have been redesigned. Two turbo four-cylinder engines are offered. We tested the 1.5-liter turbo with a six-speed automatic and got 29 mpg overall. A continuously variable transmission is now standard. The uplevel engine is a more powerful and refined 2.0-liter turbo mated to a nine-speed automatic. Up front is a comfortable cockpit and an updated version of Chevrolet's infotainment system. But the cloth seats provide less back and leg support than the leather seats. The roomy rear seat lets passengers stretch out. For 2023, AEB with pedestrian detection became standard.

Chevrolet Silverado 1500

50 OVERALL SCORE

The Chevrolet Silverado 1500 received recent updates that brought a fresh interior, off-road-focused models, and the Super Cruise active driving assistance system with trailering support. We found that the Silverado delivers smooth, responsive power from its 5.3-liter V8 engine, returning 17 mpg overall for the crew-cab four-wheel-drive version. A 3.0-liter six-cylinder diesel engine, with a 10-speed automatic, gets an impressive 23 mpg overall. The ride is steady, and the cabin is very quiet. Handling is sound and secure. Rear-seat room in crew-cab versions is immense, but the high step-in requires a climb. Trim variants, such as the ZR2 and High Country, run the gamut from an off-road special to a luxury chariot. AEB with pedestrian detection is standard, but BSW and RCTW are optional.

Chevrolet Suburban

55
OVERALL SCORE

This generation Suburban has an independent rear suspension, which improves ride comfort and handling, as well as increased third-row room. The standard 5.3-liter V8 is mated to a 10-speed automatic, and together they deliver plenty of predictable and smooth power. While the standard suspension delivers a comfortable ride, handling can feel ponderous. The Premier trim's electromagnetic dampers make the SUV feel more composed and responsive. The cabin is noticeably quiet, and the controls are easy to use, except for the tricky gear selector. It's a big step up to get into the Suburban, and the tall hood hurts forward visibility. AEB with pedestrian detection, LDW, and LKA are standard, but BSW and RCTW are optional. For 2023, Super Cruise is available on the higher trims.

52
OVERALL SCORE

Like the Suburban, the Tahoe's independent rear suspension improves ride comfort, handling, and third-row room. This massive vehicle is also very functional, comfortable, and high-tech. The standard 5.3-liter V8 and 10-speed automatic deliver plenty of predictable power. With the standard suspension the ride is comfortable, but handling is ponderous. The Premier trim's electromagnetic dampers significantly improve both the ride and handling. The enormous cabin is super-quiet. Controls are very easy to use, except for the tricky gear selector. It's a big step up to get into the Tahoe, and the tall hood cuts forward visibility. AEB with pedestrian detection, LDW, and LKA are standard, but BSW and RCTW are optional. For 2023, the Super Cruise system is available on higher trims.

Chevrolet Trailblazer ✓

70 OVERALL SCORE

Chevrolet's Trailblazer subcompact SUV slots between the Trax and the Equinox. It shares a platform and powertrain with the Buick Encore GX. Like the GX, base models get a 1.2-liter turbo three-cylinder, while upper trims and all-wheel-drive versions come with a 155-hp, 1.3-liter turbo engine and nine-speed automatic. This latter engine is responsive and fuel-efficient. For its small footprint, the Trailblazer provides ample room, but thick roof pillars and the lack of a third side window compromise rear and side visibility. The ride is decent, but handling is rather clumsy. Road noise is pronounced. A new 11-inch infotainment system is part of a refresh for 2024. Standard active safety features include AEB with pedestrian detection, but BSW and RCTW are optional.

Chevrolet Traverse ✓

78 OVERALL SCORE

The midsized Traverse's roomy and quiet interior, very comfortable ride, and responsive handling make it a viable alternative to full-sized SUVs, such as the Tahoe. It's also a competent challenger to established three-row midsized SUVs. The 3.6-liter V6 engine supplies quick acceleration and gets 20 mpg overall. The front seats and the second-row captain's chairs are comfortable, and the third row is roomy. An eight-passenger configuration with a second-row bench seat is available on lower trims. We like the intuitive infotainment system, but manual sunroof shades feel out of place in the$50,000 Premier trim. The Traverse got recent updates that brought standard AEB with pedestrian detection and a more user-friendly gear selector.

Chevrolet Trax

NA
OVERALL SCORE

The Trax has been redesigned and arrives this year as a 2024 model. Almost a foot longer than its predecessor, it is now one of the biggest SUVs in a class that includes the Kia Seltos and Nissan Kicks. The only available powerplant is a 1.2-liter three-cylinder turbo engine and a six-speed automatic transmission that sends power to the front wheels. All-wheel drive is not available. The exterior is modeled on the Blazer, with a prominent grille and slim LED daytime running lights. The tidy interior is roomier than in the previous Trax and features straightforward climate controls and a traditional shift lever. The new Trax finally gets standard AEB with pedestrian detection. BSW and RCTW are optional.

Chrysler 300 ✓

76-77
OVERALL SCORE

It's the end of an era, as 2023 marks the final year for the roomy and luxurious 300. There's plenty of space for five adults in the comfortable cabin. The powerful 5.7-liter V8 gets 20 mpg overall, but we prefer the 3.6-liter V6, which is plenty strong and got a decent 22 mpg overall in our tests. For the grand finale the 300C will be available with a 6.4-liter V8. All engines use a smooth eight-speed automatic. All-wheel drive is available with the V6. The 300's stately ride, responsive handling, and quiet cabin make it feel like a bargain luxury car. The Uconnect infotainment system is easy to use. The last freshening brought an electronic gear selector knob and a big information screen within the gauge cluster. AEB, BSW, and RCTW are optional, but pedestrian detection isn't available.

Chrysler Pacifica

46
63
OVERALL SCORE

The Pacifica minivan is offered in seven- and eight-passenger configurations, and it is distinguished by handy fold-into-the-floor second-row seats that make it easy to carry big, bulky items. The 3.6-liter V6 engine, paired with a nine-speed automatic, provides plenty of power and gets a decent 21 mpg overall. The plug-in hybrid version can cover 30 miles on electric power before transitioning to regular hybrid operation where it gets 27 mpg. All-wheel drive is available for the non-hybrid model. Handling is responsive, with the van tackling corners like a well-tuned midsized sedan. The suspension delivers a comfortable, composed ride, and the cabin is quiet. The Pacifica uses the Uconnect infotainment system, which is one of the best available. Standard active safety equipment includes AEB with pedestrian detection, BSW, and RCTW.

Dodge Challenger

64
OVERALL SCORE

The old-school Challenger is a modern-day muscle car. It's too heavy and wide for pinpoint handling on narrow roads, but it's balanced and enjoyable on an open track. The V8 sound is music to an enthusiast's ears. Ride comfort, noise isolation, and the six-speed manual transmission's stiff shifter and clutch detract from the overall driving experience, and the view out to any direction is dreadful. The rear seat is relatively roomy, but getting in and out is awkward. The trunk is quite large. Engine choices range from a mild V6 up to a 6.2-liter supercharged V8, but we think the best choice is the 5.7-liter V8. All-wheel drive is optional with the V6. An eight-speed automatic is available. BSW and RCTW are optional, but AEB with pedestrian detection isn't available. 2023 is the Challenger's final year.

Dodge Charger ✓

76 OVERALL SCORE

Like its cousin, the Chrysler 300, the Charger is a big, comfortable cruiser with an array of technology on tap. The Charger delivers a comfortable ride, and the quiet cabin is well-equipped, which makes the car a bargain luxury sedan. The 3.6-liter V6 and eight-speed automatic work well, and the 370-hp, 5.7-liter Hemi V8 packs more punch at the expense of fuel economy. The power-mad can have a 485-hp, 6.4-liter V8 or the Hellcat's 797-hp supercharged V8. All-wheel drive is optional on mainstream V6 versions. Rear visibility is restricted, and the lift-up door handles are an outdated inconvenience. The well-designed Uconnect touchscreen infotainment system is optional. AEB, BSW, and RCTW are optional, but pedestrian detection isn't available at all. 2023 is the Charger's final year.

Dodge Durango

63 OVERALL SCORE

Spacious, quiet, and comfortable, the Durango impressively blends workhorse utility with lots of creature comforts. This three-row midsized SUV shares its platform with the previous-generation Jeep Grand Cherokee. Handling is responsive. The ride is composed and comfortable, making the Durango feel sophisticated and substantial. The slick eight-speed automatic helps make for smooth and prompt power delivery. Most buyers will be satisfied with the V6 engine. The optional Uconnect infotainment system is one of the best, with intuitive operation. Cargo room is generous, and the Durango can tow 1,000 to 2,000 pounds more than competitors. Limited visibility is a downside. AEB with pedestrian detection is not offered. BSW and RCTW are standard.

Dodge Hornet

NA
OVERALL SCORE

Fitting with the brand's muscle car image, Dodge is positioning the small Hornet as a performance-oriented sporty compact SUV. It shares components with the new Alfa Romeo Tonale, itself based on the Jeep Compass. The base GT packs a 268-hp 2.0-liter turbo four-cylinder engine with a nine-speed automatic strting at around $30,000. The R/T plug-in hybrid nets 288-hp combined, powered by a 1.3-liter turbo four-cylinder paired with a six-speed automatic that works in conjunction with its electric drive will come later. It has a 30-mile electric-only range before transitioning to regular hybrid operation. Both versions have standard AWD. The Hornet comes standard with FCW, AEB with pedestrian and cyclist detection, BSW, and RCTW. A driver attention monitor and adaptive cruise control are optional.

Fiat 500X

38
OVERALL SCORE

The 500X is the only Fiat model still available in the U.S. While its styling may be cute, the SUV's appeal wanes as drivers spend more time with the 500X, thanks to its stiff ride, noisy cabin, restricted visibility, annoying vibration when idling, and unsupportive seats. This sibling vehicle to the Jeep Renegade shares some of the same virtues and weaknesses. Both have a nine-speed automatic that is neither smooth nor responsive. When we tested it with the old 2.4-liter engine, its fuel economy was unimpressive. The current 1.3-liter turbo engine is likely to improve that by 1 or 2 mpg. At least the interior has some flair. New for 2023, AEB with pedestrian detection is standard. BSW and RCTW are still optional.

Ford Bronco

52 OVERALL SCORE

The boxy Bronco comes in two- and four-door configurations, with a standard soft top and an available removable hardtop. All versions have 4WD and removable doors. A 2.3-liter four-cylinder turbo is standard; the 2.7-liter turbo V6 we tested delivers strong power. Ride and handling are fairly refined, yet off-road ability is superb, thanks to a rear locking differential, plenty of ground clearance, and short overhangs. A camera projects your path on the infotainment screen and helps with front-tire placement off-road. Wind noise is very pronounced even with the hardtop, and stopping distances are quite long. The extreme Raptor version has a 418-hp, twin-turbo 3.0-liter V6 and a beefier off-road suspension. While AEB with pedestrian detection is standard, BSW and RCTW are optional.

Ford Bronco Sport

57 OVERALL SCORE

The Bronco Sport is a beefier version of the Escape compact SUV that has rugged styling cues. With its increased ground clearance and shorter overhangs than the Escape, the Bronco Sport is fit for mild off-roading. The highest trim takes it further, with a more capable four-wheel-drive system and all-terrain tires. Most versions come with a 181-hp, turbo three-cylinder that packs decent punch but vibrates annoyingly at very low revs. Higher trims get a 245-hp, turbo four-cylinder that's much more refined. An eight-speed automatic and four-wheel drive come standard. The ride is quite firm, but handling is taut and agile. The controls are very easy to use, including the infotainment system. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Ford Edge ✓

78
OVERALL SCORE

The Edge is a roomy and capable SUV. Most versions come with the standard 2.0-liter turbo four-cylinder and eight-speed automatic. This combination provides smooth, quiet acceleration. The sportier ST trim gets a turbocharged V6 and all-wheel drive. The spacious interior provides comfortable quarters, front and rear, and cargo room is generous. However, the driving position is uneven because the left footrest sits too close to the driver. High-end versions like the Titanium, for instance, can rival some luxury SUVs with a quiet cabin, a steady ride, agile handling, and impressive feature content. Ford's Sync 4 infotainment system, with its large 12-inch touchscreen, is standard equipment. AEB with pedestrian detection, BSW, and RCTW are standard.

Ford Escape

59
OVERALL SCORE

The Escape is a competitive small SUV, but only the hybrid version is reliable. We got 26 mpg overall in our tests of the standard 1.5-liter turbo three-cylinder. Although it provides sufficient oomph, it has an annoying vibration at low engine speeds. The optional 2.0-liter turbo four-cylinder is smoother and more powerful. The Escape's ride has an underlying firmness but is steady and composed. Handling is nimble and secure, but the brake pedal is oversensitive. 2023 brings some exterior styling changes along with an optional 13.3-inch infotainment screen with touch-based climate controls. The controls on lower trims are easier to use. The firm front seats are flat and don't provide much support, but the rear seat is quite roomy when set to the rearmost position. AEB with pedestrian detection, BSW, and RCTW are standard.

Ford Escape Hybrid ✓

73 OVERALL SCORE

The Escape hybrid version gets an impressive 34 mpg overall in our tests, and can propel itself on electric power alone at low speeds and during coasting, and the power is very accessible up front. There's also a front-wheel-drive plug-in hybrid with a 37-mile electric range. Like the regular Escape, the hybrid's ride has an underlying firmness but is steady and composed. Handling is nimble and secure, but the brake pedal is oversensitive. Controls, including the rotary gear selector, are easy to use. The firm front seats are flat and don't provide much support, but the rear seat is quite roomy when set to the rearmost position. All Escapes have standard AEB with pedestrian detection, BSW, and RCTW.

Ford Expedition

60 OVERALL SCORE

The Expedition is a huge SUV with modern convenience and active safety features. The sole engine option, a 3.5-liter turbo V6 mated to a 10-speed automatic, provides effortless motivation. We got 16 mpg overall, which is on a par with this class. Handling is ungainly, and the ride is somewhat stiff. The cabin is quiet, and the third-row seat is truly suitable for adults. The second- and third-row seats can be folded flat with the push of a button to create an enormous cargo area. A recent refresh introduced Ford's latest Sync 4 infotainment system, with either a standard 12-inch display or an optional 15.5-inch display. Ford's BlueCruise active driving assistance system comes standard on the Platinum trim. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Ford Explorer

49 OVERALL SCORE

The Explorer has a spacious cabin and is relatively agile among three-row midsized SUVs, but the driving experience is marred by a clunky transmission, noisy engine, and stiff-edged ride. Most versions use the base 2.3-liter turbocharged four-cylinder engine, which is energetic but sounds raspy. Plus, the transmission has rough shifts, particularly at low speeds. In our tests this combination returned an unimpressive 21 mpg overall. A hybrid is also offered but is focused more on power and towing capabilities than fuel economy. The controls and infotainment system are very easy to use. The third row is tight, as is common for the class. A power liftgate is standard. The standard Ford Co-Pilot360 suite of active safety features includes AEB with pedestrian detection, BSW, a RCTW.

Ford F-150

45-58 OVERALL SCORE

The F-150's cabin is very quiet, and the crew-cab versions we tested are super-roomy. The 2.7-liter turbo V6 provides effortless acceleration and a respectable 19 mpg overall. The PowerBoost hybrid version has loads of power and gets 20 mpg overall. The ride is still stiff, and handling is ponderous. Controls are straightforward, but the interior is spartan. Ford's Sync 4 infotainment system is very easy to use. Clever features include a foldaway gear selector that creates a flat workspace, a tailgate designed to serve as a workbench, and an optional built-in generator to power tools. AEB with pedestrian detection is standard. BSW and RCTW are optional. Ford's BlueCruise active driving assistance system is available. A Raptor R with a 700-hp, 5.2-liter supercharged V8 is new.

Ford F-150 Lightning

65 OVERALL SCORE

This F-150 EV comes only as a crew cab and offers two power levels, 452 and 580 hp. The standard-range battery has an EPA-estimated range of 240 miles, and the extended-range battery is rated at 320 miles. Maximum acceptance rate at a DC fast-charging place is a competitive 150 kilowatts. The truck has prodigious power, and acceleration is whisper-quiet. With independent rear suspension the Lightning rides much more comfortably than the regular F-150, though handling is lumbering. Inside is a giant screen for the easy-to-use infotainment system. The power-operated hood reveals a large front trunk. The standard-range Lighting has a 2,235-pound payload capacity, and the extended-range truck can tow up to 10,000 pounds. AEB with pedestrian detection, BSW, and RCTW are standard.

Ford Maverick ✓

78-80 OVERALL SCORE

The nonhybrid Maverick pickup trucks use an optional 250-hp turbo four-cylinder mated to an eight-speed automatic, with front- or all-wheel drive. This powertrain gives robust acceleration, can tow up to 4,000 pounds, and gets 23 mpg overall, but its tendency to lug along at low revs sends annoying vibrations into the cabin. The hybrid can tow 2,000 pounds and comes with front-wheel drive only, but it we measured an impressive 37 mph overall. The ride is refined for a pickup truck, and handling is very secure. Maneuverability, access, and visibility are commendable, and the controls are super-easy. However, the gas-only truck is loud (the hybrid is quieter), and the interior ambience is utilitarian. The 4.5-foot-long bed is deep enough to be practical and is very easy to reach into. AEB with pedestrian detection comes standard. BSW and RCTW are optional.

Ford Mustang

63-68 OVERALL SCORE

A redesigned 2024 Mustang goes on sale this summer. Changes center around freshening the appearance, adding safety technology, and edging up horsepower. The current Mustang combines a thrilling driving experience with everyday livability. Its V8 delivers a throaty and satisfying engine and exhaust sound. The base turbo 2.3-liter four-cylinder is less exciting. The manual transmission complements the car best, but the automatic works well, too. Handling is balanced and controlled, and the ride is taut. The front seats are supportive but lack a power-recline feature. The rear seat has room for groceries but little else. A convertible is also available. AEB with pedestrian detection, BSW, and RCTW come standard on most versions.

Ford Mustang Mach-E

66 OVERALL SCORE

The Mach-E is Ford's first designed-from-the-ground-up EV. With styling cues from the iconic Mustang muscle car, this five-passenger SUV has useful cargo room, and is available with all-wheel drive. The extended-range battery version with all-wheel drive has a 270-mile range. On a 240-volt home charger, it takes about 10 hours to fill the 88-kWh battery from empty. The Mach-E is quick and quiet, with taut and agile handling, all of which make it fun to drive. The ride is jittery and unsettled, however. A 15.5-inch vertical touchscreen dominates the stark interior; the system has a steep learning curve before familiarity sets in. All Mach-Es have standard AEB with pedestrian detection, BSW, and RCTW. The BlueCruise active driving assistance system is available.

54
OVERALL SCORE

The Ranger midsized pickup truck offers modern entertainment and safety technologies, but its ride is stiff and choppy, and handling is clumsy. The 2.3-liter turbo charged four-cylinder is mated to a 10-speed automatic. This combination makes the Ranger feel responsive, but engine noise is quite pronounced at low speeds. The optional Sync 3 infotainment system is easy to use, but other controls aren't as well-designed. It can be hard to get into the Ranger because of the high floor. There are two cab configurations: an extended cab and a crew cab. The Tremor package includes special off-road suspension components. AEB with pedestrian detection is standard. BSW and RCTW are optional on the base XL trim but standard on others.

Genesis G70 ✓

70
OVERALL SCORE

The Genesis G70 sports sedan has a standard 252-hp turbo four-cylinder engine that feels energetic in normal driving, even though its instrumented acceleration time is among the slowest in the class. In our test of an all-wheel-drive version, we got 23 mpg overall, which isn't particularly good, either. The uplevel 365-hp turbo V6 is quieter and makes the car much quicker. The G70 has agile handling and a taut, controlled ride. However, stopping distances are long. The car is quiet, and the interior is well-assembled. Access can be tough because of the car's low stance, and the cabin is very cramped, particularly the back seat. The 10.25-inch infotainment system is mostly straightforward and plenty of physical knobs and buttons make other features easy to use. AEB with pedestrian detection, BSW, and RCTW are standard.

Genesis G80 ✓

84 OVERALL SCORE

This formidable competitor to other luxury midsized sedans comes standard with a responsive 300-hp, 2.5-liter turbo four-cylinder. Combined with a slick-shifting eight-speed automatic, this pairing returned a just so-so 24 mpg overall in our tests. Rear- or all-wheel drive is available. There's also a punchy 375-hp, 3.5-liter turbo V6. New for 2023 is a fully electric version with 365 hp from dual motors and an EPA-rated 282-mile range. The ride is plush, handling is sharp, and braking is top-notch. Fit and finish is impressive yet understated. The cabin is roomy, and the seats are comfortable in the front and rear. However, the infotainment system is overcomplicated, and the unintuitive gear selector is tricky to use. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Genesis G90

NA OVERALL SCORE

The redesigned 2023 G90 adds in abundant luxury and technology features. Two engines are available: a stout 375-hp, 3.5-liter turbo V6, and a more powerful 409-hp version with an electric supercharger. The supersmooth eight-speed automatic complements both. The G90 rides very comfortably, mopping up every bump and rut with its supple suspension. Handling is responsive, thanks in part to available rear-wheel steering. The cabin is beautifully finished and is designed to pamper, with massaging seats, soft-closing doors, and a high-quality sound system. Top versions have a reclining rear seat for those who would rather be chauffeured. A complete suite of active safety features is standard, and the active driving assistance system is able to change lanes.

Genesis GV60 ✓

84 OVERALL SCORE

The GV60 is one of the best EVs, thanks to its smooth acceleration, comfortable ride, agile handling, and stylish interior. It has an EPA-rated 248-mile range from its 77.4-kWh battery and comes standard with AWD. Like its siblings, it can charge more quickly than other EVs when using DC fast charging in public places. The controls are slightly easier to use than the overly complicated setups found in other Genesis models, and there are some interesting features, such as a retractable gear selector in the shape of a crystal ball, facial recognition to unlock the car, and a fingerprint reader to turn the vehicle on. Rear and side visibility are compromised because of the car's swoopy styling. AEB with pedestrian and cyclist detection, BSW, RCTW, and lane centering assistance come standard.

Genesis GV70 ✓

76 OVERALL SCORE

The GV70 more than holds its own in the compact-luxury-SUV segment. The standard 2.5-liter turbocharged four-cylinder engine is punchy and polished, and yields a competitive 24 mpg overall. The 375-hp turbo V6 is smoother, but it seems unnecessary, given the base engine's strong performance. The GV70 is taut and agile, with sports-sedan-like handling, yet the ride is pliant and composed. All-wheel drive is standard. The lavishly furnished cabin is impressive, and the seats are comfortable and supportive. Despite the angled roofline, rear-seat room is decent but rear visibility is hampered. The controls are unintuitive and distracting, including the rotary gear selector. AEB with pedestrian detection, BSW, and RCTW are standard. An electrified GV70 is also available.

Genesis GV80

64
OVERALL SCORE

The GV80 midsized SUV from Hyundai's luxury brand competes on an equal footing with some esteemed competitors. It is quick, quiet, beautifully appointed, and enjoyable to drive. The standard engine is a 2.5-liter turbo four-cylinder, and the uplevel engine is a punchy 3.5-liter turbo V6. The latter delivers effortless power, but it's not very fuel-efficient. All-wheel drive is standard for 2023. The GV80 has sharp steering and feels taut and agile through corners, yet the ride is comfortable and composed. The interior is finely crafted, but the infotainment system's controller dial is tricky to use. A very small third-row seat is available. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW with reverse AEB.

GMC Acadia ✓

66
OVERALL SCORE

The Acadia is a very pleasant midsized three-row SUV, particularly in the upscale Denali trim. The ride is steady and composed, and handling is responsive. A turbocharged four-cylinder is standard. We tested the smooth 3.6-liter V6, which returned just 19 mpg overall. Both engines get a nine-speed automatic. This family-friendly SUV is very quiet, the front seats are comfortable, and the infotainment system is easy to use, but the push-button gear selector is fussy. The outboard second-row seats can slide and tilt forward, even with a child seat in place. The AT4 version is somewhat off-road-oriented, with more aggressive wheels, a skid plate, and a hill-descent mode. AEB with pedestrian detection, BSW and RCTW are standard.

GMC Canyon

NA
OVERALL SCORE

A twin to the Chevrolet Colorado, the 2023 redesigned Canyon is positioned as slightly more upscale. Like the Chevrolet, the Canyon is available only as a crew cab. It's powered by a 310-hp, turbocharged four-cylinder engine paired to an eight-speed automatic. Buyers get a choice of rear- or four-wheel drive. For off-road use, several trims provide progressively increased ground clearance and capability, culminating in the new AT4X. Every truck features an 11-inch infotainment screen, with related apps for off-roading and trailering. All Canyons are equipped with standard AEB with pedestrian detection, and automatic high beams. BSW and RCTW are optional.

GMC Hummer EV

NA
OVERALL SCORE

The Hummer name is back with an all-new electric SUV and pickup truck. Both promise off-road-ready performance with sports-car-quick acceleration. They feature removable glass roof panels for an open-air driving experience and the ability to 'crab walk' (move diagonally) when negotiating trails. GM's Super Cruise driver assistance system will also be available. First out of the gate is the full-featured Edition 1 pickup truck boasting 1,000-hp and promising 350-plus miles of range. All Hummer pickups will have five seats, four doors, and a 5-foot pickup bed with a power tonneau cover and multifunction tailgate. The SUV follows later, with top output being about 830-hp. Over the following two years, other less expensive versions of each will be offered with reduced power and range.

GMC Sierra 1500

50 OVERALL SCORE

The Sierra's recent updates include a fresh interior, new trim levels, more safety features, and the availability of the Super Cruise active driving assistance system. Power delivery is smooth and responsive, the ride is steady, the cabin is very quiet, and handling is sound and secure. Our four-wheel-drive crew cab got 17 mpg overall from the 5.3-liter V8 engine, and a 3.0-liter turbodiesel six-cylinder got an impressive 23 mpg overall in our tests. Rear-seat room in crew-cab versions is immense, but the truck's height requires climbing in. Among the helpful options are a power tailgate and power running boards that can shift rearward to help you reach the bed. Top trims get a 6.2-liter V8 mated to a 10-speed automatic. AEB with pedestrian detection, LDW, and LKA are standard. BSW and RCTW are optional.

GMC Terrain

NA OVERALL SCORE

The Terrain was recently freshened with exterior updates and an outdoorsy AT4 version. It is a corporate cousin of the Chevrolet Equinox, but a few critical differences compromise it, even though it is positioned as a more premium offering. We found it to be loud and stiff-riding, with severely hampered visibility. The only available engine is a 175-hp, 1.5-liter turbo four-cylinder that is mated to a nine-speed automatic. The Terrain's gear selector is controlled by dash-mounted push buttons that are unintuitive to operate. The infotainment system, on the other hand, is one of the easier ones to use. AEB with pedestrian detection is standard; BSW and RCTW are optional.

GMC Yukon

52 OVERALL SCORE

Like its Chevrolet siblings, the Yukon's independent rear suspension improves ride comfort, handling, and third-row room. The standard 5.3-liter V8 is mated to a 10-speed automatic, and that powertrain supplies plenty of predictable, uninterrupted power. The ride is comfortable, although it's steadier in the Denali version, with its standard magnetic ride suspension. Handling is secure though ponderous. The enormous cabin is almost eerily quiet. Cargo capacity is generous, weakening the case for the even larger Yukon XL. Controls are very easy to use, except for the tricky electronic gear selector, and the tall hood cuts forward visibility. AEB with pedestrian detection is standard, but BSW and RCTW are optional. For 2023, GM's Super Cruise active driving assistance system is available.

GMC Yukon XL

52 OVERALL SCORE

Like its smaller sibling, the Yukon XL now has an independent rear suspension that improves ride comfort, handling, and even third-row room. The standard 5.3-liter V8 is mated to a 10-speed automatic, and that powertrain supplies plenty of power. The Denali trim's electromagnetic suspension dampers provide a more composed ride than the already good standard suspension. Handling is relatively ponderous. The enormous cabin is quiet, and the controls are easy to use, except for the tricky electronic gear selector. It's a big step up to get into the Yukon XL, and the tall hood hurts forward visibility. AEB with pedestrian detection is standard, but BSW and RCTW are optional. Updates for 2023 include the availability of the Super Cruise active driving assistance system on higher trims.

Honda Accord

NA OVERALL SCORE

The Accord is treated to an evolutionary redesign for the 2023 model year, growing in size, adding convenience features, and bolstering its safety feature roster. The punchy 2.0-liter turbo is replaced by a hybrid powertrain as the uplevel engine choice. The LX and EX use an updated 192-hp, 1.5-liter turbo four-cylinder. All other versions have a 204-hp hybrid. Top trims feature Honda's largest-ever touchscreen with a 12.3-inch display. AEB with pedestrian detection, and adaptive cruise control are all standard. It's unfortunate that BSW and RCTW are standard only on upper trims. There is a standard rear seat belt reminder, and a rear-seat reminder to warn of a child or pet potentially left behind.

Honda Civic ✓

74 OVERALL SCORE

The Civic's standard 2.0-liter four-cylinder has adequate power and gets 33 mpg overall. Handling is nimble and secure, but the ride is stiff and choppy, and the elevated road noise gets tiring on trips. The top Touring trim has better sound insulation and uses a more powerful 1.5-liter turbo engine, but it's pricier. The only available drivetrain on the sporty Si version is a 200-hp turbo engine with a six-speed manual, which returns an impressive 32 mpg overall. The Civic's cabin is relatively roomy, but the car's low-slung stance makes it awkward to get in and out. The infotainment system is very easy to use, with plenty of physical knobs and buttons. While AEB with pedestrian detection is standard, it's unfortunate that BSW and RCTW are available only on the top trims.

Honda CR-V ✔

84 OVERALL SCORE

Honda redesigned the CR-V for 2023 but didn't stray far from its proven formula of practicality. The 1.5-liter turbo engine that's mated to a CVT delivers unobtrusive propulsion but feels a bit underpowered. At 26 mpg overall, fuel economy is no longer a standout. The more fuel-efficient hybrid version combines a 2.0-liter engine with an electric drive. The ride is firm but absorbent, and handling is responsive and secure. The rear seat is generous and easy to get into, thanks to a wide swinging door. Its relatively simple, boxy shape gives it ample cargo room.. All controls and the infotainment system are easy to use. Standard active safety and driving assistance features include a driver attention monitoring system and a rear-seat reminder, as well as AEB with pedestrian detection, BSW, and RCTW.

Honda HR-V ✔

73 OVERALL SCORE

The redesigned-for-2023 HR-V is a more pleasant vehicle than the last model, with a roomy interior, user-friendly controls, and 27 mpg overall fuel economy. But the improvements to the ride quality and sound insulation don't go far enough. Handling is ordinary but ultimately secure. We found that the 158-hp, 2.0-liter engine and CVT feel underpowered. There's plenty of headroom up front, and visibility over the hood is good, but the front seats lose support after about 30 minutes of driving. The controls and infotainment system are very easy to use. The LX and Sport get a 7-inch touchscreen, while the top EX-L gets a 9-inch screen. AEB with pedestrian and cyclist detection, LDW, and LKA are standard. BSW and RCTW are standard on the Sport and EX-L but unavailable on the base LX.

Honda Odyssey ✓

77 OVERALL SCORE

The Odyssey blends refinement, quietness, and convenience in a practical package. Its interior is very flexible, with the ability to slide the second-row outboard seats sideways. The 280-hp, 3.5-liter V6 engine supplies plenty of power and is teamed with a slick 10-speed automatic. The engine is smooth, punchy, and hushed. The ride is very comfortable, the cabin is quiet, and handling is sound. However, the push-button gear selector takes getting used to, the decent fuel economy is no match for the Toyota Sienna hybrid, and unlike the Sienna and Chrysler Pacifica, the Odyssey isn't available with all-wheel drive. The 8-inch infotainment touchscreen is slow to respond and can be distracting. Key active safety features are standard on all trims. BSW and RCTW became standard for 2023.

Honda Passport ✓

76 OVERALL SCORE

The Passport is a shorter, five-seat version of Honda's previous-generation Pilot. In our tests the smooth, refined 3.5-liter V6 engine and nine-speed automatic returned 21 mpg overall. The midsized Passport slots between the compact CR-V and the three-row Pilot, and competes with the Ford Edge and Nissan Murano. Unlike the Pilot, we found the Passport's ride to be comparatively stiff but without a marked improvement in handling agility. The infotainment system is slow to respond, and the push-button gear selector is tricky to use without looking down at it. The entry EX-L trim is well-equipped, has a roomy interior, and is full of handy storage places. Standard active safety features include AEB, BSW, and RCTW. For 2023, all-wheel drive is standard.

Honda Pilot

NA
OVERALL SCORE

The redesigned Pilot is roomy, comfortable and user-friendly. The smooth and refined 3.5-liter V6 engine produces 285 hp and pulls strongly. It's paired with a slick, responsive 10-speed automatic. Most versions have an eight passenger seating configuration with a flat-folding third-row seat. The ride is comfortable, and the cabin is quiet. Handling is sound but not nimble. Msot controls are very easy to use, but the gear selector takes getting used to. Lots of storage cubbies and bins are handy, as is a nifty button to clear access to the third-row seats. A rugged looking TrailSport trim is new. Maximum towing capacity is 5,000 pounds. The Pilot's standard active safety features include AEB with pedestrian detection, BSW, and RCTW, all powered by an enhanced forward camera and radars.

Honda Ridgeline ✓

76
OVERALL SCORE

Honda's easy-to-live-with pickup is unlike most trucks in that it has a carlike unibody construction, fully independent suspension, and lockable trunk space below the bed floor. Power comes from a slick 3.5-liter V6 engine, which returned 20 mpg overall in our tests. A nine-speed automatic is the only available transmission. Towing capacity is modest, at 5,000 pounds, and the bed is shallow. Ride comfort is a high point, and handling is more responsive than in conventional pickup trucks, plus the cabin is quiet. The infotainment system is tricky to use. AEB with pedestrian detection is standard. BSW and RCTW are unavailable on the base Sport trim but standard on other trims.

Hyundai Elantra

65 OVERALL SCORE

Overall, the Elantra is one of the better small sedans, and we think the hybrid version is the pick of the model range. The standard engine is a 147-hp four-cylinder teamed with a continuously variable transmission, which together give quick acceleration and commendable fuel economy for the compact class. A sporty 276-hp turbo N model is also available. Handling is nimble, but the ride is overly firm and the engine gets noisy. Seat comfort is so-so unless buyers get the pricier Limited trim, and the car's low stance makes access awkward. The infotainment system is easy to use. AEB with pedestrian detection, BSW, and RCTW are standard. We don't recommend the Elantra because it has below-average reliability.

Hyundai Elantra Hybrid ✓

73 OVERALL SCORE

The latest Elantra got a slightly roomier interior and a more sophisticated infotainment system. And the hybrid version is the pick of the litter, returning not only an impressive 48 mpg overall but also a smoother ride and quieter cabin than the regular model. Handling is nimble, aided by the independent rear suspension the hybrid has. Seat comfort is so-so unless buyers get the pricier Limited trim, and the car's low stance makes access awkward. The infotainment system is easy to use. AEB with pedestrian detection, BSW, and RCTW are standard. We recommend the Elantra Hybrid because it has average reliability.

76
OVERALL SCORE

The Ioniq 5, which is related to the Genesis GV60 and Kia EV6, is one of the most impressive EVs we've tested, with punchy acceleration, agile handling, a reasonably comfortable ride, and generous interior room. The EPA-estimated driving range is 303 miles for the single-motor, rear-wheel-drive version with the 77.4-kWh battery, and 256 miles for the dual-motor, all-wheel-drive model. Quick charging times are possible at public DC fast-charging venues, thanks to the battery's maximum acceptance rate of 235 kW. Despite its futuristic vibe, the Hyundai's controls are mostly user-friendly. Many interior surfaces, such as the seats, headliner, and door trim, use eco-friendly materials. Standard safety systems include AEB with pedestrian detection, BSW, and RCTW.

Hyundai Ioniq 6

NA
OVERALL SCORE

The Ioniq 6 is based on the same platform as the Ioniq 5, Kia EV6, and Genesis GV60. This sleek sedan has an EPA range that spans 240 to 305 miles depending on the version. It offers a choice of a 53- or 77.4-kWh battery. Each version is offered with either rear-wheel drive or, on dual-motor versions, all-wheel drived. Like the Ioniq 5, it is capable of rapid DC fast charging in public places. The car rides comfortably and is super-quiet inside. The window and mirror controls are oddly placed on the center console instead of on the door trim. Hyundai made AEB with pedestrian and cyclist detection, BSW, RCTW, and adaptive cruise control standard equipment. More advanced features are available on SEL and Limited trims.

Hyundai Kona

59 OVERALL SCORE

The Kona's grows in size with its 2024 redesign, which again includes a hybrid version in addition to electric and gas-only options. The base 2.0-liter engine and six-speed automatic are adequate around town but can feel sluggish at times. We got 26 mpg overall in our Kona fitted with the optional all-wheel-drive system. The optional 1.6-liter turbo four-cylinder has a stronger midrange punch, but power delivery is inconsistent. Nimble handling makes the Kona feel very responsive in corners. The ride, however, is stiff, and the cabin gets loud because of elevated levels of road and engine noise. The controls are super-easy to use. A high-performance turbo N model is also available. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Hyundai Kona Electric

41 OVERALL SCORE

The Kona Electric is better than the conventional version, though it's significantly more expensive. Its 201-hp electric motor makes the car quick, with smooth and quiet acceleration. Its range is a robust 258 miles. It takes 9 hours to charge the 64-kWh battery from empty on a 240-volt connector. Unlike the regular Kona, the electric version is front-wheel-drive only. It has nimble handling, which makes the Kona responsive when going through corners. The ride, however, is stiff. The controls are very straightforward, though the EV has a push-button gear selector that is challenging to use at a glance. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Hyundai Palisade ✓

80
OVERALL SCORE

The Hyundai Palisade three-row midsized SUV can seat seven or eight people, depending on whether the second row is a bench or two separate seats. It shares its platform and many components, such as its smooth 291-hp, 3.8-liter V6 that's paired with an eight-speed automatic, with the Kia Telluride. The roomy cabin is very quiet. The Palisade rides comfortably, but handling is not particularly nimble. The interior is filled with thoughtful details. It benefits from simple controls, except for the unintuitive push-button gear selector and the faraway touchscreen infotainment system. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Hyundai Santa Cruz

64
OVERALL SCORE

Blending a small SUV and a pickup truck, the Santa Cruz comes with a rather strained 2.5-liter four-cylinder, but a powerful turbocharged version is also available. Front- and all-wheel-drive versions are available. Fuel economy of 24 mpg overall in the turbo version is impressive. The Santa Cruz drives like a car, with responsive handling, a comfortable ride, and easy maneuverability. Rear visibility is hampered because of the small rear window and thick back pillars. Maximum tow capacity is a commendable 5,000 pounds, with a payload of 1,400 pounds. The tiny bed measures just over 4 feet long and has a lockable underbed trunk. Higher trims come with a handy sliding tonneau cover. AEB with pedestrian and cyclist detection, BSW, and RCTW are standard.

Hyundai Santa Fe ✓

73 88 OVERALL SCORE

Sitting in between the Tucson and the larger, three-row Palisade, the Santa Fe comes standard with a weak and noisy 191-hp, 2.5-liter four-cylinder engine. The optional 2.5-liter turbo is much more powerful but is mated to a dual-clutch automatic that causes low-speed vibrations. The hybrid version comes with a 1.6-liter turbo engine, got 30 mpg overall in our tests, and also rides more comfortably than the gas-only Santa Fe. We think it's the best version to get. A 261-hp plug-in hybrid with 30 miles of electric range is also available. The cabin is roomy, with a generous rear seat and cargo space. The interior is stylish, but the center console is a sea of buttons, and the push-button gear selector is tricky to use without looking over at it. AEB with pedestrian detection, BSW, and RCTW are standard.

Hyundai Sonata ✓

79-80 OVERALL SCORE

The coupelike Sonata has a standard 2.5-liter four-cylinder coupled to an eight-speed automatic. This combination provides unobtrusive, linear power and 31 mpg overall in our tests. The Sonata hybrid returned an excellent 44 mpg overall in our tests, but we found that its six-speed automatic has some rough shifts. We like the sedan's responsive handling but found the ride to be stiff. Rear-seat room is decent, although the low stance compromises access. The modern cabin is marred by a counterintuitive push-button gear selector. The standard 8-inch touchscreen is easy to use. A larger screen comes on high-end versions, but these versions lack a tuning knob. The sporty N Line version gets a 2.5-liter turbo engine and dual-clutch automatic. AEB with pedestrian detection, BSW, and RCTW are standard.

Hyundai Tucson ✓

77
83
OVERALL SCORE

The fourth-generation Tucson is one of the better compact SUVs. With the standard 187-hp, 2.5-liter four-cylinder coupled to an eight-speed automatic, the Tucson accelerates leisurely. The hybrid's pairing of a 1.6-liter turbo engine and electric assist makes it more responsive and quieter than the standard Tucson, and it got an impressive 35 mpg overall in our tests. The ride is firm yet steady, handling is responsive and secure, and the nicely trimmed cabin is relatively quiet. The back seat is roomy, and the cargo area is generous for the class. Controls are easy to use. But higher trims replace physical volume and temperature knobs with touch-sensitive controls and a push-button gear selector. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Hyundai Venue

57
OVERALL SCORE

Hyundai's tiny Venue has a boxy, SUV-like shape that makes it feel roomier than one might expect. It fits beneath the Kona in the Hyundai lineup and competes with the Nissan Kicks and Toyota C-HR. All-wheel drive is not offered. As is the case with other subcompacts, the Venue's 121-hp, 1.6-liter four-cylinder engine is not tremendously powerful, the ride is stiff and choppy, and the cabin is noisy. Handling is nimble, and the car is extremely easy to park and maneuver. An 8-inch touchscreen is standard. Standard active safety features includes AEB with pedestrian detection, and BSW and RCTW come on all trims except the base SE.

Infiniti Q50 ✓

77 OVERALL SCORE

The Q50 luxury sports sedan is available in rear- and all-wheel drive. Its 300-hp turbo V6 engine is very punchy and, combined with the seven-speed automatic, makes the car quick. But fuel economy is a thirsty 22 mpg overall. Handling is quite nimble, and the ride is compliant. The cabin and back seat are relatively roomy, but the trunk is small, even for this class. Fit and finish comes up short, and the level of amenities is below the curve, showing this car's age. Infiniti's dual touchscreen infotainment system is slow and cumbersome to use. It requires multiple steps for simple tasks, which causes extra distraction. A 400-hp turbo V6 is also available. Standard active safety equipment includes AEB, BSW, and RCTW, but pedestrian detection is not offered.

Infiniti QX50 ✓

69 OVERALL SCORE

Infiniti's QX50 is powered by a 268-hp, 2.0-liter turbo four-cylinder engine mated to a continuously variable transmission. Acceleration is competitive, but we got just 22 mpg overall in our all-wheel-drive test car. This trails most competitors, as well as Infiniti's own fuel-economy claims. Interior fit and finish is impressive, and the cabin is quiet and roomy. The QX50 has lackluster but secure handling. We found the ride to be mostly calm, but some impacts are stiffer than expected. The convoluted controls are very confusing and distracting. Infiniti's ProPilot Assist feature is now standard; it can keep the QX in its lane, and maintain and adjust speed according to traffic. AEB with pedestrian detection, BSW, and RCTW are standard.

NA
OVERALL SCORE

This derivative of the QX50 has a sloped roof, giving it a coupelike appearance. It uses the same variable-compression 2.0-liter turbocharged four-cylinder engine and CVT as the QX50. Despite Infiniti's claims that this powertrain optimizes performance and fuel economy, we got just 22 mpg overall in the QX50 we tested. Every QX55 is equipped with all-wheel drive. Like the regular QX50, the cabin is nicely finished, with panel sculpting that creates a fluid appearance. AEB with pedestrian detection, BSW, and RCTW are standard. For 2023, the ProPilot Assist active driving assistance system became standard on all trims. This feature can keep the QX55 in its lane, and can maintain and adjust speed according to traffic.

Infiniti QX60

62
OVERALL SCORE

A recent redesign has transformed the QX60 into a slick, refined vehicle. Based on the Nissan Pathfinder, this sleek three-row luxury SUV's 295-hp V6 and nine-speed automatic supply plenty of power and deliver a decent 21 mpg overall. Front- and all-wheel-drive versions are available. The ride is comfortable, and the cabin is quiet. Handling is sound but not particularly agile. The standard 12.3-inch touchscreen infotainment system is fairly easy to navigate, with functions handled via either the screen or a knob on the center console. Standard active safety systems include AEB with pedestrian detection, BSW, and RCTW. The ProPilot Assist active driving assistance system uses adaptive cruise control and lane centering assistance to reduce stress while driving in highway traffic.

Infiniti QX80

49 OVERALL SCORE

The QX80 large SUV has a plush, luxurious, and quiet interior. We liked the supple ride but found this big barge to be ungainly, with cumbersome handling in everyday driving, though it was ultimately secure in emergency maneuvers. The seven-speed automatic and 400-hp, 5.6-liter V8 provide smooth and strong performance, but the QX80 chugs premium fuel and returns just 15 mpg overall. The tall step-up to the cabin makes climbing in or out an ungraceful affair. Cargo volume is plentiful, and the small power-folding third-row seat comes in handy for carrying two kids. A recent refresh brought a more modern infotainment system and other updated controls. The Nissan Armada is essentially the same vehicle but costs less. AEB with pedestrian detection, BSW, and RCTW are standard.

Jaguar E-Pace

49 OVERALL SCORE

The E-Pace is a stylish and nimble small SUV powered by a 2.0-liter turbo four-cylinder engine mated to a nine-speed automatic and all-wheel drive. Power delivery is uneven: It either accelerates with a sudden burst or feels lethargic and slow. Fuel economy of 21 mpg overall is abysmal. Agile handling and sharp steering make the little Jaguar fun to drive, but it comes at the expense of a stiff ride that lets the passengers feel every bump and rut. The controls are cumbersome but manageable, and the touchscreen infotainment system has been updated with Jaguar's latest Pivi Pro system. Rear and side visibility are dismal. Interior ambience is too ordinary and not befitting a car in this class. AEB with pedestrian detection, BSW, and RCTW are standard.

Jaguar F-Pace

48 OVERALL SCORE

Jaguar's compact luxury SUV shares its platform with the XF sedan and Range Rover Velar. A 2.0-liter turbo four-cylinder is the base engine. High-end versions get a turbocharged 3.0-liter six-cylinder that makes the car feel quick and effortless. A smooth eight-speed automatic and all-wheel drive are standard. The taut and nimble F-Pace is one of the best-handling SUVs, which makes for a lively driving experience, though the ride is stiff and choppy. The seats are comfortable, but interior quality doesn't match that of an Audi Q5 or a BMW X3. The infotainment system has been updated to Jaguar's latest Pivi Pro system. We found that the A/C system isn't always up to the task. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Jaguar I-Pace

58 OVERALL SCORE

The I-Pace all-electric SUV seats five and has an EPA-estimated range of 246 miles. It's a quick and quiet car that handles nimbly. The ride is firm yet comfortable. The interior is luxurious, with an attractive combination of charm and high-tech features, including dual screens for the infotainment system and a fussy push-button gear selector. The ability to raise the ride height allows the I-Pace to traverse moderately rough terrain. Like other EVs, we found, it takes quite a while to charge: The 90-kWh battery takes about 13 hours from almost empty using a 240-volt connection. Even at a public fast charger, the I-Pace is behind the pace because of its mere 100-kW acceptance rate. The I-Pace has standard AEB with pedestrian and bicyclist detection, LKA, BSW, and RCTW.

Jaguar XF

NA
OVERALL SCORE

The XF is arguably the most agile midsized luxury sedan. It's taut and nimble, with lively steering, yet its ride is supple and composed. That combination makes it very enjoyable to drive. It comes in rear- and all-wheel-drive versions. A recent refresh brought a snazzier interior, an easier-to-use gear selector, and better-placed window controls, as well as an updated infotainment system. The only engine available is a 2.0-liter turbo four-cylinder, and the only transmission choice is an eight-speed automatic that shifts smoothly. The front and rear seats are very comfortable, and the trunk is large. AEB with pedestrian detection, BSW and RCTW are all standard.

Jeep Cherokee

64
OVERALL SCORE

The Cherokee SUV is available with a 2.4-liter four-cylinder engine or a 2.0-liter turbocharged four-cylinder for 2023. The turbo engine suffers from a significant delay, particularly when accelerating from a rolling stop, the nine-speed automatic is neither smooth nor responsive, and the Cherokee returned just 23 mpg overall. Handling is cumbersome, but the SUV remains under control when pushed. The ride is stiff, and the coarse engine noise mars an otherwise quiet cabin. The rear seat is roomy, and controls are intuitive. The Trailhawk features off-road motifs mostly for looks. AEB, BSW and RCTW are standard, but pedestrian detection isn't available.

Jeep Compass

NA
OVERALL SCORE

The Compass gets a lot of changes for 2023. Jeep replaced the 2.4-liter four-cylinder, which we found to be unrefined and sluggish, with a 2.0-liter turbo four-cylinder, and dropped the balky nine-speed automatic in favor of an eight-speed. Four-wheel drive is standard. The Compass we tested with the 2.4-liter engine wasn't very agile, but it proved to be secure at its limits. Aside from the allure of the Jeep brand, the Compass trails the competition in several important metrics. The ride is rather stiff and jittery. The rear seat is too low and flat. Interior and exterior styling were recently updated, and the infotainment system is now the latest Uconnect system with either an 8.4-inch or a 10.1-inch screen size. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Jeep Gladiator

36
OVERALL SCORE

A longer wheelbase and a 5-foot bed transform the Wrangler into the Gladiator pickup truck. The standard 285-hp, 3.6-liter V6 is mated to either a smooth eight-speed automatic or a six-speed manual. The Jeep returned 18 mpg overall with the automatic in our tests. Unlike most compact pickups, the truck uses coil springs in the rear suspension, which make the ride relatively comfortable. Handling, however, is pretty clumsy. The truck comes with a soft top; a removable hardtop is optional. Either way, there's lots of wind noise on the highway. The off-road-focused Rubicon has suspension and tires that are optimized for rock climbing. The damped tailgate is a nice touch. A 3.0-liter V6 diesel and full-time 4WD are available. AEB, BSW, and RCTW are optional, and pedestrian detection isn't offered.

Jeep Grand Cherokee

55 OVERALL SCORE

With its recent redesign Jeep improved the Grand Cherokee's interior and fuel economy. Its standard 3.6-liter V6 is responsive, and the eight-speed automatic is smooth. Handling is sound and secure, and the ride is firm yet absorbent, particularly with the smaller 18-inch tires. Off-road seekers will want the 4xe Trailhawk, which has low-range gearing and height-adjustable suspension. This plug-in hybrid model uses a 2.0-liter turbo charged four-cylinder coupled with electric drive and provides a claimed 25 miles of electric-only range. The Uconnect 5 infotainment system has new features and more customization, but it has become less intuitive. AEB with pedestrian and cyclist detection, BSW, and RCTW are standard.

Jeep Grand Cherokee L

53 OVERALL SCORE

Jeep's midsized three-row SUV is a longer version of the Grand Cherokee. Most GC-Ls are powered by the familiar 290-hp, 3.6-liter V6, which tends to be noisy when revved and isn't that powerful or fuel-efficient. High-end versions can be optioned with a 5.7-liter V8. The eight-speed automatic is smooth and downshifts appropriately to help slow the vehicle when descending hills. The ride has an underlying firmness but is composed over undulations. Body roll is well-contained in corners, but the steering is too light. Six- and seven-passenger configurations are available, and the third row is relatively roomy. The interior exudes a premium feel, but some of the redesigned controls are too cluttered. Standard active safety and driving assistance features include AEB with pedestrian detection, BSW, and RCTW.

Jeep Renegade

40 OVERALL SCORE

The subcompact Renegade looks enticingly cute but is bogged down by a nine-speed automatic that's neither smooth nor responsive. Fuel economy with the old 2.4-liter was unimpressive at 24 mpg overall. A 1.3-liter turbocharged four-cylinder engine is now standard and should be more fuel-efficient. Handling is uninspiring, and the ride is unremarkable. Excessive vibrations while the engine is idling and a too-touchy brake pedal also mar the driving experience. The Trailhawk version offers a token amount of off-road capability. Chrysler's easy-to-use Uconnect infotainment system is one of the best in the business. Active safety features, including BSW and RCTW are standard on all trims. Unfortunately, pedestrian detection isn't available.

Jeep Wagoneer

51 OVERALL SCORE

Jeep revived the storied Wagoneer nameplate for an all-new, large three-row luxury SUV based on the Ram 1500 pickup truck. Unlike the Ram, the Wagoneer has independent rear suspension. The more premium Grand Wagoneer gets a larger 6.4-liter V8, more luxury amenities, and typically a six-figure price tag. The Wagoneer's base 392-hp, 5.7-liter V8 returns just 15 mpg overall, which is way behind the times, and the worst among large SUVs. Most versions come with a 3.0-liter 6-cylinder that makes 420 hp. The Wagoneer rides comfortably, particularly if equipped with the optional air suspension, and the big SUV is very quiet. Handling is sound but not a strong suit. The cabin is very roomy and even the third-row seat is suitable for adults. AEB with pedestrian detection, BSW, and RCTW are standard. For 2023, both Wagoneers are available in a 15-inch longer "L" configuration.

Jeep Wrangler

25
OVERALL SCORE

The Wrangler remains true to the off-roading icon's heritage. Its essential hallmarks remain, with body-on-frame construction and solid axles. It's available in two- and four-door configurations, but be aware that the multitude of options can quickly drive up the price. The standard 2.0-liter turbocharged four-cylinder provides decent power. The V6 with the eight-speed automatic feels stronger, and we got 18 mpg overall. Jeep also offers a 4xe plug-in hybrid that can drive a short distance on electric power. The 6.4-liter V8 on the Rubicon 392 seems frivolous. Handling still lacks precision. The ride is stiff and jiggly, and there's lots of wind noise at highway speeds, regardless of roof choice. AEB, BSW, and RCTW are all optional only, and pedestrian detection isn't offered at all.

Kia Carnival ✓

84
OVERALL SCORE

Kia's minivan is roomy and refined, and it comes with desirable active safety features and optional luxury amenities. The Carnival is powered by a punchy 290-hp V6 that has lots of power in reserve, mated to a smooth-shifting eight-speed automatic. Its 21 mpg overall is similar to other V6 competitors but no match for the Toyota Sienna hybrid. The ride is comfortable, and handling is secure but not agile. Controls are easy to use. High-end versions come with a loungelike reclining feature for the second row. The midsection of the second row can handily slide fore and aft, but owners have to remove the second-row seats for maximum cargo capacity and they are heavy. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Kia EV6 ✓

91
OVERALL SCORE

The EV6 is Kia's first car designed from the outset to be fully electric. EPA-estimated driving ranges are 310 miles for the rear-drive, long-range-battery model and 274 miles for the all-wheel-drive version. The base rear-drive model has a smaller battery, less horsepower, and only a 232-mile range. Recharging can be done relatively quickly at public DC fast chargers, thanks to the EV6's 235-kilowatt acceptance rate. The EV6 is taut and agile, and the ride is steady and comfortable. It glides silently down the road and accelerates briskly. Rear and side visibility are restricted, and the car is saddled with annoying split-use climate and audio controls. Standard active safety and driving assistance features include AEB with pedestrian and cyclist detection, BSW, and RCTW.

Kia Forte

62
OVERALL SCORE

The budget-friendly, compact Forte has some positives, including simple controls and impressive fuel economy. However, it suffers from a too-stiff ride and a noisy cabin. The standard 147-hp four-cylinder pulls adequately, and the CVT provides unobtrusive progress, but the engine gets raucous when pushed. At 34 mpg overall, fuel economy is excellent. Handling is responsive, and the Forte is willing to tackle corners. But it feels like the suspension transmits every bump to the passengers. The interior is drab and spartan, and the seats in the midlevel LXS are uncomfortable. The infotainment system is simple and easy to use. A sportier GT model with a turbo engine is also available. AEB with pedestrian detection, and lane centering assistance are standard; BSW and RCTW are optional.

Kia K5 ✓

81 OVERALL SCORE

Kia's midsized sedan is roomy and fuel-efficient, handles securely, and has user-friendly controls. The standard 1.6-liter turbo four-cylinder delivers ample power and commendable fuel economy, at 32 mpg overall in our tests. Although the K5 shares its platform with the Hyundai Sonata, the Kia has a more comfortable ride. The roomy cabin has a traditional layout with a conventional gear selector. Unfortunately, buyers have to opt for a GT-Line or above to get a power driver's seat. The infotainment system is easy to use, but only versions with the smaller screen have wireless Android Auto and Apple CarPlay compatibility; others require a cable. All-wheel drive is available. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Kia Niro ✓

79 OVERALL SCORE

The redesigned 2023 Niro is very sensible and economical. Even though it is only a front-wheel-drive model, its overall functionality rivals that of most small SUVs. Handling and braking have been improved, and the ride is mostly comfortable, but the cabin is loud. The hybrid achieved an excellent 45 mpg overall. Unfortunately, the controls are now less friendly than before, and outward visibility is hurt by the elimination of the third side window. The Niro is also offered as a plug-in hybrid with an estimated electric range of 33 miles before transitioning to regular hybrid operation. Standard advanced safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, and reverse AEB.

Kia Niro EV ✓

79
OVERALL SCORE

The second-generation Niro once again offers buyers three efficient modes of transport, with traditional hybrid, plug-in hybrid, and fully electric models. The electric version is one of the best among the group of affordable EVs on the market and it has an EPA-estimated driving range of 253 miles. The electric power comes on immediately and feels effortless. Its ride and handling characteristics are slightly better than than regular Niro hybrid. Unfortunately, the controls have become less intuitive and the split audio/climate panel can be distracting to use. Rear and side visibility are compromised due to the thick rear pillar. In addition to AEB with pedestrian detection, BSW, and RCTW, reverse automatic emergency braking and lane centering assistance are standard.

Kia Rio

55
OVERALL SCORE

The Rio is basic transportation. It is a loud car, with a stiff ride and leisurely acceleration from its 1.6-liter engine. We got 33 mpg overall in our tests, which is good, but many nicer compact cars achieve or surpass that mileage. The Rio's ride makes passengers feel every bump, and the car feels choppy when driving over uneven roads. At least the Rio has predictable, competent handling. The interior is basic, the front seats are short on support, and the rear seat is tight. The easy-to-use controls are a high point. But buyers must choose the higher S trim to get active safety systems, and it's close to the price of much better, and larger, cars in the compact class. Recent changes included a new 1.6-liter four-cylinder engine, which is paired with a continuously variable transmission.

Kia Seltos ✓

70
OVERALL SCORE

The Seltos slots below the Sportage and offers versatility at an affordable price. It has a roomy interior for its small footprint, is easy to get into and out of, and has clear outward visibility and good fuel economy. The standard 2.0-liter four-cylinder engine, paired with a continuously variable transmission, provides unobtrusive acceleration. The up-level 1.6-liter turbocharged four-cylinder has more peak power but feels lethargic at lower engine speeds. Front-wheel drive is standard, and all-wheel drive is optional. The stiff ride and loud cabin are two significant drawbacks. Handling is responsive and secure. Controls are easy to use, and the rear seat is roomy for the class. AEB with pedestrian detection is standard. BSW and RCTW come standard on all but the lower trims.

Kia Sorento

45
OVERALL SCORE

The Sorento is a right-sized SUV that comes standard with three rows of seats in either six or seven passenger configurations. Upper trims get the six-passenger format with two individual seats in the second row, The third-row seat is tiny, and best suited for kids. The base four-cylinder engine is neither quick nor quiet, but the 281-hp, turbo four-cylinder that comes on EX and higher trims gives strong acceleration and commendable fuel economy. But its dual-clutch automatic causes low-speed vibrations. Handling is secure, but the ride is moderately stiff. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW. We don't recommend the conventional Sorento because of its well-below-average reliability.

Kia Sorento Hybrid ✓

75 OVERALL SCORE

The three-row Sorento hybrid is our pick of the model line because it is quieter and rides more comfortably than the conventional Sorento. Other than an initial delay off the line, it is pleasantly powerful and can drive on electric power alone at low speeds. Handling is secure, and the ride is smoothed out in the hybrid version. We measured an impressive 28 mpg overall with the hybrid. The plug-in hybrid has 32 miles of electric range if the driver uses a light right foot. Three rows of seating come standard in a six-passenger configuration. Standard active safety and driver assist features include AEB with pedestrian detection, BSW, RCTW, reverse automatic emergency braking, and lane centering assistance. The Sorento hybrid's average reliability allows us to recommend it.

Kia Soul ✓

68 OVERALL SCORE

The Soul blends personality and versatility with its familiar boxy shape and cheerful character. A continuously variable transmission contributes to good fuel economy, but the engine gets loud when pushed hard, such as when merging onto the highway or taking a steep hill. Handling is nimble, but the ride is notably stiff. Easy access and good outward visibility continue to be strengths. The top EX trim comes with a power driver's seat with a wider range of adjustments. Controls are easy to use, including the optional 10.25-inch center touchscreen. For 2023, the turbo engine has been dropped. AEB with pedestrian detection is standard on all trims. BSW and RCTW are standard on S and higher trims but optional on the base LX.

Kia Sportage ✓

74-80 OVERALL SCORE

The Sportage is one of the roomiest compact SUVs. The base engine, a lackluster four-cylinder mated to an eight-speed automatic, returned 25 mpg overall in our tests. The hybrid version is quicker and quieter, transforming the driving experience thanks to its electric drive and turbo four-cylinder which together yield 227 hp. We measured an impressive 36 mpg overall. There's also a plug-in hybrid that puts out 261 hp and has an electric-only range of 34 miles. The Sportage has responsive handling and a firm yet absorbent ride. Most controls are easy to use, although the annoying split-use climate/audio touchscreen panel requires toggling back and forth between the systems. The front seats are comfortable, and the rear seat headroom and legroom are generous. AEB with pedestrian and cyclist detection is standard. BSW and RCTW aren't available on the base LX but come standard on higher trims.

Kia Stinger ✓

69 OVERALL SCORE

This low-slung, four-door hatchback comes with rear- or all-wheel drive, and its nimble handling enables it to tackle curvy roads with enthusiasm. On the downside, the ride is stiff and a little unsettled. Two engines are offered: a 2.5-liter turbo four-cylinder and a powerful 3.3-liter turbo V6, both combined with an eight-speed automatic. The car sits low, which combined with the coupelike styling makes getting in and out difficult, limits rear headroom, and severely hurts visibility. Most of the controls are fairly easy to use, but drivers may find it to be a long reach to the infotainment touchscreen. Standard active safety features include AEB with pedestrian and cyclist detection, BSW, and RCTW. 2023 is the final year for the Stinger.

Kia Telluride ✓

87 OVERALL SCORE

The Telluride three-row midsized SUV offers seating for up to eight people and is one of the best in the category. Competing against the Chevrolet Traverse, Honda Pilot, and Toyota Highlander, it shares its platform and many components with the Hyundai Palisade, including its slick 291-hp, 3.8-liter V6 and smooth-shifting eight-speed automatic. It rides comfortably, and the cabin is quiet. The interior is roomy and comes with several well-thought-out details, such as second-row seats that can slide or fold with a single touch of a button. Front-wheel drive is standard, and all-wheel drive is available. Towing capacity is 5,000 pounds. Standard active safety features include AEB with pedestrian detection, BSW, RCTW, reverse automatic emergency braking, and lane centering assistance.

Land Rover Defender

44 OVERALL SCORE

The latest version of Land Rover's classic, go-anywhere SUV is civilized and pretty quick. But frustrating controls and unimpressive fuel economy count against it. The Defender comes with a choice of a turbo four- or six-cylinder engine or a supercharged V8. Body styles include two- and four-door, and five- and seven-passenger seating configurations are available. The various off-road-ready features include selectable modes to help traverse a variety of terrains. We found acceleration plentiful with the optional mild-hybrid turbo six-cylinder, but it managed just 18 mpg overall. The ride is steady but firm, and handling is a bit ponderous. The seats are very comfortable, but the infotainment system is slow and distracting to use. AEB with pedestrian detection, BSW, and RCTW are standard.

Land Rover Discovery

46
OVERALL SCORE

The Discovery three-row SUV blends on-road refinement with off-road and towing prowess. Its optional six-cylinder turbo engine produces plenty of power, and the eight-speed automatic shifts smoothly. A 2.0-liter turbo four-cylinder is standard. Though the optional air suspension makes the ride steady, the Discovery lumbers in corners. Controls can be confusing, but the front seats are very comfortable and the quiet cabin is nicely furnished. The second row can fit three adults, but the low bottom cushion hurts comfort, and accessing the tight third-row seat is an awkward process. A recent mild freshening brought an updated infotainment system, more standard equipment, and an improved second-row seat. AEB with pedestrian detection, BSW, and RCTW are standard.

Land Rover Discovery Sport

44
OVERALL SCORE

Land Rover's luxury compact SUV struggles against both its peers and even mainstream small SUVs. Power delivery from the turbo four-cylinder is spiky, with either too little or too much acceleration, and the transmission is neither smooth nor responsive. We found the Discovery Sport capable off-road, commendably ascending our rock hill even without low-range gearing. But the on-road ride is stiff, and handling is far from nimble. A freshening spiffed up the previously austere cabin. The infotainment system looks glossy and high-tech, but it's unintuitive and slow to respond. To the SUV's credit, its rear seat is roomy. AEB with pedestrian detection, BSW, and RCTW are standard.

Land Rover Range Rover

NA OVERALL SCORE

The redesigned Range Rover continues its legacy of pushing boundaries, with new tech and an elegant design. The standard engine is a mild-hybrid turbo inline-six that is smooth and powerful. The ride is steady and controlled, thanks in part to the air suspension, which also lowers the vehicle automatically for easy entry and exit. Handling is responsive but not agile. Controls are too complicated and distracting. The Range Rover is offered in four-, five-, and seven-seat configurations in the long wheelbase version. A twin-turbo V8 and a plug-in hybrid (with a 51-mile electric-only range) are also available. An EV will debut in 2024. AEB with pedestrian detection, BSW, and RCTW are standard.

Land Rover Range Rover Evoque

43 OVERALL SCORE

The Evoque is more about style than function, and ends up being frustrating on several levels. For example, the turbo four-cylinder has a pronounced initial delay when accelerating from a rolling stop, with power then coming on abruptly. The ride is too stiff, fuel economy is among the worst in its class, and outward visibility is hampered by thick roof pillars and chopped side windows. The dual-screen infotainment system is convoluted and slow to respond to commands. On the plus side, handling is nimble, the front seats are comfortable, and fit and finish is impressive. AEB with pedestrian detection, BSW, and RCTW are standard.

Land Rover Range Rover Sport

NA OVERALL SCORE

Unlike the previous generation Sport, which tried too hard to be sporty, this redesigned Range Rover Sport narrows the gap compared to the Range Rover in terms of luxury and refinement. The standard turbo and supercharged six-cylinder engine makes the big SUV very quick. Handling is capable, and the ride is comfortable and composed even with the optional 22-inch tires. The cabin is impressively quiet and the seats are very comfortable, but the controls are not intuitive. Additional powertrains include a mild-hybrid, a plug-in hybrid with a claimed 48-mile electric-only range, and a twin-turbo V8. All use a smooth-shifting eight-speed automatic. An EV version joins the lineup for 2024. Standard active safety equipment includes AEB with pedestrian detection, BSW, RCTW, and lane centering assistance.

Land Rover Range Rover Velar

50 OVERALL SCORE

The Velar shares its fundamentals with the Jaguar F-Pace, putting a greater emphasis on sport than on Land Rover's traditional off-road prowess. With the recent freshening, available powertrains include two mild-hybrid 3.0-liter turbocharged six-cylinders and a 2.0-liter turbocharged four-cylinder. Even the four-cylinder delivers plenty of oomph. Handling is taut and agile, but the ride is firm. The interior layout has been simplified for 2024 with Land Rover's latest infotainment system front and center. All physical climate functions have been removed and placed into the screen and overall the system is not intuitive. AEB with pedestrian detection, BSW, and RCTW are standard.

Lexus ES ✓

81-86
OVERALL SCORE

This comfortable and refined sedan has a quiet, plush, and well-made interior. The optional V6 is mated to an eight-speed automatic, and the combination has prompt throttle response and a linear power delivery. We attained 25 mpg overall. The ES hybrid's powertrain is the same as the now-discontinued Toyota Avalon, which got 42 mpg in our tests. The base four-cylinder ES250 comes standard with AWD. The ES absorbs bumps very well, and the body stays composed. Handling is sound and secure but not sporty. The cabin is quiet and luxurious, and the front seats are very comfortable. A recent freshening brought an easier-to-use infotainment touchscreen. Standard active safety systems include AEB with pedestrian detection, BSW, RCTW, and lane centering assistance.

Lexus GX ✓

75
OVERALL SCORE

Although the GX460 is long in the tooth, it's quiet and quick, yet it's also highly capable off-road and has a stout 6,500-pound tow rating. The 4.6-liter V8 engine and six-speed automatic make for a slick powertrain but got an abysmal 17 mpg overall. Handling is lumbering but ultimately secure. The ride is very comfortable, especially at low speeds, although the body tends to jostle back and forth when driving over uneven pavement. Inside, the cabin is plush and well finished. Drivers of almost any height should find a good seating position, with plenty of space all around and a commanding view out. The small third-row seat folds when it's not in use, but the side-swinging tailgate can be inconvenient at times. AEB with pedestrian detection, BSW, are standard.

Lexus IS ✓

70 OVERALL SCORE

A recent update to the IS luxury sports sedan brought only modest improvements, and still trails the competition in terms of the driving experience, interior room, and fuel economy. Rear-wheel-drive versions come with a 241-hp turbo four-cylinder, while all-wheel-drive models have a polished but thirsty 260-hp V6. Handling is fairly nimble but not all that sporty, and the ride is jittery. The well-finished cabin remains very snug front and rear, and AWD versions still suffer from a center tunnel protrusion into the driver's legroom. The infotainment system relies on a distracting touchpad but is slightly improved by a touch-enabled screen. The IS 500 F Sport comes with a 472-hp, 5.0-liter V8. AEB with pedestrian detection, BSW, RCTW, and lane centering assistance are standard.

Lexus LS

66 OVERALL SCORE

The current LS is far from stress-free motoring, with its complicated controls, stiff ride, and compromised seating. Available with rear- or all-wheel drive, the standard 416-hp, 3.4-liter V6 turbo engine is coupled to a 10-speed automatic. But hesitation at low speeds keeps the car from feeling powerful, despite its 6-second 0 to 60 mph acceleration. It's too bulky to feel nimble through corners and bumps punch through more often than they should, even with the optional air suspension. The cabin is nicely trimmed and luxurious, but the controls are extremely convoluted and frustrating, and it can take several steps to perform simple tasks. The LS comes standard with AEB with pedestrian detection, BSW, RCTW, reverse automatic emergency braking and lane centering assistance.

Lexus LX

NA
OVERALL SCORE

Recently redesigned, the Lexus LX 600 takes the next-generation Toyota Land Cruiser (which isn't sold in the U.S.) and wraps it in an upscale package with a strong engine and a lavishly-furnished cabin, while retaining the Cruiser's impressive off-road capability. The big, three-row SUV is powered by a 409-hp, 3.4-liter twin-turbo V6 engine matched to a slick 10-speed automatic transmission. This powertrain is quite strong and driver's likely won't miss the old V8, except for its exhaust note. The LX remains a traditional body-on-frame design with a solid rear axle, to the detriment of third-row room. The height-adjustable suspension can lower the vehicle for easier access or raise it for off-road obstacles. Standard active safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, and lane centering assistance.

Lexus NX ✓

77
87
OVERALL SCORE

The recently redesigned NX may look similar to the previous model, but it has evolved beneath the surface. We think the NX350h hybrid is the best version with its 38 mpg overall fuel economy, compared with NX350's 25 mpg from its 275-hp turbocharged four-cylinder engine. The NX's handling is responsive though short of sporty, while the ride is firm but mostly comfortable. The snazzy cabin is impeccably furnished but narrow, and outward visibility is hampered by thick roof pillars and small windows, particularly toward the rear. A new touchscreen infotainment system replaces the previous NX's fussy touchpad setup. While the NX's frivolous electronic interior door releases, unintuitive gear selector, and low center dash vents are annoying, they're small faults in what is otherwise a pleasant vehicle. All NXs come standard with AEB with pedestrian detection, BSW, and RCTW.

Lexus RX

NA
OVERALL SCORE

The redesigned 2023 RX is powered by a 275-hp, 2.4-liter turbocharged four-cylinder engine, which replaces the smooth V6 used in past generations. It's powerful but lacks the old V6's silky smoothness. The RX350h is the hybrid version, powered by a 246-hp, 2.5-liter four-cylinder and an electric drive. The RX500h is a performance-oriented, 366-hp turbocharged four-cylinder hybrid. The ride is comfortable, handling is sound but not sporty, and fit and finish is impeccable. The infotainment system uses touchscreen-based controls instead of the old touchpad. Overall the new system is an improvement, but it can be tedious to use and it lacks polish. Active safety and driver assistance features include AEB with pedestrian and cyclist detection, BSW, RCTW, and lane centering assistance.

Lexus UX ✓

75
OVERALL SCORE

Lexus' entry-level luxury SUV is the brand's smallest model. For 2023, the UX is exclusively hybrid and comes in front- and all-wheel-drive versions. We got an excellent 37 mpg overall in our tests, but the engine sounds very whiny when it revs. The UX has a comfortable ride, but it isn't as plush as the bigger, more expensive Lexus SUVs. Handling is responsive, and the compact size makes the UX very maneuverable, but it isn't sporty to drive. Visibility is limited in all directions, and the interior is tight, particularly the rear seat. The cabin isn't as fancy as it is in other Lexus models. Updates also include a new touchscreen infotainment system. AEB with pedestrian detection, BSW, RCTW, and lane centering assistance are standard.

Lincoln Aviator

46 OVERALL SCORE

The Aviator is a three-row luxury SUV that shares a platform with the Ford Explorer. It's powered by a 3.0-liter V6 turbo engine that provides effortless thrust. A plug-in hybrid is also available, but it prioritizes power over outright fuel economy. Handling is remarkably agile for such a large vehicle, the ride is comfortable, and the cabin stays hushed. The interior is lavishly furnished with chrome, wood, and leather, and the seats are plush and supportive. However, some controls are unintuitive, such as the push-button gear selector and electronic door latches. The large infotainment screen responds quickly and is easy to use. The second-row seat is roomy, but the third row is tight. Lincoln's standard Co-Pilot360 safety suite includes FCW, AEB with pedestrian detection, BSW, and RCTW.

Lincoln Corsair ✓

84 OVERALL SCORE

This upscale version of the Ford Escape comes standard with a 2.0-liter turbo that provides plenty of motivation, making the optional 2.3-liter turbo unnecessary. A plug-in hybrid with roughly 25 miles of electric range is also available. The Corsair has responsive handling, rides very comfortably, and is quiet inside. The front seats aren't ideal because the bottom cushion loses support on longer drives. The rear seat is adjustable fore and aft, and the seatback reclines. Fit and finish is impressive, and, adding flair, the center stack appears to be floating in the air. The infotainment screen is easy to use, but the push-button gear selector is unintuitive. AEB with pedestrian detection, BSW, and RCTW are standard. Lincoln's active driving assistance system, ActiveGlide, is available.

Lincoln Nautilus ✓

79
OVERALL SCORE

The Nautilus midsized luxury SUV has a comfortable ride, a quiet cabin, and agile handling. It's available with either a 2.0-liter four-cylinder turbo or a powerful 2.7-liter turbo V6, the latter delivering effortless acceleration. The new eight-speed automatic should slightly improve the unimpressive 18 mpg overall we measured in the MKX (the old name for the SUV) we tested. The swanky cabin has been updated with a larger 13.2-inch screen and the latest Sync 4 infotainment system. The biggest knock against the Nautilus is its unintuitive push-button gear selector, which is a far reach away and difficult to operate without looking at it. AEB with pedestrian detection, BSW, and RCTW come standard.

Lincoln Navigator

57
OVERALL SCORE

This luxurious version of the Ford Expedition is quiet and full of high-tech features, including the latest Sync 4 infotainment system. At low speeds the SUV feels like it rocks back and forth, but the ride improves and is more comfortable on the highway. Handling is cumbersome, even for a large SUV. The twin-turbo V6 and 10-speed automatic deliver quick and effortless acceleration, and towing capacity is a stout 8,300 pounds. The front cabin is roomy, but the standard seats are uncomfortable, and the push-button gear selector is fussy to use. Seven- and eight-seat configurations are available, and the third row is hospitable. AEB with pedestrian detection, BSW, and RCTW are standard. For 2023, Lincoln's active driving assistance system, ActiveGlide, is standard.

Lucid Air

NA
OVERALL SCORE

The luxurious Air EV is very advanced in terms of range and charging speed. The Touring version has 620 hp and an EPA rated range of 380 miles, and the dual motors give the Air all-wheel drive. The 900-volt architecture enables a maximum acceptance rate of 300 kW in DC fast-charging places. The Air is quick, yet power is usually delivered in a measured way. Handling is nimble, and the ride is firm and composed. But some electric whine is present at low speeds and the wind noise on the highway is unbefitting the price. Inside, the cabin is decked in leather, suede, and wool. While the rear seat has generous headroom and knee room, it's short on leg support and foot space. Some controls are unintuitively buried in the touchscreen menus. The suite of active safety features is augmented by lidar, an advanced laser-based radar system.

Maserati Ghibli

49
OVERALL SCORE

Although it's loosely based on the Chrysler 300's platform, the Ghibli has its own distinct, sporty character. The Ferrari-developed turbo V6 engine is mated to a quick-shifting eight-speed automatic. A V8 comes on the Trofeo version. Handling is agile, the brakes are strong, and the engine emits a thrilling bark. But the stiff ride can grow fatiguing, and the rear seat is cramped. Climbing into or out of this low-slung sports sedan can be a challenge. The interior is outfitted with high-quality leather and suede, and most controls are easy to use, except for the unintuitive gear selector. Chrysler's Uconnect touchscreen is a plus, but it's hard not to notice some cheap-looking switches that are sourced from the Chrysler parts bins. AEB with pedestrian detection, BSW, and RCTW are standard.

Maserati Grecale

NA OVERALL SCORE

The Grecale SUV is based on the Alfa Romeo Stelvio and has a good balance of elegance, athleticism, and performance. There are three trims and powertrains initially, with 296- and 325-hp four-cylinder turbo engines, and a 523-hp turbo V6. The cabin is decidedly modern and dominated by screens. Even with the base engine, the Grecale feels quick and the sonorous exhaust sound adds to its character. The taut suspension makes this SUV agile and stable in corners and yet, the ride is firm and composed. The cabin is luxurious with suede, matte wood and chrome touches, and the trademark clock is prominent. The infotainment is a version of Chrysler Uconnect and user-friendly but the push-button gear selector on the dashboard is unintuitive. AEB with pedestrian detection is standard, with BSW, and RCTW optional.

Maserati Levante

NA OVERALL SCORE

Derived from the Ghibli and Quattroporte sedans, most versions of the Levante SUV come with a 345-hp or 424-hp turbo V6. Each is mated to a quick and smooth-shifting eight-speed automatic. The Trofeo version uses a turbocharged V8. The Levante delivers a thrilling sound from the Ferrari-developed engine, with nimble, athletic handling and, courtesy of the standard air suspension, a steady ride. Interior features include a version of Chrysler's Uconnect infotainment system with an 8.4-inch touchscreen, along with a stunning cabin that's wrapped in leather, suede, and wood, with comfortable seats and detailed stitching. But the gear selector and other controls are not intuitive to use. For 2023, AEB with pedestrian detection, BSW, and RCTW are standard.

Mazda CX-30

64 OVERALL SCORE

The Mazda3-based CX-30 comes with a 2.5-liter four-cylinder matched to a six-speed automatic and AWD. In everyday driving, acceleration feels tepid, as wringing out more power requires a heavy foot on the accelerator pedal. Fuel economy of 27 mpg overall is respectable. An optional 2.5-liter turbo engine transforms the driving experience with much-needed additional oomph. The CX-30 benefits from responsive handling, but its ride is rather firm and a bit jumpy, and the engine sounds raspy. The frustrating infotainment system requires multiple steps to complete simple tasks. The interior is well-trimmed but snug, especially the rear seat. Small side windows hurt outward visibility. AEB with pedestrian detection is standard, but BSW and RCTW are optional.

Mazda CX-5 ✓

77 OVERALL SCORE

The CX-5 remains one of the best small SUVs. A recent freshening brought transmission, suspension, and seat updates. The 2.5-liter four-cylinder engine and six-speed automatic make for a responsive and unobtrusive powertrain. With its standard AWD, fuel economy of 24 mpg overall is good but not a stand out. High-end versions have a more powerful turbo engine. Handling is responsive and enjoyable, and the steady, compliant ride is among the best in the class. The cabin is quiet, and interior quality is substantial and looks attractive. Soft-touch surfaces and chrome trim add to the interior ambience. But there is a learning curve to mastering the infotainment system. Exterior styling compromises rear and side visibility. AEB with pedestrian detection, BSW, and RCTW are standard.

✓ RECOMMENDED

Mazda CX-50 ✓

78 OVERALL SCORE

The CX-50 comes with standard all-wheel drive, more ground clearance, and a lower roof height than the CX-5. The base 187-hp four-cylinder feels underpowered and the SUV doesn't accelerate with much alacrity, while the six-speed automatic delivers some bumpy shifts. The up-level turbo engine is more enjoyable, thanks to its extra oomph. Forget the off-road marketing hype, however, because the CX-50's agile on-road handling gives the SUV a sporty feel through corners. The ride is well controlled but far too firm on the 20-inch wheels of our tested Premium Plus trim. The front seats are comfortable, and the rear is roomy with easy access, thanks to wide-opening doors. The infotainment system's center-console controller knob takes some getting used to. AEB with pedestrian detection, and BSW are standard.

Mazda CX-9 ✓

74 OVERALL SCORE

This stylish, three-row midsized SUV is quite engaging to drive, thanks to nimble handling that makes it feel like a smaller vehicle. Power comes from a responsive, free-revving 227-hp, 2.5-liter turbo four-cylinder that's mated to a smooth-shifting six-speed automatic and standard all-wheel drive. We got 22 mpg overall in our testing. The ride is very composed, and the cabin is quiet. The interior is well finished, particularly on the top Signature trim, and the seats are comfortable. The second-row seating is generous, and high-end versions have individual captain's chairs instead of a bench. The third row is predictably tight. Mazda's infotainment system is cumbersome to use, thanks to its console-mounted controller knob. AEB with pedestrian detection, BSW, and RCTW are standard.

Mazda CX-90

NA OVERALL SCORE

Mazda's new three-row CX-90 is an attempt to move the brand upscale, with a brand new rear-wheel-drive based platform, a potent engine, an optional plug-in hybrid, and a luxurious interior. The all-wheel-drive CX-90 will be available with an all-new 3.3-liter six-cylinder turbocharged engine with 280- or 340-hp. This is Mazda's first inline-six and the most powerful production engine ever offered by the automaker. In addition, a 323-hp, 2.5-liter four-cylinder plug-in hybrid version with a 17.8 kWh battery will also be available. A new eight-speed automatic is paired to both engines. An available facial recognition system can identify the driver's saved settings and adjust audio, climate, and seat accordingly. A comprehensive suite of active safety features is standard.

Mazda MX-5 Miata ✓

82 OVERALL SCORE

Mazda's lightweight, rear-wheel-drive, two-seat roadster can accelerate quickly when the engine is revved high, yet it manages 34 mpg overall. Shifting the delightfully accurate six-speed manual transmission is a joy. Even though the optional six-speed automatic works well, it dilutes the driving experience compared with the manual. Quick and precise steering delivers sublime back-road handling, even though some body roll is noticeable. High levels of noise, thin and unsupportive seats, and a stiff ride all grow fatiguing during highway travel. Cabin space is snug, and the optional dial-controlled infotainment system takes time to master. Flipping the convertible top open or closed is a breeze. AEB, BSW, and RCTW are standard. Pedestrian detection is not offered.

Mazda3 ✓

74 OVERALL SCORE

The Mazda3 is offered in sedan and hatchback forms. In our tests the standard 2.5-liter four-cylinder and six-speed automatic worked well together. The up-level engine is a more powerful 2.5-liter turbo four-cylinder. All-wheel drive is also available and is standard on the turbo. Handling is still nimble, but it's less sporty than in past generations. The ride is firm but steady, and the suspension absorbs impacts well, though the turbo version is stiffer. The cabin is relatively quiet and nicely finished, but the rear seat is snug. The driver interacts with the infotainment system exclusively through a rotary knob, rather than a touchscreen; we found this setup to be fussy and distracting to use. AEB with pedestrian detection is standard, while BSW and RCTW are optional on the base car and standard on all other trims.

Mercedes-Benz C-Class

53 OVERALL SCORE

The redesigned C-Class features a polished powertrain and sharp handling. But the controls and a spongy brake pedal mar the experience. The C300's punchy, 2.0-liter turbo four-cylinder and smooth-shifting 9-speed automatic deliver plenty of invigorating power. The 48-volt mild-hybrid system contributes to the commendable 29 mpg overall. Handling is sporty, thanks to a tightly controlled chassis and sharp steering. The ride is steady and composed but is too stiff with the optional AMG sport suspension. The front seats are supportive, and cabin fit and finish is impressive. Capacitive-touch controls add further frustrations to the infotainment system. AEB with pedestrian detection and BSW are standard, but RCTW and reverse automatic emergency braking are optional.

Mercedes-Benz CLA

48
OVERALL SCORE

The CLA slots above the A-Class and below the C-Class in Mercedes sedan lineup. It's essentially a more stylish version of the A-Class, but it uses a more powerful 221-hp version of the same 2.0-liter turbo four-cylinder engine. Like the A220, it has a dual-clutch seven-speed automatic. Acceleration feels a bit hesitant and lethargic during stop-and-go driving, but you'll find that there's decent power on hand when the engine is revved out a bit. Although handling is nimble, the ride is too stiff. The interior is nicely finished, and the front seats are supportive, but the rear seat is extremely cramped and hard to access. We found this version of Mercedes MBUX infotainment system to be quite tricky to use. AEB with pedestrian detection, and BSW are standard. But RCTW is only optional.

Mercedes-Benz E-Class

61
OVERALL SCORE

The E-Class is nimble and fun to drive. However, its ride comfort, interior room, and controls are less impressive. The 2.0-liter turbo four-cylinder and nine-speed automatic returned a very good 24 mpg overall. The car is quiet and handles with impressive agility. The ride is mostly comfortable, but the suspension struggles to smother some impacts. The infotainment system requires too many steps for common tasks. When using the steering-wheel controls, it's easy to end up inadvertently changing a display or an audio selection. The seats are extremely comfortable, and there is an optional massage feature. Fit and finish is meticulous. AEB with pedestrian detection, and BSW are standard. It's disappointing that reverse automatic emergency braking are only optional. A redesign arrives soon.

Mercedes-Benz EQE

NA OVERALL SCORE

The EQE sedan is the EV parallel to the E-Class. Like its big brother the EQS, the EQE boasts lots of high-tech features and can be equipped with rear steering, which typically aids low-speed maneuverability and higher-speed handling. It has a 90-kWh battery, and the EPA-rated range for the dual-motor, AWD EQE 350+ is 260 miles. Among its optional features is the 56-inch wide 'Hyperscreen' contains the instrument cluster, infotainment touchscreen, and another screen for the front passenger under a single panel. Unlike the EQS, the EQE is a traditional sedan with a regular trunk, not a liftback. Standard active safety and driver assistance features include AEB with pedestrian detection, BSW, and RCTW.

Mercedes-Benz EQS

67 OVERALL SCORE

The EQS580 we tested is super-quick and very quiet, rides comfortably, and handles with agility, thanks to the standard four-wheel-steering system. The brakes feel disconcertingly spongy, and the pedal eerily moves on its own during aggressive regenerative braking. The rear-drive 450+ models have a single electric motor that produces 329 hp, while the 580 4Matic delivers 516 hp through a motor on each axle, giving it AWD. EPA-estimated ranges are 350 and 340 miles, respectively. The driving position is a bit awkward, and the rear seat isn't as spacious as the car's size would indicate. The controls look impressive but are very distracting to use. AEB with pedestrian detection, BSW, RCTW, and lane centering assistance are standard.

Mercedes-Benz EQS SUV

NA
OVERALL SCORE

The EQS SUV is a fully electric SUV that comes standard in a rear-drive, one-motor configuration with has an EPA estimated range of 305 miles. The 4Matic includes two motors, thus making it all-wheel drive, and has an estimated range of 285 miles. Both configurations have a 9.6-kW onboard charger and use a large 107.8-kWh battery. They are compatible with maximum DC charging output of 200 kW. EQS 580 models make over 500 horsepower, but even the 450 is plenty quick, quiet and effortless. The ride is comfortable and serene, and handling is agile, partly due to the four-wheel steering. The brake pedal feels spongy, however. Controls are daunting at first but manageable. A small third row seat is optional. The SUV boasts many active safety features, and the adaptive cruise control, combined with LKA, can execute lane changes on its own if the driver signals.

Mercedes-Benz GLA

53
OVERALL SCORE

The GLA is powered by the same 221-hp, turbocharged four-cylinder engine as its GLB sibling, mated to a dual-clutch automatic. It's a pretty quick car despite some initial hesitation starting up from rolling stops. Front-wheel drive is standard, with all-wheel drive optional. Fuel economy is commendable, at 27 mpg overall. The roofline is sleeker than the more upright GLB, and visibility to the rear and sides suffers as a result. The solid, substantial GLA feels taut and agile on the road, but the ride skews firm. The seats are comfortable and supportive, and as with other recent entry-level Mercedes models, fit and finish is impressive. We found the elaborate infotainment system to be too distracting to use while driving. AEB with pedestrian detection, and BSW are standard, but RCTW is only optional.

Mercedes-Benz GLB

56
OVERALL SCORE

The GLB compact SUV's square, upright stance aids in outward visibility. Despite its compact dimensions, the GLB offers an optional, albeit tight, third-row seat. The 2.0-liter turbo four-cylinder engine and eight-speed dual-clutch automatic make for a responsive powertrain, and returned a respectable 26 mpg overall in our tests. A fully electric version, named the EQB (shown), is also available. The GLB feels light on its feet and nimble in corners. The ride is firm but steady and controlled. The cabin is well finished and quiet. Although the infotainment system is very capable and dazzling in appearance, we found it to be cumbersome and distracting to use. The GLB comes with either front- or all-wheel drive. AEB with pedestrian detection, and BSW are standard, but RCTW is only optional.

Mercedes-Benz GLC

NA
OVERALL SCORE

The redesigned GLC looks largely the same as its predecessor, but it comes with a number of key technological updates. Among them are an improved suite of standard active safety systems and optional driver assistance features. Matching it with the rest of Mercedes' line, it also gets an augmented video navigation system that superimposes navigational directions and pictures of the real world taken from the car's exterior cameras onto the navigation maps. The SUV will launch with a 255-hp, 2.0-liter turbocharged four-cylinder engine that uses 48-volt mild-hybrid technology, paired with a nine-speed automatic. The GLC coupe is still based on the outgoing GLC generation. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard.

Mercedes-Benz GLE

53
OVERALL SCORE

The GLE is very quiet and impeccably finished inside, and has excellent seats. The up-level GLE 450 has a powerful 3.0-liter turbo six-cylinder that returned 20 mpg overall in our tests. A 255-hp, 2.0-liter turbo four-cylinder is standard. The 63 S version gets a 603-hp V8. The GLE rides comfortably, but its handling is rather dull. It comes with Mercedes' latest infotainment system, which has a broad range of capabilities but is complicated and distracting to use. Audio, phone, navigation, and some comfort functions can be handled through the touchscreen, the touchpad, or the touch-sensitive controls on the steering wheel. The ability to use voice commands with natural speech helps some. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard.

Mercedes-Benz GLS

58
OVERALL SCORE

The GLS is a very functional three-row SUV that exudes luxury with its gorgeous interior. The standard 3.0-liter turbo six-cylinder engine provides plenty of smooth and effortless power. An even more powerful turbo V8 is available. The ride is composed, and handling is responsive for such a large luxury coach. All the seats are first-rate, and the interior can be configured for either six or seven passengers. Unlike in most competitors, the third-row seat is relatively roomy. However, the infotainment system is distracting because many common tasks require a few steps. Plus, when using the steering-wheel controls, it's easy to inadvertently change a display or an audio selection. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard.

Mercedes-Benz S-Class

NA OVERALL SCORE

The latest S-Class sedan continues to deliver a hushed cabin and impeccable fit and finish. Though composed, the ride is less plush than it was in past generations. A 429-hp, 3.0-liter turbo inline-six is standard, and the up-level choice is a 496-hp, 4.0-liter turbo V8. Each is teamed with a nine-speed automatic and supplemented with a 48-volt mild-hybrid system. The car's rear-wheel steering turns the wheels in the direction of travel to aid highway-speed handling, and in the opposite direction to improve low-speed maneuverability. That makes the S-Class quite agile in the corners, belying its size. The infotainment system is complicated to use. The slick head-up display features augmented reality. AEB with pedestrian detection, BSW, RCTW, and lane centering assistance come standard.

Mini Cooper ✓

82 OVERALL SCORE

The Mini hardtop is sporty, quirky, and full of character. The Cooper S uses a 189-hp, turbo four-cylinder and got 30 mpg overall with the six-speed manual, while the standard 134-hp, 1.5-liter turbo three-cylinder engine is surprisingly energetic. Handling is nimble and sporty, making the Mini fun to drive on curvy back roads. The ride is somewhat firm, however, and road noise is noticeable. Controls take some getting used to, and the back seat is still tiny. The high-performance John Cooper Works version bumps power to 228 hp and gets a firmer suspension. There's a wagon-like Clubman with small barn-style rear doors. An all-electric version is available with an EPA-estimated 114-mile driving range. AEB with pedestrian detection is standard, but BSW and RCTW aren't available.

Mini Cooper Countryman ✔

75 OVERALL SCORE

The SUV-like Countryman offers a rather rough 1.5-liter turbo three-cylinder and a stronger, much more enjoyable 2.0-liter turbo four-cylinder. Front- and all-wheel drive are offered. The Countryman's agile handling makes it fun to drive. The ride is on the firm side, and the cabin can get loud. The interior is solid and well finished, the front seats are supportive, and the back seat is surprisingly comfortable. The BMW-sourced iDrive infotainment system has a learning curve but is logical. The AWD SE plug-in hybrid mates the turbo three-cylinder with electric drive and has an EPA-estimated 18-mile electric range. While AEB with pedestrian detection is standard, BSW and RCTW aren't available at all.

Mitsubishi Eclipse Cross

56 OVERALL SCORE

The coupelike Eclipse Cross' recent makeover didn't change this ultimately underwhelming SUV's mundane handling, unsettled ride, and restricted outward visibility. Fortunately, Mitsubishi dropped the convoluted infotainment touchpad system in favor of more user-friendly conventional volume and tune knobs, and a touchscreen that is easier to navigate. The lackluster 1.5-liter turbo four-cylinder and CVT moves the SUV decently around town but runs out of steam merging onto highways, and its 24 mpg overall isn't impressive. The driver's seat is short on support. However, it's easy to get into and out of the cabin, and the rear-seat room is generous. AEB with pedestrian detection is standard, while BSW and RCTW are optional. For 2023, all-wheel drive became standard.

Mitsubishi Mirage

35 OVERALL SCORE

A rock-bottom sticker price and thrifty fuel economy of 37 mpg overall conjure an image of a practical and economical runabout. But that mirage quickly dissipates when driving this tiny, tinny car. Since its introduction, minor updates, including a 2021 freshening, have brought a sedan body style, a hint more power, better infotainment, and upgraded brakes. Yet those enhancements don't mask the weak, vibrating three-cylinder engine that delivers sluggish acceleration or the car's clumsy handling. Though it's relatively roomy, the depressing cabin feels drab, cheap, and-insubstantial. In the end, there is no compelling reason to buy a Mirage, and for the same price, many much better used cars are available. AEB with pedestrian detection is standard, but BSW and RCTW aren't available.

Mitsubishi Outlander ✓

72 OVERALL SCORE

The seven-passenger Outlander is based on the Nissan Rogue, although the tiny third-row seat is exclusive to the Mitsubishi. Acceleration is leisurely, but the continuously variable transmission is responsive, and the Outlander managed 25 mpg overall from its Nissan-sourced 2.5-liter, four-cylinder engine. Handling is nimble and secure, but steering feels light and nervous. The ride is stiff, and wind noise is noticeable. Most controls are easy to use, including the infotainment system. The plug-in hybrid version is much quicker and quieter, and provides 38 miles of electric driving before the gas engine kicks in for a total of 400-plus miles. Standard active safety features include AEB with pedestrian detection, BSW, RCTW, and LDW.

Mitsubishi Outlander Sport

NA OVERALL SCORE

This aging SUV is a shortened version of the previous-generation Outlander, but with less rear-seat room and cargo space. Despite the name, when it comes to driving it's not exactly a sporty SUV. Handling is mundane, and acceleration is just adequate. In addition to the 2.0-liter engine, a more powerful 2.4-liter four-cylinder engine is available. The Sport's choppy ride and very noisy cabin further detract from the driving experience. Still, it has a commanding seating position, as well as passenger and cargo versatility. Top-trim all-wheel-drive Outlander Sports are priced like many larger, more capable SUVs. AEB with pedestrian detection is standard, but BSW and RCTW are optional.

Nissan Altima ✓

82 OVERALL SCORE

The Altima got a mild freshening and expanded safety features for 2023. Although it's a rather unremarkable mid-sized sedan, it gets the job done, delivering on room, fuel economy, and user-friendliness. But the driving experience falls short on handling agility, and the seemingly pliant ride isn't adept at absorbing all types of bumps. The standard 2.5-liter engine provides decent acceleration, and the car gets a commendable 31 mpg overall. All-wheel drive is available. There's also a more powerful 2.0-liter turbo engine. The car is relatively quiet. The cabin is roomy, and the rear seat is very generous. But the Altima's low ride height can make it a little challenging to get in and out. Controls are very easy to use. Standard active safety features include AEB with pedestrian detection, BSW, and RCTW.

Nissan Ariya

NA OVERALL SCORE

The Ariya come standard with a 63-kWh battery, and long-range versions have an 87-kWh battery. Front- or all-wheel drive versions are offered. Front-drive versions make 238 hp, with the dual-motor AWD models producing 389 hp. The former with the long-range battery has an estimated range of 300 miles. The ride is mostly comfortable, and the Ariya is quiet. The roomy cabin is uncluttered. Among a few nice details is a center console that can slide fore-aft by a push of a button. Many switches are neatly embedded into the wood trim. Standard safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, LDW, and automatic high beams. High-end versions have the ProPilot Assist 2.0, which allows hands-free driving on certain highways.

Nissan Armada

49 OVERALL SCORE

This less expensive version of the Infiniti QX80 still uses a robust 5.6-liter V8, but it now makes 400 hp. In our tests we got a paltry 14 mpg overall. Though the soft suspension absorbs bumps well, the body jostles frequently. Handling is clumsy, with slow steering and pronounced body roll, but it's ultimately secure. Inside, the spacious cabin has a premium feel, particularly in the Platinum trim. The infotainment system has been updated, but some other controls feel old, and it's a far reach to some buttons and knobs. Seven- and eight-passenger seating configurations are available, and the third row can power-fold and -unfold. Available in rear-wheel or full-time four-wheel drive, the Armada can tow a generous 8,500-pound load. AEB with pedestrian detection, BSW, and RCTW are standard.

Nissan Frontier

52
OVERALL SCORE

The Nissan Frontier is powered by a brawny-yet-smooth 310-hp, 3.8-liter V6 engine that is paired with a slick-shifting nine-speed automatic transmission. This combination is the truck's best asset. Fuel economy of 18 mpg overall is an improvement but not a standout, even compared with some full-sized pickups. But it feels as if there's more available power than the small turbo four-cylinders in some competitors. Handling is relatively responsive and secure, but the steering is too heavy at low speeds. Plus, the steering wheel lacks a telescope adjustment. The ride is stiff and choppy but not as bad as before. The rear seat is tight, but the controls and infotainment system are easy to use. The tailgate is now much easier to open and close. The Pro-4X version is off-road-ready, with a rear locking differential. AEB with pedestrian detection is standard. BSW and RCTW are optional.

Nissan Kicks ✓

61
OVERALL SCORE

Nissan's smallest subcompact crossover is more of a budget car designed to appeal to those customers who would normally buy a Nissan Sentra or Versa but are attracted to the better versatility and styling of an SUV. Unlike many crossovers, the Kicks doesn't offer all-wheel drive. It comes with a modest 122-hp, 1.6-liter four-cylinder engine coupled to a continuously variable transmission, producing leisurely acceleration but impressive fuel economy at 32 mpg overall. Handling is mundane, and the ride is rather choppy. Interior room is generous for the class, and the controls and updated infotainment system are easy to use. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard.

Nissan Leaf ✓

70 OVERALL SCORE

For 2023, the Leaf EV has been slightly freshened and is now available in S and SV Plus trims. The standard 40-kWh battery provides an EPA-estimated range of 149 miles, while the SV Plus gets a 60-kWh battery with an estimated range of about 212 miles. It also gets a more powerful motor that makes the SV Plus a second quicker from 0 to 60 mph than the base Leaf. It takes 8 hours to charge the Leaf S on a 240-volt connector and 10.5 hours to charge the SV Plus. The ride feels soft until you hit a bump hard. Handling is mundane but secure. The driving position is awkward because the steering wheel doesn't telescope for reach. AEB with pedestrian detection, and BSW are standard. The optional ProPilot Assist can keep the Leaf in its lane and adjust its speed according to traffic.

Nissan Murano ✓

74 OVERALL SCORE

Nissan's midsized SUV uses a punchy, refined 3.5-liter V6 paired with a continuously variable transmission. Power delivery is prompt and effortless, and we got 21 mpg overall. The cabin is quiet and well-finished, and has an upscale feel to it. The rear seat is roomy, and access is easy. Rear and side visibility are hindered, however. Handling is not very sporty, with too-light steering that reduces driver confidence. The ride is steady and absorbent on the standard 18-inch tires but less so on the 20-inch tires found on the Platinum trim. Nissan's Safety Shield 360 is standard for all trims, and includes AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking.

Nissan Pathfinder

45 OVERALL SCORE

Recently redesigned, the three-row Pathfinder is a major improvement over its predecessor, with a punchy powertrain and an easy-to-use infotainment system. The 3.5-liter V6 makes 284 hp and now comes mated to a nine-speed automatic, together delivering smooth and effortless propulsion, and 21 mpg overall. It comes as either front- or all-wheel drive. The ride is steady, if stiff-legged, but handling is responsive for a mid-sized SUV. Physical buttons and knobs for commonly used climate and infotainment functions make it user-friendly. Either seven- or eight-passenger seating configurations are offered. AEB with pedestrian detection, BSW, and RCTW are standard. Nissan's ProPilot Assist driver assistance system is optional. A Rock Creek trim with some off-road ability is new for 2023.

Nissan Rogue ✓

81 OVERALL SCORE

The Rogue is roomy and user-friendly. We got 25 mpg overall from the all-wheel-drive version with its new 201-hp, 1.5-liter turbo three-cylinder. It's more responsive than the 2.5-liter four it replaced, albeit with some vibration at idle, but we found fuel economy and acceleration to be the same. The Rogue feels solid and substantial, with a composed ride and nimble handling. Interior space is generous, and access is very easy. Controls are easy to use, even if the electronic gear selector may require some familiarity. The top-shelf Platinum trim brings upscale touches, such as quilted leather seats, a head-up display, heated rear seats, and an upgraded infotainment system. Standard safety systems include AEB with pedestrian detection, BSW, and RCTW.

Nissan Sentra

48 OVERALL SCORE

The current Sentra is a complete transformation compared with the previous model, as evidenced by its strong score in our road tests. It shed its dowdy look and driving mediocrity to become one of the best sedans in its class. The engine and transmission pleasantly combined to provide unobtrusive acceleration. The more sophisticated rear suspension facilitates a comfortable ride and nimble handling. The interior looks upscale, especially in the SR and SV trims; buyers can even get a power seat, leather upholstery, and heated seats. We found the rear seat to be relatively roomy, and the infotainment system is easy to use. Standard active safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking.

Nissan Titan

55 OVERALL SCORE

The light-duty Titan is more pleasant to drive than the Titan XD (Extra Duty), which has a stiff ride and clumsy handling, similar to a heavy-duty pickup's. The Titan comes with a smooth and punchy 5.6-liter V8. The roomy cabin has a variety of handy storage places, and the rear tailgate is damped, which is a nice touch. When properly equipped, the Titan can tow more than 9,000 pounds. It also has a built-in gooseneck trailer hitch for extra-heavy trailers. Recent updates included a nine-speed automatic, new interior and exterior styling, and an available 9-inch touchscreen infotainment system. Standard active safety features include AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking.

Nissan Versa

59
OVERALL SCORE

Although it's more stylish after the last redesign, the Nissan Versa remains a basic, inexpensive subcompact. Available as a sedan only, we found it to be easy to drive and user-friendly. Important active safety features such as AEB with pedestrian detection, and LDW are standard. But the Versa is no joy to drive, with its stiff ride, dull handling, and droning engine. Fuel economy is good at 32 mpg overall but not a standout, considering that a number of midsized sedans can match or better that. The driver's seat is short on support, and unlike in previous Versas, the rear seat is tight. A more substantial used car can be had at the same price, but those who buy the Versa should get the SV trim for its BSW, RCTW, and Android Auto/Apple CarPlay compatibility.

Nissan Z

NA
OVERALL SCORE

Nissan's redesigned 2023 Z sports car has the classic long, sloped hood and wide rear flanks that evoke the early versions of this storied nameplate. The two-seat, rear-drive Z has a 400-hp, 3.0-liter twin-turbo V6, marking a significant increase of 50 hp over the previous 370Z's output. That fiery powerplant can be paired with a choice of six-speed manual or nine-speed automatic with paddle shifters. The reborn Z is a true thoroughbred, given its looks, handling abilities, and prodigious power. The Z's taut ride offers more compliance than most serious sports cars. The snug cabin and limited visibility are a given. Standard active safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, and adaptive cruise control.

Polestar 2

53
OVERALL SCORE

This tall hatchback from Volvo's EV sub-brand is based on the XC40 SUV. Its 78-kWh battery has an EPA-rated range of 260 miles for the dual-motor AWD version, which is competitive. A less expensive single-motor, front-wheel-drive version is also available. It takes over 10 hours to charge the battery from near-empty. The Polestar is quick and handles nimbly, but the ride is very stiff and choppy. The interior is drab and suffers from a cramped driving position and a tight back seat. At least the car's hatchback layout aids cargo-carrying versatility. The infotainment system is extremely distracting because of the convoluted menu structure. Standard active safety and driver assistance features include AEB with pedestrian detection. Disappointingly, BSW and RCTW are optional.

Porsche 718 Boxster ✓

78
OVERALL SCORE

This well-honed sports car is a delight to drive, whether you choose the seven-speed, dual-clutch automatic or the six-speed manual transmission. Both the 2.0- and 2.5-liter turbo engines deliver readily available power, and a stronger 414-hp, 4.0-liter six cylinder is available. Impressive grip and balance make the car super-responsive and fun to drive. The ride is very firm but not too punishing. The cabin has a premium ambience, but the button-overload controls take getting used to. Opening or closing the well-insulated power top takes 10 seconds and can be done even on the move, up to 43 mph. The front trunk is a bonus. Disappointingly, only active safety features FCW and BSW are optional. Other important features such as AEB with pedestrian detection and RCTW aren't even available. The 718 Cayman is essentially a 718 Boxster with a fixed roof.

Porsche 911

NA OVERALL SCORE

The 911's silhouette and rear-engine layout are hallmarks of this classic icon. Both rear- and all-wheel drive are available. A 379-hp, 3.0-liter turbo six-cylinder engine and eight-speed dual-clutch automatic are standard. Purists will rejoice at the fact that the 911 still offers a seven-speed manual transmission on Carrera S and GTS models. We found the 911's sharp handling to be a treat, and the power and exhaust sound are invigorating. Ride comfort is civilized compared with other sports cars, and the seats are super-comfortable. A tiny rear seat and a frunk, or front trunk, offer a touch of practicality. An updated infotainment system includes a 10.9-inch touchscreen. Disappointingly, only AEB with pedestrian detection is standard, while BSW, RCTW, and adaptive cruise control with stop-and-go traffic capability are optional.

Porsche Cayenne ✓

70 OVERALL SCORE

Few SUVs can match the Cayenne when it comes to handling agility. But the ride has an underlying firmness, and some jolts come through. With the base 3.0-liter V6 turbo, acceleration is robust once on the fly, but the Cayenne exhibits some initial hesitation off the line and the rough engine stop/start feature undermines smoothness. The infotainment system and other controls are tricky to use. Interior fit and finish is impeccable, however. The seats are very comfortable and supportive. A coupe body style and two hybrids including the Turbo S E-Hybrid model, which pairs a 4.0-liter twin-turbo V8 engine and an electric motor for a total of 670 hp are also available. Disappointingly, only AEB with pedestrian detection is standard; while BSW, RCTW, and a surround-view camera system are optional. Look for a freshened 2024 model later this year.

⏬ ⌄ ! ⌃ ⏫ ✓
WORSE — BETTER RECOMMENDED

Porsche Macan ✓

73
OVERALL SCORE

The Macan combines much of the performance and feel of Porsche's sports cars in a small SUV. Turbocharged four-cylinder and V6 engines are available. Though based on the previous-generation Audi Q5, the power, handling, and engine sound are true Porsche. In fact, this is one of the best-handling SUVs we've ever tested. The seats, fit and finish, and attention to detail are first-rate. The firm ride is steady and controlled but not plush. The cabin is quite snug, and the center dashboard is a dizzying array of buttons that can be confusing at first. Though the Macan isn't meant for utilitarian tasks, it possesses impressively high towing and payload capacities. For 2023, AEB with pedestrian detection is standard. Disappointingly, BSW is optional and RCTW isn't offered.

Porsche Panamera

NA
OVERALL SCORE

This large four-door luxury car hides beneath a coupe silhouette and retains its versatile hatchback configuration. New turbo V6 and V8 engines provide plenty of motivation, and three hybrid powertrains are offered. An optional air suspension and active safety features are also available. The Panamera delivers performance and agility, along with enough room for four adults to ride comfortably. All versions except for the base car come with all-wheel drive. The interior features a large touchscreen that's used to interact with the audio, phone, and navigation functions. The electronic gear selector is confusing to use, and the piano-black buttons that surround it create visual and sensory overload. For 2023, AEB with pedestrian detection is standard. Disappointingly, BSW is only optional, and RCTW isn't available at all.

Porsche Taycan

61 OVERALL SCORE

Porsche's four-door EV is quick, agile, and very enjoyable to drive. The 4S Plus version's EPA-rated range is 235 miles. Charging time on a 240-volt connector takes a long 11 hours for the larger 93-kWh battery, but it can charge at an impressive rate of 270 kW on a DC fast charger. The front seats are very comfortable, but the rear seats are tight. Visibility to the rear and sides is hindered by the sloping roof. There's a decently sized rear trunk and a small front trunk. The touchscreen-based controls are complicated and unintuitive even after repeated use, and the EV-related displays aren't very prominent. Interior ambience is less impressive than it is in other Porsche models. A wagon version and a RWD version are also available. AEB with pedestrian detection is standard, but BSW and RCTW are optional.

Ram 1500 ✓

68 OVERALL SCORE

The Ram 1500 is the most comfortable-riding full-sized pickup truck, partly because of its rear coil-spring suspension. The 5.7-liter V8 is smooth, and the mild-hybrid option ensures seamless stop/start at idle. We got 17 mpg overall with the 5.7, and in our tests of the 3.0-liter V6 diesel, we saw 23 mpg overall. Handling is secure and responsive for such a large truck. The cabin is extremely quiet. In most versions, four-wheel drive can remain engaged indefinitely. Rear-seat room is generous, and the Uconnect touchscreen infotainment system is easy to use. The top Limited trim is lavishly furnished and features an enormous 12-inch touchscreen. The off-road-ready TRX version features a 702-hp V8. Active safety features, such as AEB with pedestrian detection, BSW, and RCTW are optional.

Rivian R1S

NA OVERALL SCORE

This three-row electric luxury SUV has an EPA-rated range of 321 to 289 miles, depending on the chosen tire size. A version with a 250-mile range is said to be coming soon. Based on our experience with the R1T, the R1S should prove quick and quiet. The interior is uncluttered, but the controls are unintuitive. The seats are comfortable and use synthetic leather. A frunk, or front trunk, adds cargo space. Standard active safety and driver assistance features include AEB with pedestrian detection, BSW, RCTW, and lane centering assistance. Rivian has recently raised prices, and announced that a less expensive dual-motor option and the smaller battery will be available in 2024.

Rivian R1T

63 OVERALL SCORE

This five-passenger crew-cab pickup truck is about the size of a Honda Ridgeline. The middle-tier battery pack gives it an EPA-rated range of 314 miles. The R1T is quick and quiet, rides comfortably, and handles with relative agility. It is even quite capable off-road, thanks to individual motors powering each wheel. The regenerative braking is quite strong, which results in a jerky feel every time drivers adjust their throttle position. An innovative storage tunnel between the cab and bed is handy as is the covered bed cover, whether its powered or manual. The swanky interior is uncluttered and exudes a high-tech vibe, but too many functions are handled through the touchscreen—including adjusting the air vents—which increases distraction. Comprehensive active safety and driver assistance systems are standard.

Subaru Ascent ✓

76 OVERALL SCORE

The Ascent is a very functional, easy-to-live-with three-row SUV. The Ascent's turbocharged four-cylinder delivers ample power in daily driving and gets 22 mpg overall. The jumpy initial takeoff takes some getting used to, however. The Ascent's plush ride is steady and controlled, and the suspension does an excellent job mopping up bumps. This is not the most agile SUV in corners, but it proves to be ultimately secure at its handling limits. The cabin is quiet, and the second-row captain's seats are roomy and comfortable. Even the third row is usable for shorter trips. Controls are very straightforward. The standard suite of active safety and driver assistance features includes AEB with pedestrian detection, LDW, LKA, and lane centering assistance. BSW and RCTW are optional.

Subaru BRZ ✓

78 OVERALL SCORE

The BRZ is all about accessible driving fun. It's a rear-wheel-drive, four-seat coupe with sharp handling that makes it engaging to drive. A low center of gravity, lightweight, short ratio six-speed manual transmission, and a responsive 2.4-liter, 228-hp engine contribute to the BRZ's engaging character. Suspension tuning is impressive, with a firm yet compliant ride, pinpoint cornering, and sharp steering. Road noise is a constant howl, however, and getting in and out is a chore due to the low stance. Controls are very simple and intuitive. A usable trunk and a tiny rear seat add a dash of practicality. Subaru's EyeSight suite of active safety features is available on versions with the automatic transmission. The BRZ's sister car, the Toyota GR86, has a stiffer ride but no discernible handling difference.

Subaru Crosstrek ✓

84
OVERALL SCORE

The Crosstrek delivers impressive ride comfort and competent handling. The 2.0-liter four-cylinder is mated to a CVT, and in our tests we got 29 mpg overall, which is among the best for small SUVs. The available 2.5-liter engine has stronger acceleration. The front seats are short on lumbar support, but the rear seat is roomy. The infotainment system is easy to use. A redesigned Crosstrek arrives this year with standard AEB with pedestrian detection and the same engine choices from the current model. There are also a few performance and design tweaks that Subaru says will improve handling. The manual transmission and plug-in hybrid version won't be available with the redesign.

Subaru Forester ✓

87
OVERALL SCORE

The Forester is a no-nonsense small SUV that delivers a combination of a roomy interior, excellent visibility, commendable fuel economy, simple controls, a comfortable ride, and responsive handling. The 2.5-liter four-cylinder combined with the continuously variable transmission yields 28 mpg overall, which is among the best in its class. But acceleration is a bit tepid, and the engine's coarse hum gets loud at high revs. The cabin is roomy, with a particularly generous rear seat, and access is very easy. The controls are simple to use, whether or not using Android Auto or Apple CarPlay. The off-road-oriented Wilderness version has extra ground clearance. While AEB with pedestrian detection, LDW, and LKA are standard, BSW and RCTW are optional.

Subaru Impreza ✓

76
OVERALL SCORE

This roomy compact has a very comfortable ride, agile and secure handling, and a relatively quiet cabin. The 152-hp. 2.0-liter four-cylinder is mated to an unobtrusive CVT and returned 30 mpg overall. The Impreza is satisfying to drive, thanks to responsive steering, and the body remains sure-footed in corners, no matter how bumpy the road. The infotainment screen is easy to use, and the rear seat is roomy. The redesigned 2024 Impreza comes as strictly a hatchback. The standard engine remains the 2.0-liter four-cylinder, but the new RS has a more lively 182-hp, 2.5-liter engine. Both are matched to a CVT, and as always, AWD is standard. All Imprezas come with the latest version of the EyeSight suite of active safety systems. Subaru claims that the system works faster and under a wider range of conditions than before. The top trim RS adds standard BSW and RCTW.

Subaru Legacy ✓

80
OVERALL SCORE

The Legacy provides a super-comfortable ride that outshines that of some luxury cars. Handling is responsive but not sporty. This AWD sedan is fitted with a choice of two four-cylinder engines: a 182-hp, 2.5-liter and a 260-hp, turbocharged 2.4-liter. The 2.5 liter is adequate and got a decent 28 mpg overall, but it makes an unpleasant roar when pushed. The turbo engine delivers strong acceleration and is quieter. We like that the well-tuned continuously variable transmission mimics the shift patterns of conventional automatics. The large infotainment screen hides common tasks deep in menus, and the system can be slow to respond to inputs. Standard active safety and driver assist features includes AEB with pedestrian detection, but BSW and RCTW are optional.

Subaru Outback ✓

80
OVERALL SCORE

Subaru's Outback is a smart alternative to an SUV. Although lower than a typical SUV, it can easily haul long items. The base 2.5-liter four-cylinder does the job but can feel strained when quicker speed is needed. The optional 260-hp, 2.4-liter turbo engine transforms the wagon with effortless acceleration. The ride is very comfortable, and handling is responsive and secure. Some tasks through the large infotainment screen require more than one step, however, and the system is slow to respond to inputs. Thoughtful details, such as built-in crossbars and a dual-position cargo cover, are nice touches. The Wilderness model has higher ground clearance. AEB with pedestrian detection, and lane centering assistance are standard, but BSW and RCTW are optional.

Subaru Solterra

NA
OVERALL SCORE

The Solterra is Subaru's first-ever electric vehicle and is essentially a Toyota bZ4X. It comes with front and rear motors to form an all-wheel-drive system. It has a functional interior, but its estimated range of 222 miles is shorter than the competition's. The power is smooth and predictable, but with 215 hp the Solterra is behind the competition. Handling is agile, and the ride is mostly comfortable. Oddly, there is no glove box or a rear wiper. With a weak 6.6-kilowatt onboard charger, home charging is on the slow side. DC fast charging in public places, with a maximum acceptance rate of 100 kW, is also on the skimpy side. Subaru's standard active safety features include AEB with pedestrian detection, BSW, RCTW, and adaptive cruise control.

Subaru WRX

63
OVERALL SCORE

The WRX features a 271-hp, 2.4-liter turbo flat-four engine, with a choice of a six-speed manual or a CVT. The car pulls strongly, and the manual shifter and clutch are more forgiving than before. Handling is agile, and the car has tenacious tire grip in corners. But the ride is very stiff, and the cabin gets quite loud due to elevated levels of road and engine noise. Most controls are logically placed and easy to use, but many of the climate functions integrated into the slow-responding infotainment screen require multiple steps to use. A new top-level GT trim brings heavily bolstered Recaro front seats, an adjustable suspension, and further active safety and driver assistance features. Only versions equipped with the CVT come with AEB with pedestrian detection, and adaptive cruise control.

Tesla Model 3 ✓

78
OVERALL SCORE

The Model 3 has swift acceleration and remarkably agile handling. Though the front seats are comfortable, the ride is very stiff and choppy, and the low rear seat uncomfortable. The Long Range version is rated at 358 miles of range. It takes 12 hours to charge on a 32-amp, 240-volt connector. The ability to fast charge at Tesla supercharger venues is a major advantage on a long trip. Annoyingly, simple tasks such as adjusting the mirrors must be performed through the center touchscreen. The Autopilot active driving assistance system can maintain the car's speed and keep it in its lane, but it isn't designed to react to all driving conditions, so drivers must remain constantly engaged. There isn't a proper BSW system; instead, images of nearby cars are displayed on the center screen, which can be distracting to the driver.

Tesla Model S

62 OVERALL SCORE

The fully electric Model S has an estimated driving range of more than 400 miles, and the ability to use Tesla's supercharging network in public places is a major plus. Performance is exceptional, with quiet and thrilling acceleration, pinpoint handling, and a firm yet comfortable ride. The hatchback design aids versatility, and the frunk, or front trunk, is a bonus. But the controls are extremely unintuitive because Tesla has eliminated the steering-wheel stalks for the turn signals and wipers. Many common functions are performed through the yoke, which is a small, half steering wheel that brings serious compromises in usability and maneuverability. Instead of a side-mirror-based BSW system, the Model S displays images of cars in adjacent lanes within the instrument cluster's poor substitute.

Tesla Model X

52 OVERALL SCORE

The Model X is more showy than practical. It features massive rear doors that very slowly open up and out of the way. There are five-, six-, or seven-passenger seating configurations, but the second-row captain's chairs don't fold, compromising utility. The X is very quick and handles nimbly in corners. But the excessively stiff ride and pronounced wind noise aren't befitting the high price and luxury status. The new yoke steering wheel makes driving very awkward, and controls are extremely unintuitive. Charge times are long, but the ability to use Tesla's supercharging in some rest areas is a plus. AEB with pedestrian detection, LDW, and LKA are standard. There isn't a proper BSW system; instead, images of nearby cars are displayed on the center screen, which can be distracting to the driver.

Tesla Model Y

73
OVERALL SCORE

The Model Y is essentially an SUV version of the Model 3, sharing key underpinnings and features. It's quick and agile, with handling that draws comparisons to sports cars, and the ability to use Tesla's supercharging network is a major advantage. But the Model Y also has the same distracting controls, very stiff ride, and pronounced road noise. The AWD Long Range version has an EPA-estimated 330-mile range. Charging from almost empty takes 10 hours on a 240-volt connector, but it is quicker with Tesla's wall charger. The Model Y is taller and roomier than the 3, which gives it much more rear-seat room while the hatchback layout provides more versatility. Both five- and seven-passenger seating configurations are available. There isn't a proper BSW system; instead, images of nearby cars are displayed on the center screen, which can be distracting to the driver.

Toyota 4Runner

59
OVERALL SCORE

It's plenty tough for off-roading, but otherwise the 4Runner falls short of most midsized SUVs. The powerful but rough-sounding 4.0-liter V6 is thirsty, delivering just 18 mpg overall. The ride is unsettled, and handling is clumsy, with noticeable body lean while cornering. A high step-in and low ceiling compromise both the access and driving position. Ground clearance is generous, and underbody skid plates are standard. The part-time 4WD system includes a low range for challenging off-road conditions; Limited trims get a 4WD system that can stay engaged indefinitely. We like the easy-to-use controls, which feature big buttons and knobs. A tiny third-row seat is optional, and the power-retractable rear window is handy. AEB with pedestrian detection, BSW, and RCTW are standard.

Toyota bZ4X

NA
OVERALL SCORE

The bZ4X SUV is Toyota's first ground-up EV. Sized like the RAV4, the front-wheel-drive bZ4X has a 201-hp motor, a 71.4-kilowatt-hour battery, and an EPA-estimated 252-mile range, while the all-wheel-drive version has 214 hp and a 72.8-kWh battery good for a 222-mile range. The range is short by current EV standards, and the car's 6.6-kilowatt onboard charger means home charging is on the slow side. A 100-kW DC fast-charging rate for the AWD model is also behind competitors. Otherwise, it's a functional SUV with agile handling and a decent ride but a rather spartan interior. Oddly, there is no glove box or rear wiper. It features the Safety Sense 3.0, which adds more advanced active safety and driver assist functions. The Subaru Solterra is essentially the same vehicle.

Toyota Camry ✓

82-90
OVERALL SCORE

Among midsized sedans the Camry ranks among the best, thanks to its comfortable ride, quiet cabin, good fuel economy, and easy-to-use controls. Handling is slightly improved over previous versions, but the lower stance makes access a little more difficult, and the rear seat is not as roomy as in some competitors. The standard 2.5-liter four-cylinder engine provides good power and gets an impressive 32 mpg overall. It can also be paired with an optional all-wheel-drive system. A 3.5-liter V6 is available in front-wheel drive. Both are coupled to an eight-speed automatic that suffers from some rough shifts. AEB with pedestrian detection, LDW, LKA, and lane centering assistance come standard. BSW, RCTW, and reverse automatic emergency braking are optional.

Toyota Corolla ✔

77/82 OVERALL SCORE

The Corolla sedan is fuel-efficient and sensible. A more powerful 169-hp, 2.0-liter four-cylinder engine, once exclusive to the higher trims and the hatchback, is now standard for all non hybrid models, and gets 36 mpg overall. The hybrid version is the most sensible choice with its incredible 48 mpg overall. A 2023 freshening brings available all-wheel drive along with Toyota's latest infotainment system. The Corolla's handling agility is among the better in the class, as is ride comfort and cabin quietness. Most controls are easy to use. The GR is a high-performance version powered by a 300-hp, turbocharged three-cylinder driving all four wheels. It comes exclusively with a manual transmission. AEB with pedestrian detection and lane centering assistance are standard, but BSW and RCTW are optional only.

Toyota Corolla Cross ✔

77 OVERALL SCORE

The Corolla Cross replaces the phased out C-HR. Smaller than the RAV4, it can be had with either front- or all-wheel drive. A 2.0-liter four-cylinder engine with 169 hp, matched to a CVT, is the main powertrain. A hybrid version is new for the 2023 model year. This pseudo-wagon feels slow and sounds loud, mostly due to engine noise, but the Corolla Cross manages a decent 28 mpg overall. Ride and handling are competent but unremarkable. The simple interior feels a bit stripped-down, but the controls are easy to use and the rear seat is fairly roomy. Standard active safety and driver assist features include AEB with pedestrian detection, and lane centering assistance, but BSW and RCTW are standard only on the midlevel LE and top XLE trims.

Toyota Crown

NA OVERALL SCORE

The 2023 Toyota Crown replaces the Avalon sedan. It sits higher than a sedan but lower than an SUV, features a swoopy roofline at the back, and comes exclusively as a hybrid. Most versions have a 2.5-liter four-cylinder hybrid that is paired with an electronic CVT and gets an estimated 38 mpg combined. A 340-hp, 2.4-liter turbocharged four-cylinder hybrid paired with a six-speed automatic is used in the top version. All-wheel drive is standard. The five-passenger interior features 12.5-inch screens for both the instrument cluster and the infotainment system. Despite its sleek hatchback looks, the Crown features a regular trunk. All versions get standard AEB with pedestrian detection, BSW, RCTW, reverse automatic emergency braking, and lane centering assistance.

Toyota GR86 ✓

76 OVERALL SCORE

Toyota's second-generation sports car, now called the GR86, uses a Subaru-sourced 2.4-liter four-cylinder engine mated to either a six-speed manual or an optional six-speed automatic transmission. The new engine delivers more low-end power than before, which makes the car easier to drive. Handling remains superb, thanks to a taut suspension, light weight, and rear-wheel drive, and it's a delight to drive. But the ride is stiff and choppy and the car is very loud, which together make long drives extremely tiring. The snug, low-slung cabin can be challenging to get in and out of, and the rear seat is tiny. The overly simple controls and infotainment system are super-easy to use. Versions with the automatic get standard AEB, but they aren't available on models with the manual.

Toyota Highlander ✓

80
86
OVERALL SCORE

The Highlander got a freshening for 2023 that replaced the smooth and punchy V6 with a new 265-hp, 2.4-liter turbo four-cylinder that packs some oomph but lost some refinement. Fuel economy is only marginally improved on the highway. The Highlander also got a new infotainment system, which is less user-friendly than before. The hybrid powertrain remains unchanged. It got an excellent 35 mpg overall in our tests. The ride is comfortable, and handling is sound and secure but unexceptional. Both seven- and eight-passenger seating configurations are available. Either way, the second row is very roomy, but the third row is tiny. AEB with pedestrian detection, and adaptive cruise control come standard. BSW and RCTW are standard on all versions except the base non-hybrid trim, where they are unavailable.

Toyota Prius

NA
OVERALL SCORE

For 2023, Toyota completely redesigned the Prius, giving it a sleeker look and more power, all while claiming to have made improvements in fuel economy. All-wheel drive is again available. Although it delivers quicker acceleration than in the previous car, the engine is noisy when it kicks in. The car is very low, hurting access. The EPA estimate for the front-wheel-drive LE is an impressive 57 mpg combined, while the all-wheel drive version is rated at 54 mpg combined. The Prius Prime plug-in hybrid arrives a bit later. AEB with pedestrian detection, BSW, and RCTW are standard. The Proactive Driving Assist system uses the vehicle's radar and sensors to add a small amount of steering and braking to keep away from other vehicles, cyclists, and pedestrians.

Toyota RAV4 ✓

72-78
OVERALL SCORE

The RAV4's 2.5-liter four-cylinder is paired with an eight-speed automatic and delivers relatively quick acceleration. Fuel economy is commendable at 27 mpg overall. The hybrid version feels energetic, with the electric drive producing immediate and quiet motivation from a standstill, while delivering an impressive 37 mpg overall. The RAV4 is responsive in corners, and it remains under control even when pushed. The ride, however, is somewhat stiff, and the noisy engine hurts the driving experience. Most controls, such as the large climate knobs, are easy to use. AEB with pedestrian detection is standard. BSW and RCTW are standard on all except the base trim. Updates for 2023 included a new infotainment system and a hybrid version called the Woodland Edition.

Toyota RAV4 Prime ✓

81
OVERALL SCORE

The plug-in hybrid version of the RAV4 can bridge the gap between a hybrid and a pure EV. With its electric drive and 2.5-liter four-cylinder engine, the Prime produces a combined 302 hp, which makes for brisk acceleration. The added electric power keeps the gas engine from having to rev high, where it can become noisy. We were able to drive the Prime about 42 miles on electric power alone, and it got 34 mpg overall once it reverted to hybrid mode. It takes almost 5 hours to charge the battery on a 240-volt outlet. The Prime transforms the RAV4 into a quick, quiet, comfortable-riding, and more upscale SUV. All RAV4 Primes come standard with AEB with pedestrian detection, BSW, RCTW, LDW, LKA, and lane centering assistance.

Toyota Sequoia

59 OVERALL SCORE

The redesigned Sequoia SUV uses a fresh platform shared with the also-redesigned Tundra and Lexus LX. This full-sized, three-row SUV has a smooth and punchy 437-hp, 3.4-liter turbocharged hybrid V6 engine with a 10-speed automatic. The large SUV can be configured in rear- or four-wheel drive, but unlike its peers it lacks an auto 4WD mode. It forgoes the previous Sequoia's independent rear suspension to the detriment of third-row seat roominess. Handling is beyond clumsy, yet secure. The ride seems compliant at first but is plagued with too much shudder and jiggle. Maximum tow capacity is over 9,000 pounds. Most trims use a large 14-inch infotainment display that's a bit far away to reach. The Sequoia comes with standard AEB with pedestrian detection, BSW, RCTW, and adaptive cruise control.

Toyota Sienna ✓

81 OVERALL SCORE

The Sienna comes exclusively as a hybrid, with a combined 245 hp between the electric drive and the 2.5-liter four-cylinder. Front-wheel drive is standard, and AWD is optional. Fuel economy is superb at 36 mpg overall, and the van has a cruising range of over 600 miles. It can glide on electric power at very low speeds, but when more power is needed, the gas engine noisily kicks in. The Sienna rides comfortably, but handling is uninspiring and stopping distances are long. The infotainment touchscreen is easy to use, though some controls are a far reach away. The cavernous interior has ample storage cubbies, seven USB ports, and second-row sunshades. Hands-free sliding side doors are a convenience. AEB with pedestrian detection, BSW, and RCTW are standard.

Toyota Supra ✓

82 OVERALL SCORE

This two-seat sports car shares the BMW Z4's platform and many of its components but features a coupe body. The 3.0-liter turbo six-cylinder is rated at 382 hp; there's also a 255-hp, turbo four-cylinder. A slick eight-speed automatic routes power back to the rear wheels, though a six-speed manual is now available with the turbo six-cylinder. Sport mode sharpens responses and amplifies the exhaust sound. Handling is super-responsive and agile, and the car is playful and fun to drive, whether on twisty two-lanes or a track. The ride is stiff but tolerable. Getting in and out is a chore, and the styling limits visibility. BMW's infotainment system takes some getting used to but ultimately proves logical. AEB with pedestrian detection is standard; BSW and RCTW are optional.

Toyota Tacoma

52 OVERALL SCORE

Toyota's rough-and-tumble compact pickup features a 3.5-liter V6 engine hooked up to a six-speed manual or automatic. A 2.7-liter four-cylinder engine is also available. Both two- and four-wheel-drive models are offered. Our 4WD V6 Tacoma delivered 19 mpg overall. Though the truck is as tough as nails and delivers impressive off-road prowess, it's primitive. The ride is stiff, and handling is ponderous. The modern connectivity features are welcome. AEB with pedestrian detection, and LDW are standard. BSW and RCTW are optional, and features such as adaptive cruise control with stop-and-go aren't available at all. Toyota's most recent freshening brought thicker glass to help suppress noise and the availability of a power driver's seat, but a full redesign is imminent.

Toyota Tundra

61 OVERALL SCORE

The redesigned Tundra has new powertrains, coil springs for the rear suspension, and a generous towing capacity. Two turbocharged 3.4-liter V6 engines are available: a 389-hp standard engine and a 437-hp hybrid. Both engines are paired with a supersmooth-shifting 10-speed automatic. The standard engine is quite punchy, but fuel economy of 17 mpg overall isn't stellar. The ride is relatively civilized, but handling is rather clumsy. The cabin is very roomy and is available with a huge 14-inch infotainment touchscreen. Maximum tow capacity is 12,000 pounds with a stout payload of 1,940 pounds. The bed is made of dent- and corrosion-resistant composite material. AEB with pedestrian detection is standard, but BSW and RCTW are optional.

Toyota Venza ✓

80 OVERALL SCORE

While pleasant enough, the Venza's excellent 37 mpg overall is its main selling point. The 2.5-liter four-cylinder engine and electric drive, shared with the RAV4 Hybrid, yield a combined output of 219 hp. The initial electric power makes for a smooth getaway off the line, but when extra power is needed, the continuously variable transmission holds revs at a high level, exacerbating the din from the gas engine. All-wheel drive is standard. We found that the Venza rides comfortably and handles soundly, but tire and engine noise can be pronounced. The controls are cluttered and are very distracting. The high-end Limited trim is available with a dimmable, electrochromic glass roof. All Venzas come standard with AEB with pedestrian detection, BSW, RCTW, and adaptive cruise control.

Volkswagen Arteon ✓

77 OVERALL SCORE

Our testers praised this practical, sporty, and well-appointed hatchback for its prompt acceleration, confidence in corners, and firm ride that's pleasant even on rough roads. Front-wheel drive comes standard, and AWD is optional. Engine noise is noticeable at low speeds and under acceleration. Inside, the Arteon has comfortable front seats and well-finished, user-friendly controls. We like the responsive touchscreen and the physical buttons and knob for the climate and audio systems. A low roofline makes the car a challenge to get into and out of. There's a huge cargo area with lots of space and a low loading floor under the heavy hatchback lid. The engine got a recent horsepower bump, and a seven-speed dual-clutch automatic is new. AEB with pedestrian detection, BSW, and RCTW are standard.

Volkswagen Atlas ✓

71 OVERALL SCORE

Volkswagen's Atlas is a formidable competitor among three-row SUVs. The Atlas drives well, with a comfortable ride and surprisingly agile handling for its size. The cabin is quiet and very accommodating, including a third-row seat that truly fits adults. A unique, effortlessly articulating second row allows a clear access path to the wayback. The controls are well-laid-out, with clear gauges and an easy-to-use infotainment system. Though the V6 engine and smooth eight-speed automatic make the Atlas feel lively during everyday driving, its acceleration trails competitors' and its 20 mpg overall fuel economy is not outstanding. A 2.0-liter turbo four-cylinder is also available. Towing capacity is a generous 5,000 pounds. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard.

Volkswagen Atlas Cross Sport ✓

68
OVERALL SCORE

The Cross Sport shares its underpinnings and engine choices with the larger three-row Atlas but has two fewer seats and less cargo room. Handling is nimbler than one would expect from such a large vehicle. The ride has an underlying firmness but absorbs bumps decently. The seats are comfortable, and the controls are easy to use. The rear seat is very spacious. The base 2.0-liter turbo four-cylinder is quite responsive and capable of moving the Cross Sport adequately; there is also a more powerful but slightly less fuel-efficient 3.6-liter V6. Both front- and all-wheel drive are offered. AEB with pedestrian detection, BSW, and RCTW are standard. Lane centering assistance and adaptive cruise control are optional.

Volkswagen Golf GTI

65
OVERALL SCORE

The latest generation of the Golf GTI brings sharpened handling, more power, and a new infotainment system. Now available only as a four-door, the GTI's 241-hp. 2.0-liter turbo-four pulls strongly with immediate throttle response, whether you get the six-speed manual or the dual-clutch automatic. There are driving thrills aplenty, thanks to its sharp steering, slick shifter, and invigorating engine and exhaust sounds. The cabin is well finished, and most versions come with plaid upholstery an ode to the original Rabbit GTI from the 80s. Unfortunately, VW has replaced its formerly user-friendly controls with a very distracting infotainment system and an odd location of some controls. AEB with pedestrian detection, BSW, and RCTW are standard. The AWD Golf R has more power and cornering capability.

Volkswagen ID.4

65
OVERALL SCORE

The ID.4 EV is roomy and nicely finished inside. The standard RWD version has an EPA-estimated driving range between 208 and 275 miles depending on the selected battery size, but acceleration feels tepid. The more powerful AWD version has two motors driving and an estimated 255-mile range. We found this version had quick acceleration, a comfortable ride, and a quiet cabin, except for the annoying pedestrian-warning sounds at low speeds. The ID.4 has responsive handling, but it isn't sporty to drive. The rear seat is generous, as is cargo capacity. Unfortunately, the controls are very unintuitive and the slow-responding infotainment system is distracting. The car can take up to 170 kW at DC fast-charging locations. AEB with pedestrian detection, BSW, and RCTW are standard.

Volkswagen Jetta ✓

72
OVERALL SCORE

The Jetta has easy-to-use controls, great fuel economy, and a relatively spacious cabin. A 1.5-liter turbocharged four-cylinder engine coupled to an eight-speed automatic is shared with the Taos SUV. Fuel economy was excellent at 34 mpg overall when we tested it with the previous 1.4-liter turbo. The ride is absorbent but can be too tender over sharp bumps. Handling is competent yet dull. The cabin is quiet for a compact sedan. Most versions come with faux leather seats and automatic climate controls, giving the car an air of premium ambience. Standard active safety features include AEB with pedestrian detection, but BSW and RCTW are optional. A sporty GLI version, which shares components with the previous-generation Volkswagen GTI, is also available.

Volkswagen Taos

37
OVERALL SCORE

The Taos small SUV slots beneath the Tiguan. The 1.5-liter turbocharged four-cylinder engine, coupled with a dual-clutch automatic on AWD versions, delivers uneven acceleration. There is a huge delay initially, followed by a burst of power, which makes it hard to drive smoothly. Front-wheel-drive versions get a conventional transmission and drive more smoothly. Handling is nimble, and the firm ride absorbs most road irregularities. Shorter than the Tiguan, the Taos still has an enormous rear seat, but cargo space is smaller. Outward visibility is unobstructed. Upscale amenities, such as a digital instrument cluster and a panoramic roof, are available. While AEB with pedestrian detection is standard, BSW and RCTW are optional.

Volkswagen Tiguan

59
OVERALL SCORE

The Tiguan is one of the largest models in the small-SUV segment. That length allows for an optional third-row seat and an enormous second-row seat. Though the 184-hp, 2.0-liter turbocharged four-cylinder engine feels responsive in daily driving, acceleration is ultimately slow: It takes more than 10 seconds to reach 60 mph from a stop. Fuel economy of 25 mpg overall on regular gas is good for the class. The transmission is mostly smooth. Handling is capable and secure, and the ride is comfortable. The cabin is among the quietest in the segment, with just a little engine noise when revved. Recent updates included a new infotainment system. Active safety features include standard AEB with pedestrian detection, but BSW and RCTW are optional.

Volvo C40

NA OVERALL SCORE

Based on the electric XC40 Recharge, the C40 Recharge essentially trades some of its SUV functionality for a more coupelike roofline. It has a dual-motor, 402-hp setup that gives it AWD capability. The 78-kilowatt-hour battery yields an EPA-estimated range of 226 miles, which is short by current EV standards. The electric powertrain is the same as the one we tested in the related Polestar 2 and provides quick acceleration. We found the XC40 to have a stiff ride and unintuitive controls. Being an EV, we expect the C40 to be quicker and quieter than the XC40. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard. Volvo's available driver assistance system combines adaptive cruise control and steering assistance.

Volvo S60 ✓

70 OVERALL SCORE

The S60 sedan is quiet and boasts an uncluttered and elegant interior with comfortable seats. It comes as either front- or all-wheel drive. The turbo four-cylinder engine employs mild-hybrid technology that facilitates accessory usage and smooths out the engine's stop/start feature. We measured 26 mpg overall when we tested the previous T5 engine. In typical Volvo fashion, the ride is stiff. Handling is sound but unexceptional. The S60 is plagued with Volvo's unintuitive infotainment system, which requires too much swiping, tapping, and eyes-off-the-road time. The V60 Cross Country is a raised wagon version, and the V60 Recharge is a 455-hp plug-in hybrid wagon with an estimated 41-mile all-electric cruising range. AEB with pedestrian detection, BSW, and RCTW are standard.

Volvo S90

56 OVERALL SCORE

Though the S90 is ornate inside, it falls short of the refinement expected of a midsized luxury sedan, mostly due to the car's too-stiff ride. The standard engine is a 295-hp, turbocharged four-cylinder with a mild-hybrid setup. All-wheel drive is standard. A plug-in hybrid version has an estimated 38-mile all-electric cruising range. Handling is sound but ordinary. The roomy cabin is gorgeous, with supportive seats, but the iPad-like touchscreen proves to be frustrating to use. The V90 Cross Country is a wagon version of the S90. AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking are standard. Volvo's optional driver assistance system combines steering assistance and adaptive cruise control to ease highway driving.

Volvo XC40 ✓

68 OVERALL SCORE

The XC40 competes in the entry-level luxury SUV class. The B5 trim we tested comes with all-wheel drive and a 247-hp turbo four-cylinder that packs a decent punch. Front-wheel-drive B4 versions use a 194-hp, 2.0-liter turbo engine. The ride is stiff, and the engine has a coarse growl. Worse, the controls, such as the electronic gear selector and infotainment system, are unintuitive and frustrating to operate. Handling is mundane but secure. The cabin is nicely furnished, and the front seats are very comfortable. An all-electric version, called Recharge, is also available, but its 223-mile range is short by current EV standards. The XC40's standard active safety systems include AEB with pedestrian detection, BSW, and RCTW. Volvo's optional driver assistance system combines adaptive cruise control and steering assistance.

Volvo XC60

64 OVERALL SCORE

Volvo's XC60 is a scaled-down version of the XC90, complete with an elegant, high-quality interior. Like its big brother, it suffers from convoluted and distracting controls and a stiff ride. The standard 2.0-liter turbocharged four-cylinder engine, known as B5, is responsive, but the eight-speed automatic shows an occasional bumpy shift at low speeds. We measured 23 mpg overall on premium fuel. A more powerful 295-hp version comes in the B6. The XC60 Recharge is a plug-in hybrid with an estimated 35-mile all-electric cruising range. The cabin benefits from supremely comfortable seats, a relatively roomy rear seat, and a nicely finished cargo hold. Standard active safety features include AEB with pedestrian detection, BSW, RCTW, and reverse automatic emergency braking.

Volvo XC90

60 OVERALL SCORE

This nicely appointed three-row SUV suffers from a bumpy ride and baffling controls. The base B5 uses a 247-hp, 2.0-liter turbo four-cylinder. Our tested B6, with its more powerful 295-hp engine, delivered decent punch but returned a so-so 20 mpg overall. There's also a plug-in hybrid version with a 35-mile all-electric range. The eight-speed automatic operates smoothly most of the time. Handling is responsive and secure, but the ride is stiff. The cabin is quiet, but the raspy-sounding engine is unbefitting a luxury SUV. The interior is uncluttered and modern, with super-comfortable seats, though the third row is tight. Most functions are controlled through the touchscreen, but common tasks take too many steps to complete. AEB with pedestrian detection, BSW, and RCTW are standard.

ROAD-TEST HIGHLIGHTS

WE CONDUCT MORE than 50 objective tests and subjective evaluations on every vehicle we purchase. These charts list the results from our testing. The information allows you to easily compare models. Here's an explanation of the criteria that appear in the charts:

- **Make + Model** specifies the make, model, and trim version of the vehicle Consumer Reports bought and tested. We often test multiple versions of the same model, and each can yield different results depending on the trim and equipment level, body style, and engine type.
- **Trans.** indicates the transmission type and number of speeds. "Auto" is automatic; "CVT," continuously variable transmission; "Man," manual; "Seq," sequential; and "1-spd. dir.," one-speed direct drive.
- **HP** is the horsepower of the engine or motor tested.
- **Engine** notes displacement, number of cylinders, and configuration we tested, or if the vehicle is electric.
- **CR's Fuel Economy** includes the tested Overall miles per gallon based on a realistic mix of highway and city driving. The figures for City and Highway driving are listed separately.
- **Acceleration** is based on how a vehicle performs in several tests. The 0-30 mph and 0-60 mph tests are conducted from a standstill with the engine idling; the figures indicate the number of seconds needed to reach those speeds. The ¼-mile test is also done from a standing start, and the figures listed indicate the number of seconds needed to reach the quarter-mile mark as well as the speed the vehicle was traveling when it reached that distance.
- **Braking** is the distance in feet a vehicle took to stop from 60 mph on dry and wet pavement.
- **Performance** includes our emergency-handling and turning-circle tests. AM speed is the speed at which the vehicle successfully negotiated our avoidance-maneuver test course, which simulates swerving quickly, with a left-right-left steering sequence, to avoid an obstacle without losing control. The faster the speed, the better.
- **Turning circle** is the bumper clearance needed, in feet, to complete a U-turn.

For more in-formation on the vehicles we have tested and to continue your research, go to **CR.org**. Consumer Reports members have access to all of our test results, detailed reliability and owner satisfaction ratings, and expert reviews.

INSIDE CR'S LABS

Part of our 327-acre test facility includes dry and wet braking lanes, for evaluating tire grip.

SAFETY FEATURES AND CRASH-TEST RATINGS

WHEN ASSESSING SAFETY, it's important to compare vehicles within the same class. Models perform differently in crashes based on their size and what they hit. Even a small car with top crash-test ratings will take the brunt of an impact if hit by a larger, heavier vehicle.

As safety technology progresses rapidly, we've begun evaluating some active safety features in our test program. As part of CR's Overall Score, we give additional consideration to certain active safety features—offered as standard equipment across all trim levels of a particular model—that can help drivers avoid an accident or lessen the impact of a crash.

In addition to crash test ratings from the National Highway Traffic Safety Administration (NHTSA), the Insurance Institute for Highway Safety (IIHS) conducts additional crash tests that get more difficult over time. For example, the side crash test now involves a higher speed and a heavier barrier than in prior years.

Overall, newly introduced vehicles that were designed with these test in mind have performed much better than older models.

Guide to the Charts

The charts on these pages are a comprehensive collection of data to help you compare the safety capabilities of different models. Because crash-test results can be compared only among vehicles of similar weight, we group models by category. Here is a guide to each column:

▪ **Accident avoidance.** This composite score is derived from our track tests, including braking and emergency handling, and to a lesser extent driving position, visibility, acceleration, and seat comfort. If we test multiple versions of the same model and the accident-avoidance scores differ, we give the range of scores attained.

▪ **Front-crash prevention.** This indicates the availability of highway-speed and pedestrian-detection automatic emergency braking (AEB), blind spot warning (BSW), and rear cross traffic warning (RCTW) on a model. Std. indicates that the safety feature is standard equipment; Opt. means it's available, but might not be on all trims; and NA indicates that the feature is not available.

▪ **IIHS safety tests.** These include the driver- and passenger side front small-overlap, tests, which replicate a 40-mph crash in which the front of a car hits a rigid barrier. They also include an offset frontal crash that represents a head-on collision with 40 percent overlap, side-impact, and rear crash tests, and a roof-strength evaluation.

IIHS scores are Good, Acceptable, Marginal, and Poor. The roof-strength test subjects a vehicle to a force equal to four times its weight for up to 5 inches of roof crush.

▪ **NHTSA safety tests.** These tests measure full-frontal and side-impact performance, and they're displayed as a combined overall and overall front and side rating. The rollover rating denotes the risk in a single-vehicle crash. This score is largely based on a static measure of a vehicle's center of gravity. A dynamic test is used for light trucks.

For all crash tests a dash (—) means the test hasn't been conducted.

SAFETY SYSTEMS EXPLAINED

With so many names out there for important new safety technology, CR steps in to clarify things.

ACTIVE SAFETY FEATURES are becoming common on new vehicles, but the terminology used by automakers to describe them varies widely—and often seems to prioritize marketing over meaning.

That's why CR worked with AAA, J.D. Power, National Safety Council, PAVE, and SAE International to come up with clear, standardized naming conventions to describe what these systems do.

The common naming outlined below is simple, specific, consistent, and designed to reduce driver and buyer confusion.

The U.S. Department of Transportation has endorsed this effort to bring about standardized names for common safety features. These names are what we use in CR's print and web content, and the list will be continually refined as new systems are developed.

No matter what they're called, it's important to remember that these systems are designed to assist—not replace—an engaged driver.

DRIVING CONTROL ASSISTANCE

Active Driving Assistance

Simultaneous use of Lane Centering Assistance and Adaptive Cruise Control. The driver must constantly supervise this support feature and maintain responsibility for driving.

Adaptive Cruise Control (ACC)

Cruise control that also assists with acceleration and/or braking to maintain a driver-selected gap to the vehicle in front. Some systems can come to a stop and continue while others cannot.

Lane Centering Assistance (LCA)

Provides steering support to assist the driver in continuously maintaining the vehicle at or near the center of the lane.

COLLISION WARNINGS

Blind Spot Warning (BSW)

Detects vehicles in the blind spot and notifies the driver of their presence. Some provide an additional warning if the driver activates the turn signal.

Forward Collision Warning (FCW)

Detects a potential collision with a vehicle ahead and alerts the driver. Some systems alert for pedestrians.

Lane Departure Warning (LDW)

Monitors the vehicle's position within the lane and alerts driver as the vehicle approaches or crosses lane markers.

Parking Collision Warning

Detects objects close to the vehicle during parking maneuvers and notifies the driver.

Rear Cross Traffic Warning (RCTW)

Detects vehicles approaching from the side at the rear of the vehicle while in Reverse gear and alerts the driver. Some systems warn for pedestrians.

COLLISION INTERVENTION

Automatic Emergency Braking (AEB)

Detects and warns of potential collisions with a vehicle ahead, and automatically brakes to avoid a collision or lessen impact severity. Some also detect pedestrians.

Automatic Emergency Steering

Detects potential collisions with a vehicle ahead and automatically steers to avoid or lessen the severity of impact. Some also detect pedestrians.

Lane Keeping Assistance (LKA)

Provides steering support to assist the driver in keeping the vehicle in the lane. It reacts only when the vehicle approaches or crosses a lane line or road edge.

Reverse Automatic Emergency Braking

Detects potential collisions while in Reverse gear and automatically brakes to avoid or lessen the severity of impact. Some also detect pedestrians.

PARKING ASSISTANCE

Backup Camera

Displays the area behind the vehicle when in Reverse gear. Some include trailer assistance, a system that assists drivers during backing maneuvers with a trailer attached.

Surround View Camera

Displays the area around some or all sides of the vehicle while stopped or during low-speed maneuvers.

Active Parking Assistance

Assists with steering and other functions during parking maneuvers. Driver may be required to accelerate, brake, and/or select gear position. Some systems can parallel and/or perpendicular park.

Remote Parking Assistance

Without the driver being physically present inside the vehicle, provides steering, braking, accelerating and/or gear selection while moving a vehicle into or out of a parking space.

DRIVER MONITORING

Indirect Driver Monitoring System

Observes vehicle states, motions and/or driver performance indicators to estimate driver distraction, inattention, or misuse. This may include monitoring steering wheel input, vehicle sway within the lane, or a combination of other factors monitored by the vehicle systems. Some systems may provide a warning to the driver and/or limit the use of other features.

Direct Driver Monitoring System

Detects the driver's eye and/or head movement to estimate where the driver is looking. Some systems may provide a warning to the driver and/or limit the use of other features.

Driver Re-engagement

A series of warnings and interventions to engage an unresponsive driver. If the driver does not respond, the system brings the vehicle to a full stop while maintaining steering control.

VEHICLE DIMENSIONS

THESE CHARTS PUT the interior and exterior dimensions of different models, along with cargo, load, and towing capacity, in one place. Most of the data come from measurements taken during our testing. Data for vehicles that have not been tested by us or are not yet on sale were provided by the manufacturers.

Exterior Dimensions and Weight

- **Length, width, height,** and **wheelbase** data come from the vehicle's manufacturer.
- **Weight** of tested vehicles is measured on our scales.

Cargo

- **Max. load** is the maximum weight of the combination of passengers and cargo that the vehicle can safely carry. This figure is specified by the manufacturer or, in the case of some tested vehicles, calculated based on the difference between our tested vehicle's weight and the manufacturer's specified gross weight.
- **Cargo volume** for wagons, minivans, and sport-utility vehicles is our measurement conducted with the rear seats folded. We use an adjustable pipe frame box and enlarge it until it no longer fits through the rear hatch. We then measure the volume of the box. Data for cars come from the federal government.
- **Towing capacity** is the maximum for the vehicle we tested. For those we didn't test, we have included the manufacturer's tow rating for a typical model.
- **NR** denotes not recommended for towing.

Interior Dimensions

- **Front, rear, and third-row shoulder room** are either our measurements or data from the manufacturer. For three adults to sit abreast comfortably, rear shoulder room should be 55 inches or more.
- **Front legroom** is the maximum distance from the heel point of the driver to the base of the seatback, with the seat adjusted as far back as it will go.
- **Rear or third-row legroom** is measured with the front seat adjusted to provide 40 inches of front legroom.
- **Headroom** is the clearance above a person who is 5 feet, 9 inches tall.
- **NA** means data are not available and we have been unable to measure the vehicle completely. A dash (–) means not applicable.

MEMBER BENEFIT

Car Recall Tracker™

Stay safe and get alerts with this valuable CR tool, before you're on the road. Just enter your car's make and model and we'll list any recalls, plus information on what to do next.

Safety comes first...

Start today at cr.org/adrecalltracker
